HPE Azure Migration Rapid Readiness Assessment

www.hpe.com

You want to accelerate your Microsoft Azure journey

You want to migrate to Azure, not sure if the target environment is fully prepared and want to know the right applications and services to migrate? HPE will use its Azure best practices and migration factory to prepare the Azure target and prepare your business for the migration to Microsoft Azure

Challenges

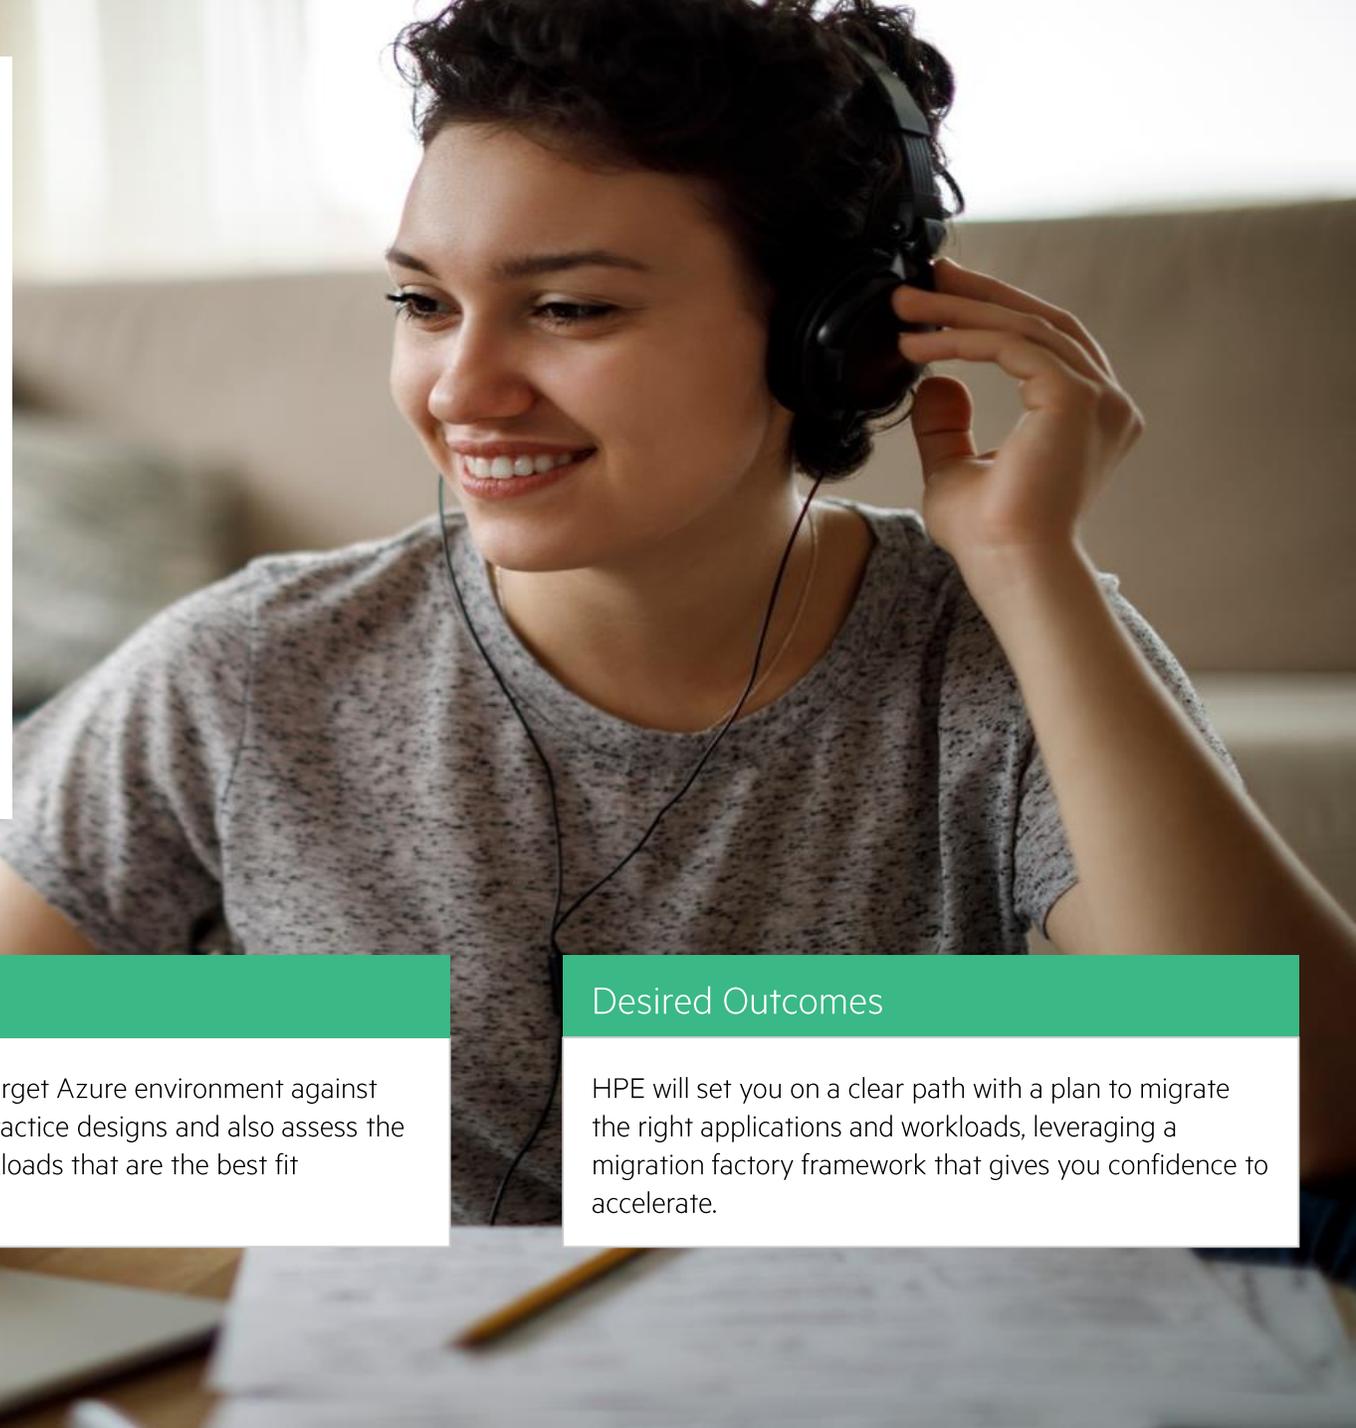

Is your Azure environment ready for critical workloads? Do you have clarity on which applications and workloads to migrate? Do you know how to migrate at pace?

Ideal Solution

HPE will assess the target Azure environment against out enterprise best practice designs and also assess the applications and workloads that are the best fit

Desired Outcomes

HPE will set you on a clear path with a plan to migrate the right applications and workloads, leveraging a migration factory framework that gives you confidence to accelerate.

Hewlett Packard Enterprise Azure Rapid Readiness Assessment

Getting the right mix of applications and workloads split between on-premise and Microsoft Azure to enable customers digital ambitions.

Azure environment – enterprise ready

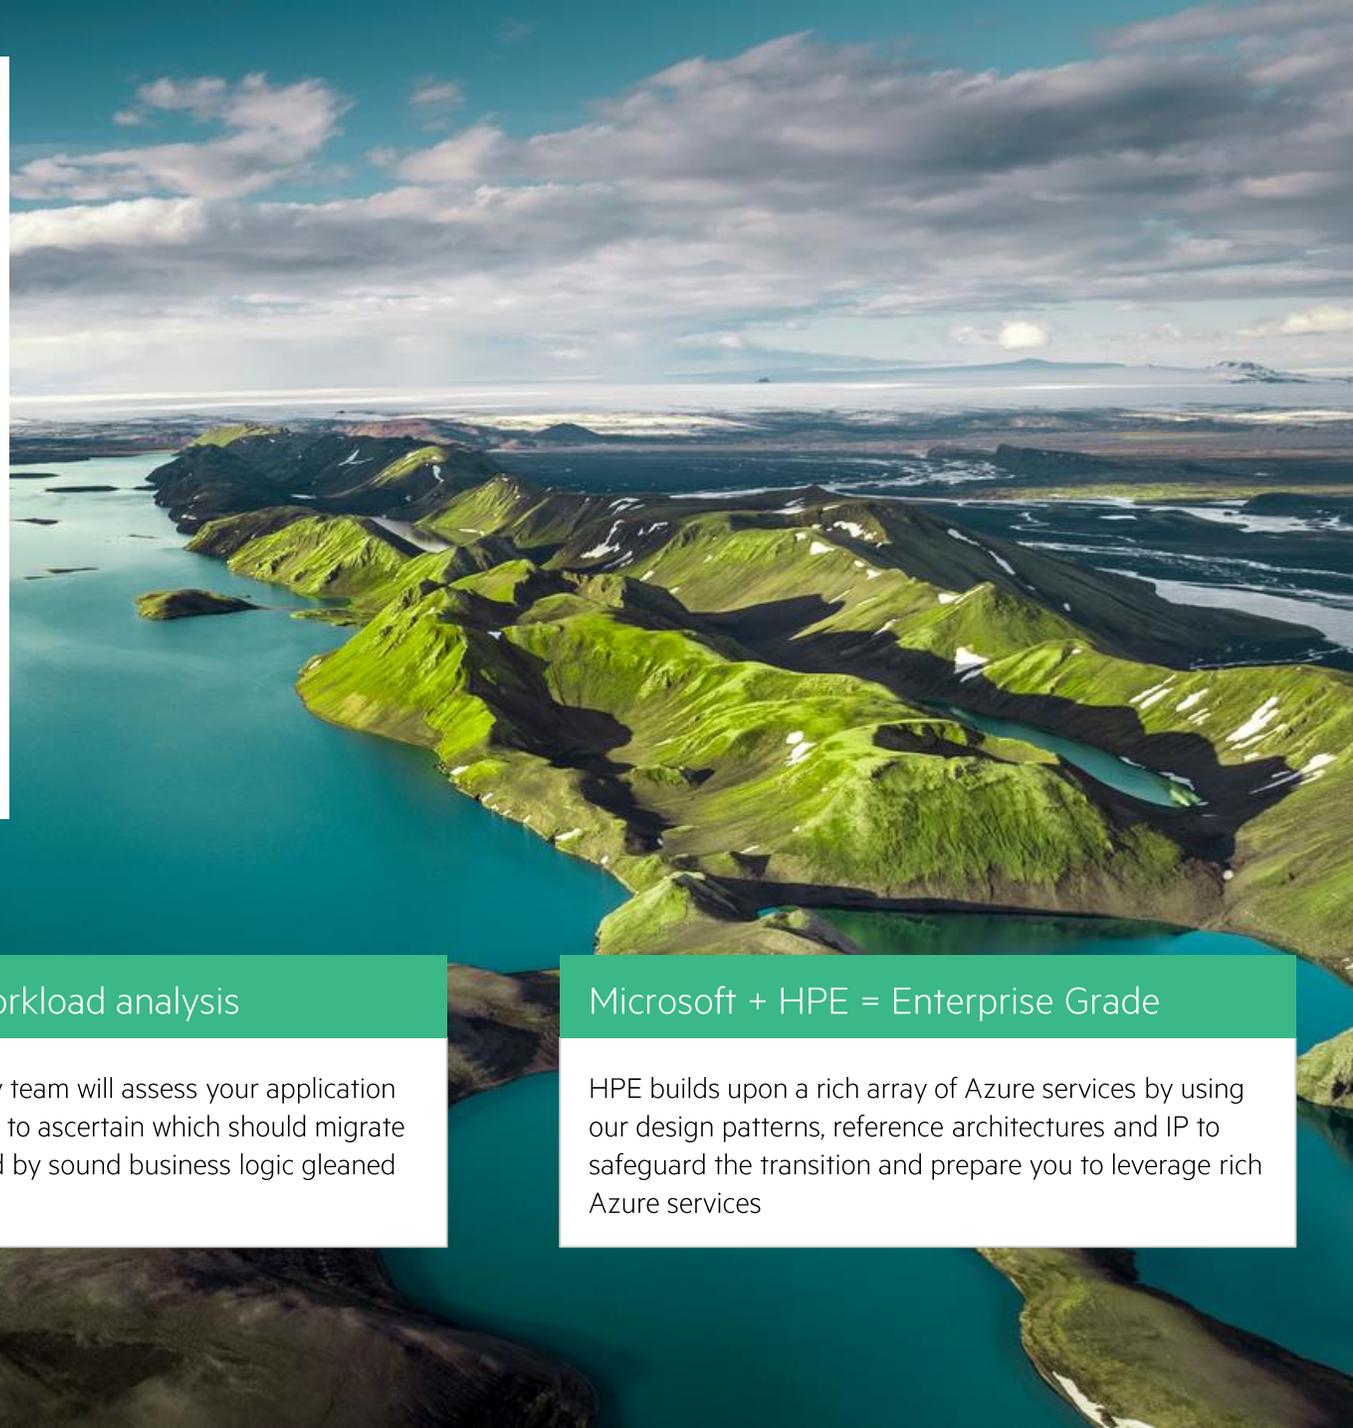

HPE will use its well-honed Azure reference architectures, design artefacts and operational frameworks to help you prepare the Azure target environment.

Application & workload analysis

HPE migration factory team will assess your application & workload landscape to ascertain which should migrate to Azure, underpinned by sound business logic gleaned from you

Microsoft + HPE = Enterprise Grade

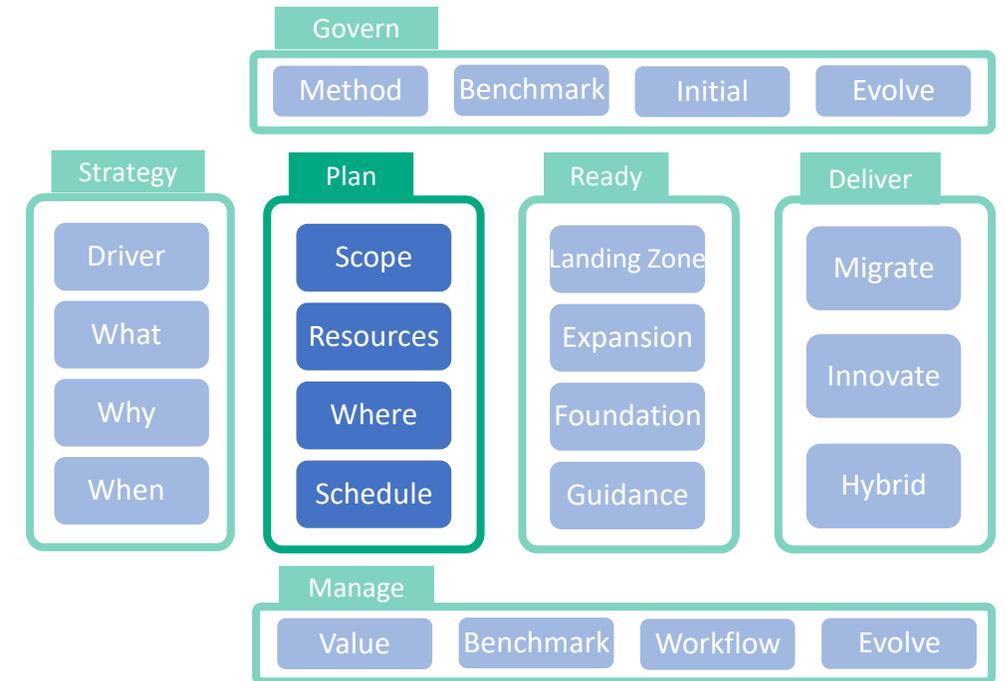

HPE builds upon a rich array of Azure services by using our design patterns, reference architectures and IP to safeguard the transition and prepare you to leverage rich Azure services

Rapid Readiness Assessment and the Cloud Adoption Framework

Rapid Readiness Assessment is a core element of the Plan pillar in the HPE Cloud Adoption Framework.

HPE Cloud Adoption Framework

Challenges

Your Azure environment is technically ready, is the team ready? PaaS adoption, shift to DevOps, containerization
Do you know how to migrate at pace?

People Process and Technology

The Rapid Readiness Assessment assess the customer IT environment in a holistic manner, taking into consideration all aspects of IT from the people, processes and the technology.

Assessment Outcomes

With an in-depth understanding of the IT ecosystem and a clear view of strengths and opportunities, you'll have the confidence to accelerate the adoption of cloud services.

HPE Azure Readiness And Microsoft Cloud Adoption Framework

HPE Pointnext Services have decades of experience building and running enterprise systems. The partnership with Microsoft and our enterprise Azure capability helps you achieve the right mix of on-premise and Azure, supported by robust operational frameworks and migration factory execution

HPE enterprise cloud and CAF

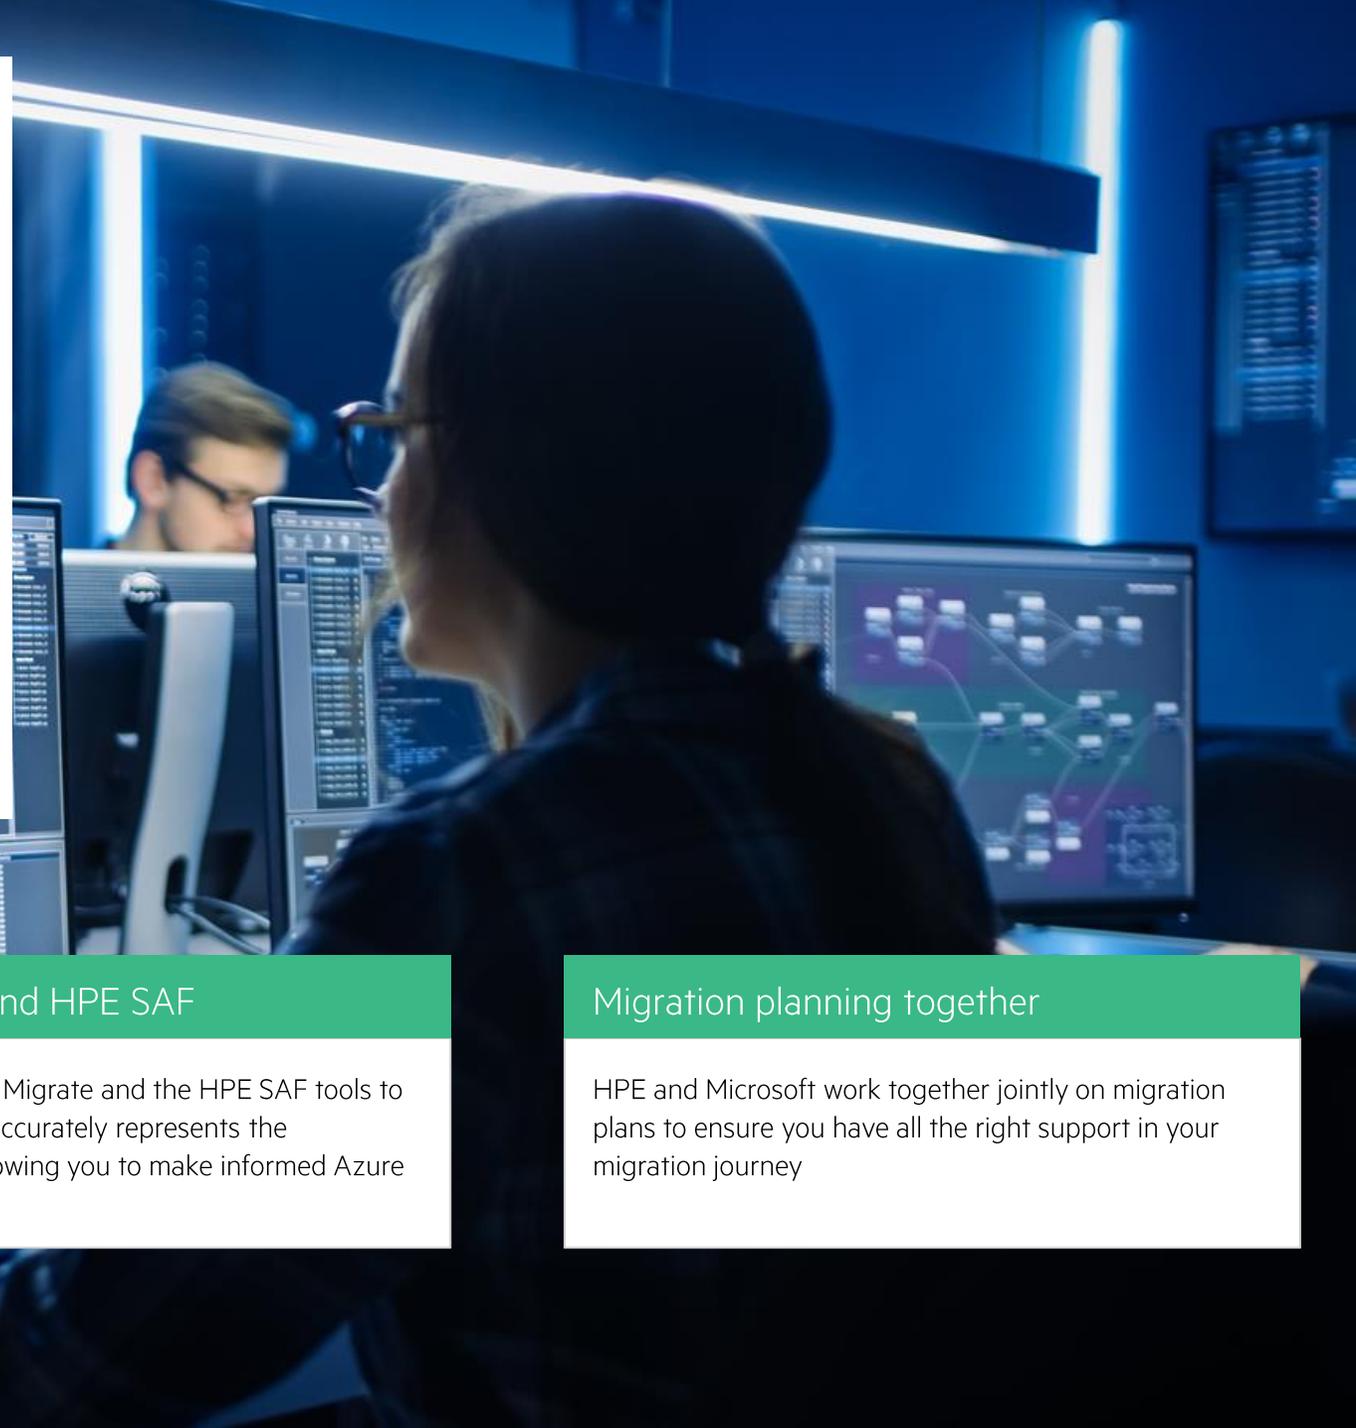

HPE are compliant with the Microsoft Cloud Adoption Framework and a preferred partner but add value by leveraging HPE IP to smooth the transition to Azure

Azure Migrate and HPE SAF

Combining the Azure Migrate and the HPE SAF tools to build a data set that accurately represents the technology estate allowing you to make informed Azure migration decisions

Migration planning together

HPE and Microsoft work together jointly on migration plans to ensure you have all the right support in your migration journey
