# HTG

M356 Identity & Access Pack £750

Traditionally, the network was the primary security boundary, however, with the acceleration of cloud applications and BYOD a new model is required. This new model sees identity as the primary security boundary.

HTG's Identity and Access pack is at the foundation of cloud security and ensures that identity is strengthened to reduce the likelihood of comprised credentials.

Features include:

Company Branding

Connect on-premises Active Directory to Azure AD

Creation of emergency admin accounts

Enable Multi-Factor Authentication (MFA)

Support for trusted locations

Define Role Based Access Control for least privileged access

Block legacy authentication protocols that bypass MFA

Configure baseline Conditional Access controls

Configure self-service password reset (SSPR)

Limit end user consent to 3rd party applications

Combine SSPR & MFA registration

Restrict Azure AD Join & Auto-Enrolment

Terms and Conditions

One uniform set of polices will be created i.e. Policies will target all users. If granular policies of the same parent type are required for multiple groups, this will be treated as out of scope and additional time will be required to facilitate this.

* Requires Apple Business Manager **Requires Managed Google Play Account
