

PROTECT 365 APP: GRIP AND INSIGHT ON CLOUD SECURITY

In a cyber world full of threats, alerts and above all many different dashboards, non-integrated systems and reporting tools, the overview is quickly lost - and with that, the grip on cybersecurity.

The solution: The Protect 365 App.

4 x Benefits in a row

01

Continuous Insights

Fortunately, you are not alone. With Protect 365 you get a complete security and compliance reporting solution which you can take immediate action. For a fixed price per user per month, you significantly improve the safety of the workplace.

02

Protect 365 App

You have access to the Protect 365 app with real-time insights into your environment, where important findings and advice are shared. You will always be informed of updates and new features in your Microsoft environment.

03

Grip & Insight

You have a clear overview of all users, applications, data and devices. For example, which users were affected by phishing, or which devices were affected by viruses. You have instant insights and get push notifications for high priorities.

04

Always Safe

Protect 365 improves the security level. In the background, the environment is continuously monitored. Employees can always work safely from any location.
