- Secure data transfer with SSL protocol
- Ability to encrypt backup files
- Complete visibility and control for accessing and restoring data stored in the cloud
- Endless restore points available

ABOUT MICROSOFT 365 MANAGED BACKUP

Although Microsoft provides powerful services within Microsoft 365 suite, a comprehensive backup is not one of them. Indeed, the full responsibility to backup data and protect them, is on company's side.

The 365 Cloud Backup Managed Service based on Veeam, the market leader in Office 365 data protection, allows companies to backup Microsoft365 - Office365 data, including Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams, eliminating the risk of data loss.

- Protect Microsoft 365 data from accidental deletion and security threats
- Quickly restore Microsoft 365 data
- Meet compliance requirements [ST1] & best practices for data protection (GDPR)

We offer the possibility to choose where to backup data: In Switzerland within Azure or in Europe, within Wasabi.

Both possibilities are based on Azure management console, that allows our team to build, manage, and monitor everything in a single unified hub.

89%

of organizations have a protection gap

76%

of organizations had at least one ransomware attack last year

4 REASONS TO BACKUP MICROSOFT 365 DATA

Accidental deletion

human errors are the most common cause of data loss, that, in absence of a backup could get lost forever.

Retention policy gaps

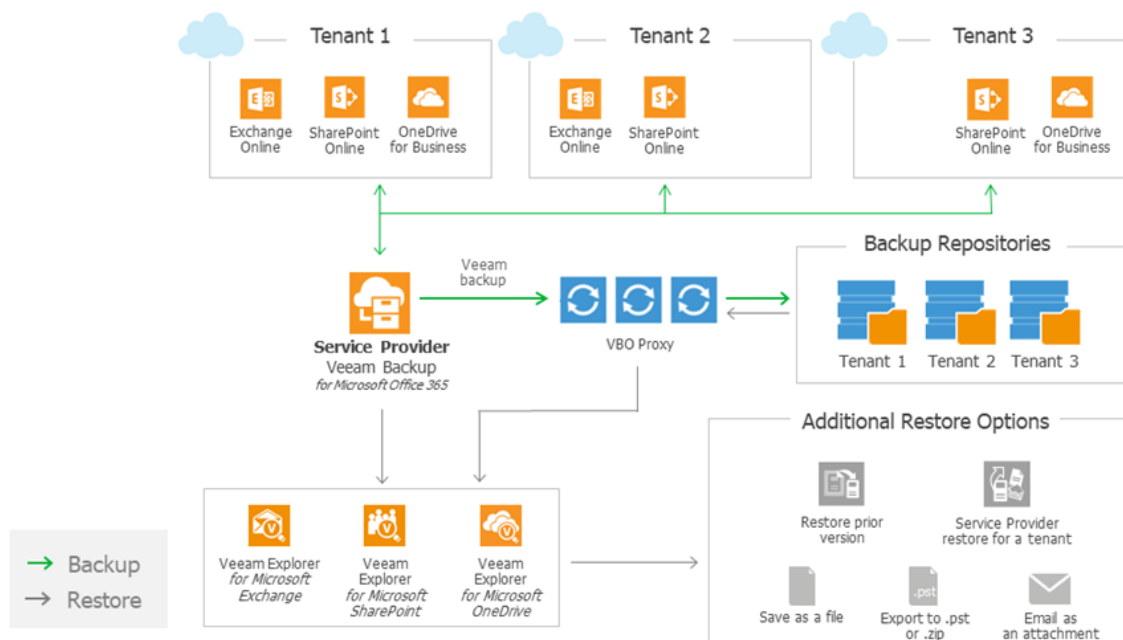

a backup provides extended accessible retention stored in one place for easy recovery.

Internal/External security threats

With the high numbers of threats, a backup solution mitigates the risk of losing critical data.

Legal and compliance requirements

A backup solution ensures companies the possibility to retrieve data whenever required.
