

GO2AZURE ASSESSMENT

ASSESS YOUR CLOUD READINESS AND COMPATIBILITY

WHAT IS GO2AZURE ASSESSMENT?

Our Go2Azure Assessment helps you develop a sound feasibility study for migrating your IT infrastructure and applications landscape to the cloud. It evaluates cloud readiness of your environment, advises on migration strategy and roadmap, and provides insights into financial aspects of migration project.

WHAT WILL WE DELIVER?

IT ENVIRONMENT ANALYSIS

- Environment assessment
- Network flow analysis
- Application dependency map
- Cloud compatibility score
- Application portability and re-architecture / re-deployment assessment

BUSINESS CASE AND GUIDANCE

- Cloud migration feasibility analysis
- TCO calculation
- License cost estimations
- Cloud comparison
- Business case for cloud migration
- Migration plan

HOW WE WORK WITH YOU?

The assessment will be conducted with RapidAdopt™, an industry leading non-intrusive and easy to install tool that is compliant with applicable information security and privacy regulations. It will scan your infrastructure and application landscape, and create assessment report bringing out network flow analysis, dependencies among applications and workload patterns. Each system and application will be scored on its readiness to be moved to Azure cloud, and potential remediations will be indicated. Our cloud experts will further analyze, and fine tune gathered information to prepare detailed assessment report. It will advise on migration strategies and financial aspects of the migration and projected costs of new cloud environment. Finally, we will help you develop a solid feasibility study for migrating your IT infrastructure to the cloud. If you have 250+ servers and have purchased the Gold plan, we will also have a Tech Expert for your disposal to carry out the assessment at your site.

BUSINESS BENEFITS

Our Go2Azure Assessment helps large enterprises systematically adopt cloud technologies.

It collaboratively supports CIOs to find the answers to critical questions, such as:

- Can I leverage cloud to enhance IT value?
- Which IT components are suitable for cloud?
- What kind of cloud is suitable for my organization?
- How do I manage and govern my cloud portfolio?
- What would be my costs and ROI using cloud?
