
Microsoft Azure Expertise in Healthcare

Vicert's domain
competencies enable
customer success in
building healthcare solutions

Journey to Health Cloud

As healthcare solutions continue migrating to the cloud, new challenges and opportunities arise for organizations.

Over the years Vicert has shown deep technical expertise and enabled customer success in building healthcare solutions on Azure that securely store, process, transmit, and analyze clinical information.

Partnership with Vicert comes with fast access to health cloud solutions and skills in spaces like FHIR and HL7, and HIPAA compliance.

Azure know-how

Our team is always on a mission to find the best ways to help clients deploy innovative and secure healthcare solutions in the cloud.

Azure technologies rely on the most advanced services to offer flexibility, automation, and the much-needed personalization in the medical landscape.

The services can be successfully applied to a number of different organizations - from start-ups to enterprises, from payers to providers and product companies.

Our solution architects are able to create an optimal blueprint for cloud infrastructure.

Deep Domain Expertise

- **Health Cloud Solutions**
Leveraging Amazon, Microsoft, Google, Apple and other healthcare APIs.
- **Patient Engagement and Portals**
For patients, providers, brokers, employers.
- **Telehealth, Remote Patient Monitoring, and Medical Devices**
From cutting-edge vitals dashboards to patient portals with an integrated knowledge base and care-management services complete with EHR integration.
- **Interoperability and Data Quality Management**
Migrating data between EHRs, building secure apps on top of FHIR, creating systems that can talk to other systems. Claims management, eligibility, EDI and ETL Systems, etc.
- **Clinical Decision Support Systems**
Better clinical results through improved patient data collection, exchange, analysis, and presentation.

Health Cloud Knowledge

With more than 300 health tech solutions delivered over the past 20 years, our deep expertise in software development and digital health allows us to provide one of the best ROIs in the industry.

We have competence to build on these Health Cloud platforms:

- Amazon Comprehend Medical, AWS IoT
- Microsoft Cloud for Healthcare (Azure API for FHIR, Azure IoT Connector for FHIR)
- Google Healthcare API (FHIR, HL7, DICOM, De-identification)

Health Tech Skills

Other expertise extends to many other technologies, platforms and standards:

- NextGen Connect (Mirth Engine)
- SMART on FHIR
- FHIR / HL7 / EDI
- Redox, HumanAPI
- HIPAA compliant messaging
- EHR API's / EHR Integrations
- Iguana, SureScripts
- Validic, native BT and other wearable API's
- HealthKit, CareKit, Google Fit
