Double-Up Cloud Migration

Why Migrate with VOLO?

Business Motivations

- Increased Agility
- Cost optimization
- Scaling to market and geographic demand
- Improvement of customer experience and engagement
- Transformation of products or services

Technical Motivations

- Improved Scalability
- Enhanced security and compliance
- Preparing and building new technical capabilities
- High availability and disposability
- Capacity optimization

Our Approach

▼ Strategic Inputs

– Evaluation of business motivations and justifications for the migration

– Setting desired business outcomes of migration

▼ Tactical Inputs

– Digital estate rationalization

– Organization alignment and skills' readiness assessment

▼ Technical Inputs

– Migration's technical roadmap design – Rehost, Refactor, Rearchitect or Rebuild

– Technical briefing, assessment, proof of concept and implementation

Migration Layers

01 Compute Infrastructure	05 Line of Business Systems
02 Storage Infrastructure	06 Middleware
03 Networking	07 Identity Systems
04 Databases and Analytics	08 Management Tools

Process in Each Layer

- Assessment
- Planning
- Proof of Concept
- Implementation
- Documentation and Workshop

Deliverables

Proof of concept	Implementation
Documentation of existing systems	Migration timeline and backlog
Migration Roadmap	Architecture
Integration Dependencies	Cost Analysis
