

Lingaro is a disruptive innovator focused on data-driven enterprise transformation.

We are professional services company helping clients succeed in the data-driven world.

Solutions

We design, implement and support the best solutions based on client needs and market trends

Data Warehouse

Data Lake

Internet of Things

Big Data

Intelligent Automation

AI & Machine Learning

Visual Analytics & Data Discovery

Enterprise Reporting

User Experience

eCommerce

Tailor-made Apps

Lingaro is a disruptive innovator focused on data-driven enterprise transformation

We offer **proven track of successful implementations**

We deliver **solutions tailored towards actual customer needs**

With Lingaro you get the best of both worlds

The **innovative, agile execution** of a successful start-up

The **scale-up capabilities** of a large company

100,000+

Satisfied business users

1800+

Implementations

800+

Employees on 3 continents

14

Nationalities, in a multicultural environment

11

Years of successful service

Lingaro partnerships with Microsoft & Oracle

Microsoft Poland has recognized us as one of their top partners demonstrating **excellence in innovation and implementation of customer solutions** based on Microsoft technology

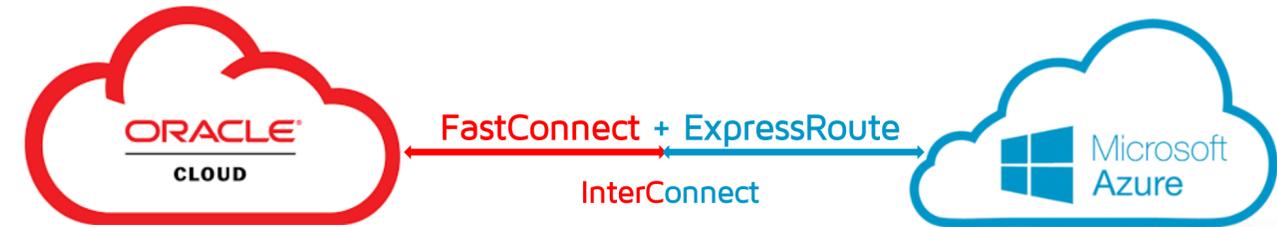

Oracle and Lingaro are driving various **joined initiatives** to strength **technical excellence** and **innovative business solutions** based on Oracle Cloud technologies

Lingaro expertise in Multicloud Oracle & Azure space

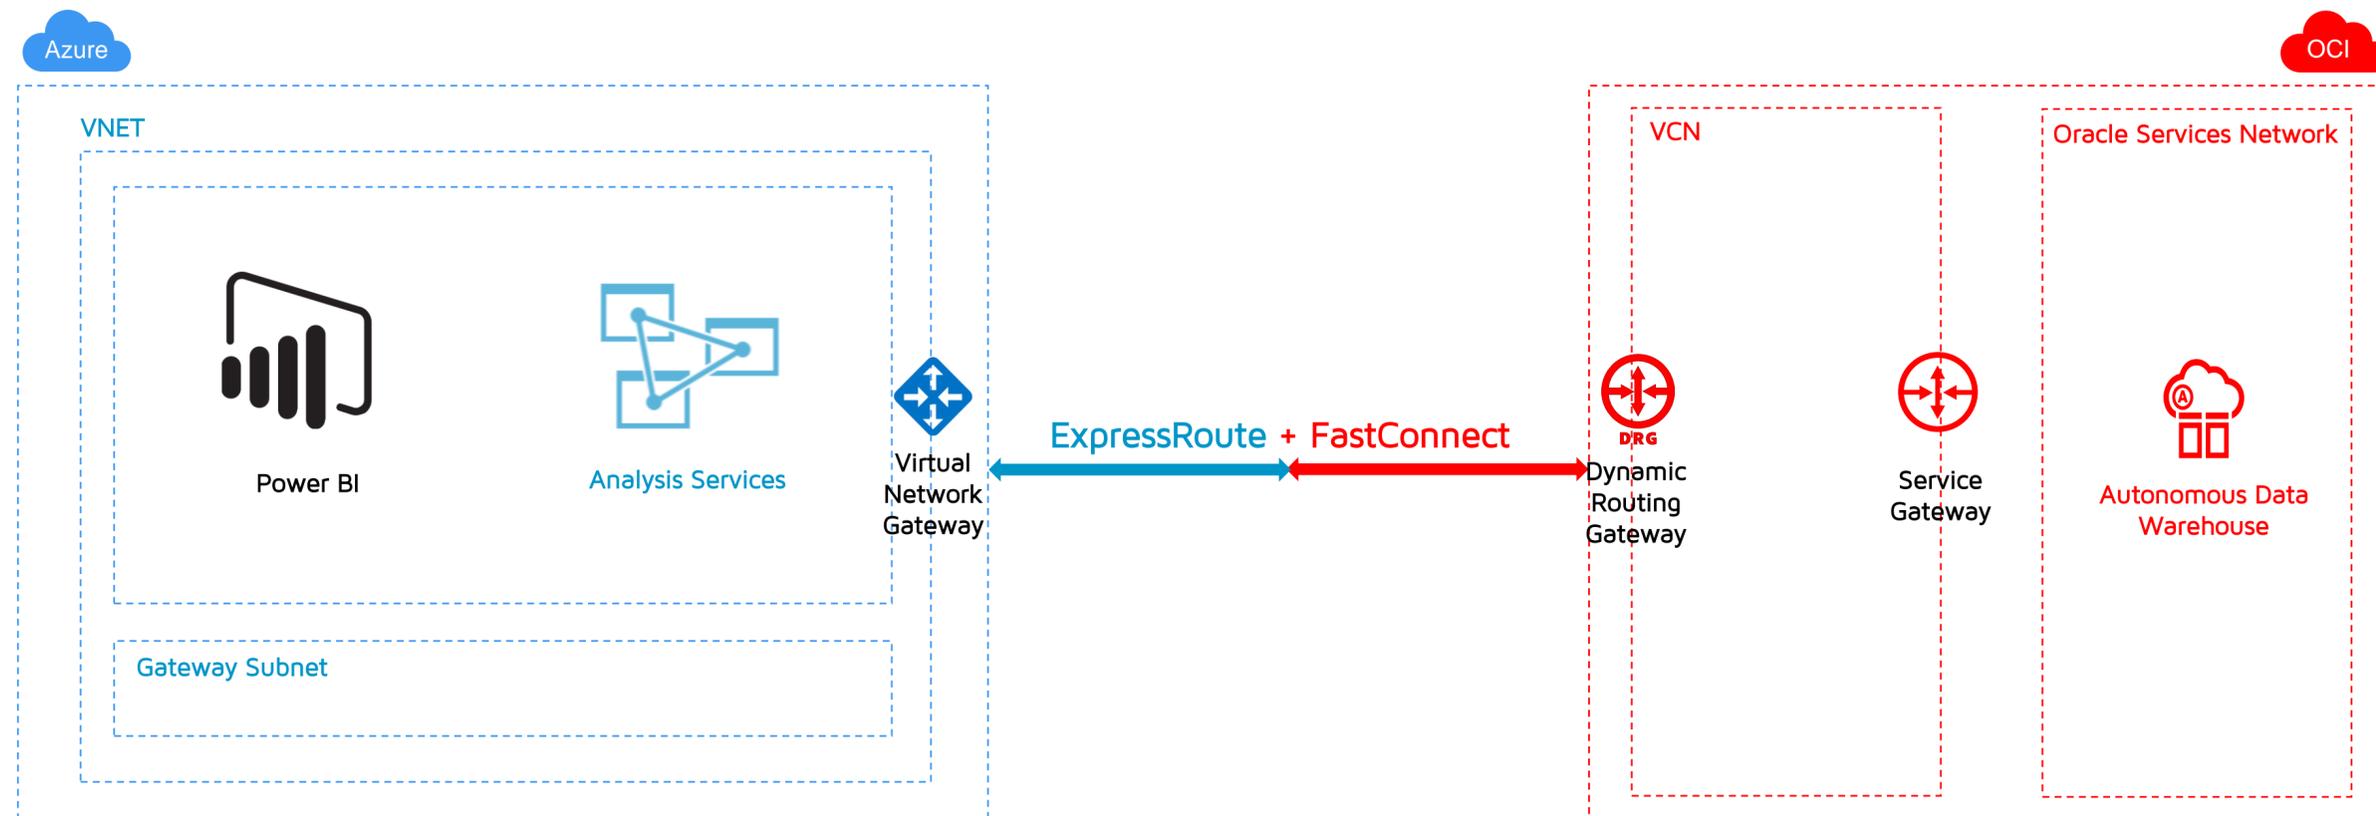

Azure reporting architecture based on Oracle data sources

We have experience in setting direct connection (InterConnect) between Microsoft Azure and Oracle Cloud, based on which we build complete Multicloud solutions.

Experience in building Oracle/Azure Multicloud solutions

Lingaro legitimates with practical expertise in building Multicloud solutions with Power BI & Analysis Services in Azure reporting data sourced with Oracle Autonomous Data Warehouse in OCI.

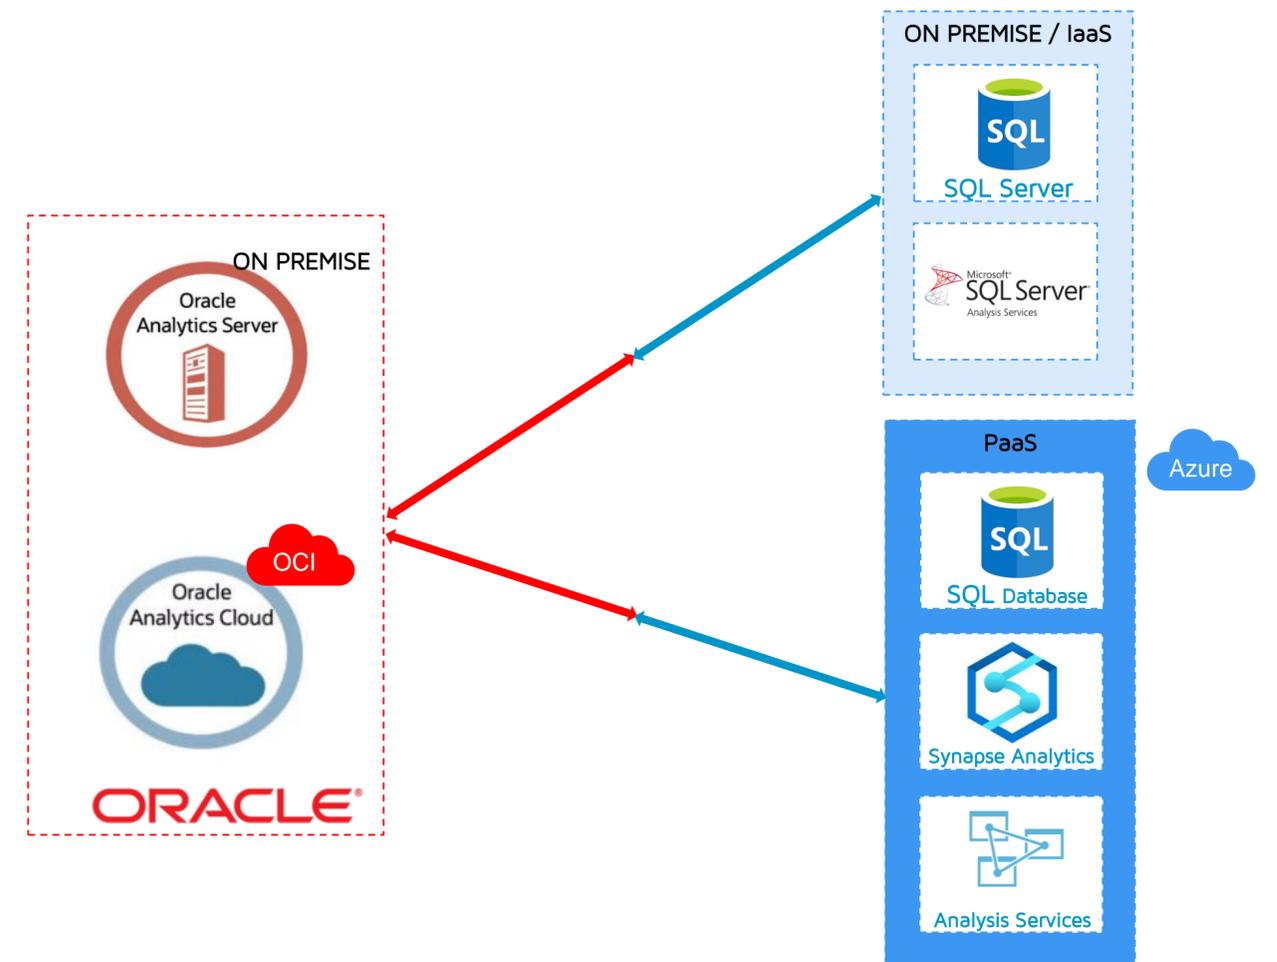

Lingaro expertise in Multicloud Oracle & Azure space

Possible Oracle Analytics Cloud or Server reporting architecture based on various data sources in Microsoft Cloud Azure or Microsoft on-premise

Lingaro builds Oracle Analytics Cloud or Server reporting solutions based on various data sources residing in Microsoft Azure or Microsoft On Premise environments.

We recommend additional feasibility assessment (POC) to reflect client environment setup and requirements, especially for solutions with data sources based on PaaS technologies (Platform as a Service). This approach will secure stable and well performing final architecture, especially in frequently changing cloud offering.

Reporting in Oracle solutions:
OAC (Cloud) / OAS (ON PREMISE)

Data Source in Microsoft solutions:
ON PREMISE / IAAS / PAAS
(CLOUD/AZURE)
