Managing Compliance with Microsoft

Meet Complex Compliance Obligations

Microsoft's compliance solutions help meet complex compliance obligations, including ISO 27001, ISO 27018, NIST 800-53, HIPAA and Data Privacy.

Simplify your Compliance Journey

Microsoft Purview Compliance Manager helps organizations simplify compliance by offering pre-built assessments for common compliance standards, custom assessments to meet your organization's specific compliance needs, suggested improvements to reach compliancy, the risk-based score for your organization to understand your current compliance posture.

Understand your Compliance Progress

Compliance Manager awards you points for completing improvement actions taken to comply with a regulation, standard, or policy, and combines those points into an overall compliance score. Your compliance score can help prioritize which action to focus on to improve your overall compliance posture.

Comply with Common Industry Regulations

Microsoft's compliance solutions help most common compliance standards and industries including HIPAA for health care organizations, PCI-DSS for organizations that handle or process credit card information, Sarbanes-Oxley or Gramm-Leach-Bliley for organizations that handle financial information and CCPA for organizations processing information on California residents

Protiviti's Microsoft Compliance Solutions

Organizations are often in different stages in their Compliance Journey. In partnership with Microsoft, Protiviti has designed a modular system where clients can select the optimal offerings to meet their specific Compliance needs to provide the greatest benefit. Whether your organization needs a workshop, template creation, deployment or continuous monitoring, our Microsoft Compliance experts have you covered.

Microsoft Compliance Solutions

Leveraging Microsoft to Meet Your Compliance Needs

Microsoft Purview Information Protection

Microsoft Purview Information Protection provides a comprehensive set of capabilities to help your organization protect sensitive data throughout its entire lifecycle – across devices, apps, cloud services, on-premises.
