

Wipro's Unified Endpoint Migration Solution to Intune

3-Touch Migration to Microsoft Intune

Manual Migration – Right way to go?

Enterprises are transitioning from legacy platforms to Microsoft Intune in order to guarantee secure access to corporate data through BYOD.

Consequently, they are seeking an efficient solution that can effectively migrate their endpoints to Microsoft Intune across the entire estate while addressing their hurdles associated with the current migration process

Manual Migration of 000's of users takes months to complete with limited visibility to the users

Efforts in migrating the users to updated platform with best user experience

Core business activities get affected due to prolonged technology migration

Inconsistent migration process due to lack of roll-out management

Wipro's Unified Endpoint Migration Solution
