Strategize & Plan your Data Estate Modernization Journey with Invero

Our **Data Strategy & Roadmap solution** sets your organization up to modernize its data estate and prepare for AI/ML capabilities.

The solution combines on-site workshops with analysis and best practices to assist in designing your future state roadmap for moving your data estate to the Microsoft Azure cloud.

Solution Deliverables

Driving Digital Performance.

The Data Strategy & Roadmap solution results in a comprehensive report that includes:

✦ **Strategic Analysis & Cost Estimates**

Detailed analysis of your current Data Estate and future Azure environment considerations

✦ **Business Justification Development**

Business motivations, value, and ROI informed by requirements gathered through the workshops

✦ **Insights**

Architecture, Strategy, Governance & Best Practice recommendations for data estate modernization

✦ **Prioritized Cloud Roadmap**

Prioritization of Workload, Data and Application migrations to the Azure Cloud

Our Process

A proven formula.

Step 1: Kickoff

Our Azure Consultants and Microsoft Specialists outline the engagement goals, timeline and roles and responsibilities

Step 2: Data Estate Review

We work with your current data specialists as well as Microsoft to analyze and rationalize your current and future data estate needs

Step 3: Workshops & Interviews

Stakeholder Interviews and a collaborative workshop, to define business motivations, use cases, value, and the “Art of the Possible”

Step 4: Analysis

Our Azure Consultants take the knowledge gained through the workshops to document the findings

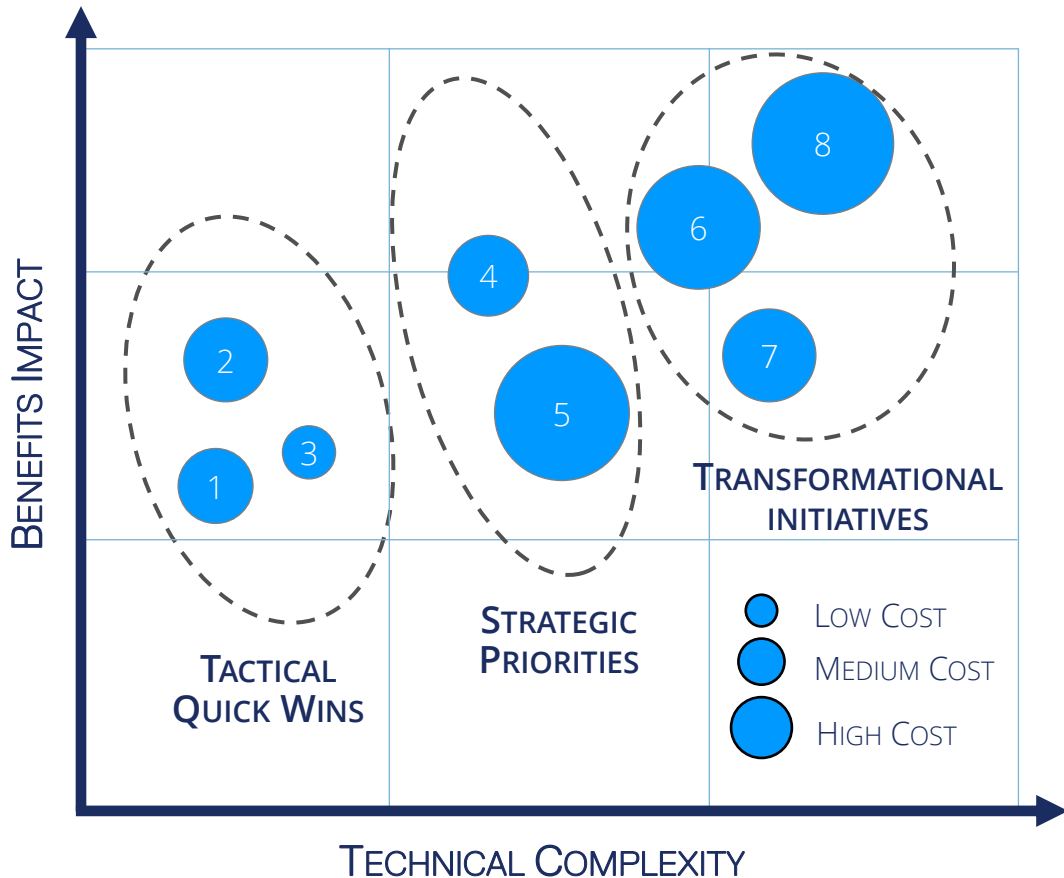

Step 5: Report Presentation

We present and provide a customized report that details your company’s unique Data Strategy & Roadmap for a successful and accelerated data estate modernization initiative

Report Samples

Initiative Prioritization.
