Better Together Data Governance

*Complete Data Governance With
Microsoft Purview and Ataccama ONE*

Building a culture of data and analytics requires accurate and actionable enterprise information. To move their data-driven mission forward, organizations must enable an integrated data governance plan, promoting trusted and actionable data for pervasive analytics.

Together Microsoft Purview and Ataccama ONE offer businesses the complete data governance journey. They integrate Data Discovery & Profiling, Data Catalog & Business Glossary, Data Quality Management, Master & Reference Data Management, Policy Management and Data Integration to provide robust capabilities to support data governance functions for Data Owners, Data Stewards and Data Consumers in Azure.

Integrated Data Governance Capabilities

Together Ataccama and Azure Purview offer businesses:

- Data Catalog
- Data Discovery
- Data Profiling
- Business Glossary
- Business Rule Library
- Data Classification
- Policy Management
- Data Lineage
- Data Quality Validation
- Data Quality Cleansing
- Exceptions Management
- Master Data Management
- Reference Data Management
- Data Integration
- Self Service Data Preparation
- AI/ML Capabilities
- Data Marketplace
- Workflows and Orchestration

Best-In-Class Implementation

Adastra will install and configure an end-to-end Data Governance solution in Azure, leveraging a proven set of Governance best practices and accelerators to seamlessly deploy Azure Purview and Ataccama ONE in your Cloud environment.

Adastra Partner Profile

Adastra is Microsoft's 2019 and 2020 Commercial Enterprise Partner of The Year and a Representative Vendor in Gartner's Market Guide for MDM External Service Providers for three years running.

Since 2000, Adastra has been helping global organizations accelerate innovation with Data and Analytics. Working together with Microsoft and Ataccama, Adastra has delivered Data Governance on Azure at mid-sized businesses and Enterprises, across industry verticals. They have developed a proven set of patterns and connectors to ensure Ataccama and Purview work seamlessly in Azure.

# Better Together Data Governance Benefits

| Understood	Trusted	Mastered	Actionable	Secure	Clean
