

READINESS ASSESSMENT

+++++

Microsoft's Azure cloud services provide organisations with the flexibility, scalability, and control they need, all while potentially saving them significant costs by eliminating the need to maintain physical assets. However, it can be challenging to identify which workloads are best suited for migration, and which ones may pose a risk.

Unlock the full potential of Microsoft Azure and optimise your business operations with QuoStar's Azure Readiness Assessment.

WHAT WE REVIEW

A comprehensive three-day workshop designed to help you maximise the potential of Microsoft Azure.

Understanding Current Challenges

- ✦ Consult with an expert Azure Consultant either onsite or remotely
- ✦ Gain a deep understanding of your business goals & requirements

Applications & Architecture

- ✦ Review applications to identify which ones are Azure cloud-ready, which ones should remain as they are, and which ones should migrate to vendor SaaS options
- ✦ Analyse architecture to identify potential consolidation opportunities and assess which workloads are eligible for migration
- ✦ Mapping exercise of workloads to the respective Azure platform and migration path
- ✦ Identify performance bottlenecks and associated risks

Business Objective Mapping

- ✦ Aligning Azure infrastructure for security and business continuity
- ✦ Mapping Azure infrastructure for disaster recovery
- ✦ Ensuring compliance with data sovereignty regulations
- ✦ Evaluating costs for Azure infrastructure

WHAT YOU GET

Initiation Meeting

Understanding business objectives and application landscape.

Dedicated Consultant

Our consultant provides a summary of resources, including feasibility, compatibility, risk assessment, migration path, and cost evaluation, guiding you to identify the best Azure services and create a customised plan to meet your unique needs.

Report

Our team will present you with a clear and bespoke report aligned to your business goals, complete with actionable recommendations

Conduct a post-audit review meeting with an aligned QuoStar consultant to gain further clarity on the report's details and get your questions answered.
