

# Microsoft 365 Copilot Assessment with Cloud Intel

If you want to improve your organization's productivity by using Microsoft Copilot, Click2Cloud can help.

## Leverage the power of M 365 Copilot and unlock your business's full potential!

Cloud Intel's Microsoft Copilot Assessment evaluates your existing productivity environment and identifies gaps to ensure readiness to utilize Copilot offerings fully. We provide **AI-based recommendations** for configuration changes prior to implementation and a detailed **roadmap crafted** from the assessment to facilitate the organizations journey to fully utilize Copilot.

**During this assessment, we review your data governance policies and ensure your data is safe, secure, and ready for your Copilot deployment.**

As part of our assessment, we show you how Copilot can benefit your organization with real-time use cases and provide an actionable plan for achieving Copilot readiness.

Our aim is to help you drive your organizational productivity and efficiency and **accelerate data-driven decision-making** ability through Microsoft's Co-Pilot and Azure.

## Assessment Scope

- ✓ Check the compatibility of your IT infrastructure with Copilot
- ✓ A strategic guide or roadmap to ensure a smooth transition
- ✓ Safeguard sensitive data and prevent unauthorized access
- ✓ Benefit analysis (practical benefits of Copilot)
- ✓ Migration strategy
- ✓ Business value analysis
- ✓ Financial analysis (current & future TCO comparisons)
- ✓ Detailed report / executive summary
- ✓ Clear next steps

Cloud Intel's Microsoft Copilot Assessment provides step-by-step guidance to maximize the utilization of Copilot. It also provides insights on necessary changes to your current productivity setup, including Office 365 configuration and policies.
