Modernizing Public Sector Through Dynamics 365

ABOUT ELLIPSE SOLUTIONS:

Ellipse Solutions is a Microsoft Dynamics 365 Gold Partner specializing in implementation, managed services and training. Our proven track record for delivering a quick hitting and lasting ROI is a perfect match for Public Sector agencies.

What our customers are saying

"Ellipse could not have facilitated a smoother implementation. Even with the significant move from our legacy system and legacy procedures, go-live was a non-event."

*– Maggie Garrison, Vice President & Corporate Controller,
Kentucky Lottery Corporation*

WHAT WE OFFER

Dynamics 365, with the expertise of Ellipse Solutions, enables local, regional, and state agencies and public sector organizations to bring their operations up to the modern digital standard quickly through our blended implementation methodology. Our team works closely with your organization to move processes from time-consuming legacy solutions to the Microsoft Cloud. Ellipse Solutions and Dynamics 365 helps Public Sector agencies succeed in keeping a diverse pool of stakeholders (citizens, employees, etc.) engaged and connected, pulling together data previously scattered across multiple systems, and managing cases & service orders in real-time.

Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with existing systems to allow organizations to digitally transform their business practices. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process. Empower your people, in the field and in your facilities, by supplying solutions that enable their work without suffocating them with mundane and unrelated tasks.

Unified data and processes

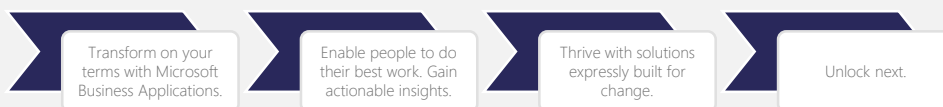

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network. Double entry and manual processes create errors and obstruct a true overall view of your organization.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business practices, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.

Key use cases

Citizen Response

Respond to changing citizens' needs with a flexible platform to rapidly communicate and ensure timely, useful resolution. Enabling self-service options to increase citizen satisfaction.

Services

Solutions connected on a single platform allows more rapid visibility into field services' response and resolution times with measurable results, allowing real-time resource management

Finance and compliance

Our cloud-based solution not only offers world-class data security, but is less expensive to deploy than traditional on-site solutions. This single data set reduces the complexity of reporting and real-time intelligence.

Talent and collaboration

Extend your virtual and on-site teams and coordinate faster with a consolidated view of team members, activities, responsibilities, and human resources data. Empower your employees with modern self-serve applications and portals.
