Maximise the value of Teams by integrating
apps and workflows tailored to your business needs

Collaborative Apps

Hybrid work transformed the way many of us run our businesses, with leaders working tirelessly to ensure their people could remain productive while logging in virtually. Even though hybrid work is our new reality, many employees are still jumping between disparate tools to get their work done. Constant app switching reduces performance, divides attention, and even lowers overall employee engagement.

We can help!

Introducing the Collaborative Apps Workshop – a modular engagement to understand your unique business goals, workflows, and tools, and then help create a vision for one central hub for all your work in Microsoft Teams!

The workshop is designed to guide you through the process of extending and customizing your Teams workspace by adding and connecting all the apps your people need to collaborate.

Whatever your business needs, an app in Teams can help

Get started fast with a over 1,000 ready-to-use, easy to connect apps available in the Teams App Store.

Accelerate business outcomes by using low-code solutions, or building a custom app tailored to your needs.

Stay secure as applications, data, and communications are protected across Microsoft and partner services.

Workshop deliverables

- An identification of pain points and challenges to understand your business needs and goals.

- An envisioning The 'Art of the Possible' for Collaborative Apps – a combination of presentations and immersive experiences designed to showcase 1st and 3rd party apps.

- An exploration of personas and their concerns, finalized by solution ideation

- A prioritized, actionable plan to quickly address your Information Worker needs by implementing 1st/3rd party apps or building low code or custom solutions.

- A solid plan to work with you to drive pilot or proof of concept, to prove the ROI
