

EncompaaS helps you to:

- ✓ Seamlessly and compliantly manage M365 content including Teams and chat.
- ✓ Know where compliance exposure exists so you can take action to remediate.
- ✓ Retire legacy systems and shared drives to reduce cost and compliance risk.
- ✓ Rapidly respond to regulatory and business change with dashboards and centralised policy.
- ✓ Enable your teams with real-time business insights and federated search.
- ✓ Leverage and benefit from continuous information governance innovation via SaaS and never be on an outdated version of software again.

Move to an enterprise compliance platform that delivers better business outcomes

EncompaaS will make it easier to activate your information governance strategy by addressing and balancing the needs of users, regulators and the business.

- Provide a better experience for users - liberate them by removing records management tasks
- Improve overall compliance state with AI, Machine Learning, and automation
- Unlock valuable information insights for better decisions that move your organisation forward.

About EncompaaS

Our international team specialise in regulated sectors, including government, financial services, and pharmaceuticals.

We have a heritage of 20+ years helping organisations manage information, risk, productivity and compliance.

By leveraging people, process, and technology, we solve the challenges organisations are facing right now, without the legacy thinking.

EncompaaS has been approved by Microsoft to run on **Azure** and is available in **AppSource**, the **Azure Marketplace**.

If you would like to drive more value from your investment in Content Manager, remove the complexity of managing multiple instances and transition to a modern manage-in-place solution talk to us.
