Modern Data Warehouse on Azure
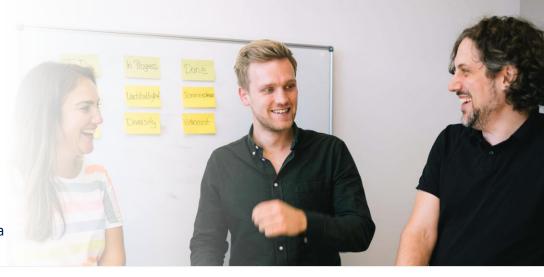

Discover insights across all your data

Easily integrate your data at any scale and rapidly generate valuable information.
Improve the performance of your data solutions and provide advanced analytics capabilities to everyone.

The Modern Data Warehouse on Azure brings together traditional data warehousing and Big Data analytics. It encompasses fully-managed products and services for the ingestion, storage, preparation, and provisioning of your data, enabling Business Intelligence and Machine Learning use cases alike.

Future-proof and solid solutions

inovex is your partner, from vision to production:

- Years of experience as a Microsoft Gold Partner for Data Analytics, Data Platform, and Cloud Platform

- Technological excellence based on high invest in R&D

- Robust productive environments through scalable architecture and automated deployments

Time to value

- Lift-and-shift migration into the Azure cloud

- Start small and easily scale your solutions

- Generate early results and advancements quickly

Create meaningful solutions with minimal effort

Enhanced data collaboration

- Unify data warehousing, big data, and AI tasks

- Give the right data and tools to everyone

- Gain fast insights across all your data sources

Get the most out of your data

Integrated solutions

- Create end-to-end data analytics solutions

- Cover your application lifecycle with Azure DevOps

- Provide interactive visualizations using Power BI

Enjoy a smooth project development experience

"We were impressed with inovex' achievements after such a short time. They are skilled, solution-oriented, up-to-date and technologically cutting-edge."

- Dr. Johann Kempe, Leiter Technologie und Business Development, Member of the Executive Board, C.H. Beck Verlag
