

Massive IoT Focused Digital Transformation

Know what your assets are doing

1 A Platform built to support any use case at any scale.

From simple to complex, from your first sensor to Massive IoT. By processing millions of data points a second, Thinaer drives Massive IoT Digital Transformation by providing real-time asset tracking, machine health and usage monitoring, and supply chain part pedigree insights through its easy-to-use web and mobile application.

2 Massive IoT Solutions

Thinaer is trusted by leading organizations in **manufacturing, aerospace & defense, retail,** and **consumer packaged goods.**

Take your next step towards Massive IoT focused Digital Transformation. Intelligent solutions to know what your assets are doing - It's as easy as tagging your assets with sensors and installing Thinaer technology.

Real Time Asset Tracking

Track any asset or inventory, know the location within your facility, and see past movement.

Environmental Monitoring

Monitor temperature and humidity in real-time and alert personnel of sub-optimal conditions.

Machine Health & Utilization

Know when equipment is being used and compare runs to understand machine health.

3 Outcomes

\$30M over 36mo ROI

Eliminating stock repurchases and cycle counting

15% reduction in equipment downtime

Monitoring machine health with Thinaer
