

Power Apps Consulting Services

Create highly interactive corporate applications quickly to modernize your business procedures

Solve business challenges by building custom applications using Azure Functions and custom connectors. You can develop responsive mobile apps with our power apps developers that operate on iOS, Android, Windows, and other platforms to enhance digitization and store your data within an integrated environment.

We automate corporate operations and digitize workflows with reliable apps. Power Apps is a suite of apps, connectors, services, and data platforms that offers the fastest application development environment to develop custom apps for all business purposes.

Xekera PowerApps experts will walk companies via analysis, design, development, testing all the way to implementation.

We Offer:

1. Consulting

Xekera PowerApps consulting includes an analysis of our client's current business processes and the identification of gaps that may exist. We ensure that companies benefit from digitization when their legacy applications are modernized by us.

2. Training

At Xekera we train business users using hands-on sessions for model-driven and canvas-driven apps within a day. Our trainees gain skills on how to build apps on PowerApps platform without coding and limited assistance from IT experts.

3. Implementation

By using PowerApps, Xekera ensures that our clients' needs are met on time and within budget. Xekera is fully capable of implementing and deploying PowerApps solutions by analyzing the requirements of our clients.

4. Integration

Xekera helps companies implement mobile front-end interfaces by using custom connectors and system integrators designed to speed the deployment of legacy systems like Oracle, SAP, and others.

Xekera is your partner in Microsoft Power Platform consulting

Using Microsoft 365 (formerly Office 365), you can develop apps, automate processes, engage in conversation, and analyze data. Within the same suite, there is the Power Platform, an advanced business solution suite with innovative tools. Xekera Microsoft Power Platform experts provide professional services for:

- Power Apps
- Power Automate
- Power Virtual Agent
- Power BI

We offer integration services for PowerApps that boost employee collaboration and productivity

1. Salesforce

Xekera PowerApps integration makes it easy for sales and marketing teams to access information related to products on the go.

2. SharePoint

Xekera facilitates clients' adoption of PowerApps by helping them integrate them with their SharePoint platforms, enabling them to enjoy benefits such as increased employee collaboration

3. Ariba

Xekera provides integration services for PowerApps and SAP Ariba in order to implement easy access to contracts, invoices, and vendor onboarding status in order to help companies maximize their procurement processes.

4. ServiceNow

PowerApps helps Xekera clients build many mobile features including ticketing, incident tracking, and improving customer service operations with ServiceNow.

5. SAP

By integrating PowerApps with SAP, Xekera helps businesses monitor their business processes to improve inventory management and visibility into warehouse activities.

6. Legacy Systems

The experts at Xekera help clients to integrate PowerApps with legacy applications to automate functions like migrating forms, validating data, and streamlining workflows.

PowerApps Proof of Concept Program

Step 1 – PowerApps consulting

Using PowerApps can improve the success of any business. That's why we offer our clients a PowerApps Proof of Concept program. Initially, we talk with our customers about how we can streamline some processes by leveraging PowerApps.

- We review our clients' current business processes and learning how to use Microsoft PowerApps
- We identify use cases that our clients would like to tackle based on an understanding of their business process

Step 2 – Creating business applications

Using PowerApps, we help our clients create a user-friendly and fully functional application to enhance their business processes. We work with our clients to customize and meet their specific needs and preferences so that they can transform how they do business.

- Setting up PowerApps user interfaces and UX in clients' environments
- Creating and integrating business process workflows with PowerApps

Step 3 – Handover and training

The final step involves testing the end-to-end solution and making any necessary improvements. The client's teams will then be trained on how to develop business applications using PowerApps, as well as how to connect SharePoint and OneDrive data.

- Final walk-through and planning of future steps following testing and training
- Analyzing our client's future digital transformation requirements and the scope of our solution

Major benefits of building apps with PowerApps

With our PowerApps integration services, employees can collaborate more effectively and be more productive. PowerApps offer several benefits.

- ✓ LOB Connector

- ✓ Data Source Independent
- ✓ Process Automation
- ✓ Quick Turn around
- ✓ Easy maintenance
- ✓ Improved security

Why choose us

Xekera provides businesses around the world with the ability to build apps quickly by implementing the best industry standards. With our PowerApps consulting services, businesses can develop custom applications at many levels to meet their functional requirements. Experts from our Microsoft team are fully equipped to assist businesses with a variety of complexities by delivering effective solutions.
