

Application Modernization:

Deliver enhanced application and data experiences even faster

Get your business time-to-market and customer experiences boosted by modernizing your applications to meet the modern needs such as agility, scalability, responsiveness, high availability, reachability and more.

What App-Modernization may mean for your organization

Lift and Shift

- No re-architect or new code
- Least effort for quick migration
- Supported on the least common denominator

Cloud Optimized

- No re-architect or new code
- Increased density & lower deployment cost
- Improved productivity and DevOps agility
- Portability of apps and dependencies
- High availability with Orchestrators

Application Modernization

- Optimized for long term agility
- Optimized for scale and high availability
- Modern Architecture with Microservices

Modernization Tools and Services

Your Path to Modernization

LiveRoute provide a four-phase approach to modernize your business applications:

ASSESS & DISCOVER

PLAN & DECIDE

MIGRATE

OPTIMIZE

Gather accurate data from your IT environment

- Get real-time details on your application environment
- Understand your application estate

Determine what changes are top priority

- Review data to align business strategy and objectives
- Identify and select prioritized applications

Develop a roadmap for your organization's cloud journey

- Analyze the cost of migration to the cloud
- Create a comprehensive modernization strategy to a production-ready PaaS solution

Measure your progress

- Track and achieve milestones using custom migration plans
- Establish a utilization baseline for assessing progress over time

Database Modernization

Web Application Modernization

DevOps Practice Modernization

Modernization to Microservices

Modernization to Serverless Platform

Modernization to Platform as a Service

Why LiveRoute?

LiveRoute is the leading cloud services provider and Azure partner of choice for companies across world. With years of industry experience and excellent expertise, we help enterprises stay a step ahead in their cloud migration journey.

LiveRoute work as an extension to your team to help you in assessment, developing suitable cloud migration strategy, enabling Azure and end-to-end migration of mission critical instances onto Azure. We ensure the best practices, compliance and security in design across SAP and Azure.
