Specialists in Microsoft Azure

Our Azure Starter pack gives you a cloud technology foundation to build upon, while enabling and accelerating your optimized usage of Microsoft Azure.

The technical considerations and design recommendations might lead to different trade-offs, and are based on your goals and desires. While some variation is expected, the core guidance that we provide you with will allow your company to scale sustainably and cost-effectively, while enjoying Azure architecture advice that is modular by design.

This project includes:

- Educational workshop
- The foundation of Azure Landing Zones
- Governance and documentation
- Subscription design and access/permission
- Guidance for sustainable scaling
- Technical and design recommendations
- Delivery of Azure Landing Zones
- Post-completion evaluation of the project

Project roadmap:

1. (Free)

Educational Workshop (1-2h)

We'll explain migration and Azure Landing Zones in detail, including examples of why you want to use it and how it will benefit you on your cloud-based journey.

2. (Fixed price or sponsored*)

Scope of Work Planning

Our team provides you with detailed guidance for project management, a timeline, a list of the deliverables, and information on all project-specific activities.

3. (Fixed price or sponsored*)

The Starter Pack Delivery

We deliver according to the pre-determined scope of work, which will include all requirements, requests, and agreed-upon goals.

4. (Fixed price or sponsored*)

Final Assessment & Evaluation

Upon final completion of the project, we provide you with a detailed assessment and evaluation.

*Sponsored by the **Azure Migration and Modernization Program from Microsoft**

redeploy

Specialists in Microsoft Azure

"When we needed help moving our services to Azure, it was obvious to choose a company with a niched specialty on Azure. The choice fell on Redeploy, which we haven't regretted since!

- Lars Bogren, CIO at Warner Bros
