Get the most from your digital transformation with a clear network vision and roadmap

Your network is the lifeblood of your business. But adopting emerging technologies throws up all sorts of challenges.

Our consulting experts can help you get a clear view of what you want to achieve, the options available to you and create a roadmap to help you get there.

Transformation is easier said than done – particularly when you're trying to merge legacy systems with new technology. But if you don't start making moves now you're going to find it increasingly difficult to adopt new ways of working.

To differentiate your business, you need to find ways to rapidly adapt to new digital trends and innovations, with a network model that can flex to meet changing business needs.

You also need a scalable connectivity model to support migrating applications to the cloud, while maintaining consistent policies and control across on-premise and cloud-based tools. At the same time you'll need to support mobile users with a seamless experience across your hybrid cloud platform, without taking your eye off new regulatory and compliance requirements.

It's a complex, ever changing set of challenges.

We'll help you map out a transformation path in line with your objectives and ambitions. And we'll make sure you get the most out of your existing equipment so you don't have to rip and replace the lot.

Make operations more agile and flexible

- be clear on the challenges you face and the business outcomes needed to address these
- adopt new technologies and models while preserving your existing network and investments
- understand how future network technologies can make your operations more agile and flexible
- transform and expand access to different applications while staying protected
- get the most from partnerships with providers and vendors.

BT

Maximising business value through network transformation

We'll help you get a better understanding of how to transform your network in a way that meets your needs for today and supports your future ambitions. We'll open up opportunities for smarter ways of working while minimising risk and keeping your critical assets secure too.

Our Network Consulting capabilities

What if you could have a clear future network vision and transformation roadmap to make your operations more agile and flexible?

Business Outcome Workshop
We'll help define the challenges you face and agree the target outcomes you want to achieve. It's a great starting point to begin the process of creating a digital network vision.

Network Transformation Plan & Business Case

We develop transformation plans and build the business case to move you to a next generation network architecture, based on your needs – for example, preserving your existing network investments, maintaining operations, adopting new technologies.

Network Operations Transformation

Better understand how future networks could improve your operations. We baseline the operations model and predict both the benefit and impact.

Data Security Impact Assessment

Security is central to any transformation, and we help you stay protected by working with your security team to assess the implications of any future network plans.

Service Provider and Vendor Optimisation

Simplify and optimise your relationships with vendors. We analyse provider agreements and performance in terms of cost, risk, control and experience.

Why choose BT?

We can draw on unrivalled network experience and expertise. Our global network supports some of the world's biggest and most successful organisations, from finance, banking and retail to government and the public sector.

- every day, we work with global multinational organisations across all industries to deliver **transformational** consulting
- our consultants have deep **insight** and **experience** in their chosen field
- we partner with 'best of breed' vendors to give technology choice, without being prescriptive
- our work is underpinned with a unique breadth of scope, reach and capability. We tap into a global team of around **17,000 experts**
- we provide a mix of **business and technical expertise**, enabling us to define and execute on a strategy
- we minimise risk and uncertainty with transition planning and proof of concepts to ensure a **smooth implementation**.
