

ELEVATE YOUR CYBERSECURITY JOURNEY

WITH ENDPOINT VISIBILITY AND
SIMPLICITY

WHO WE ARE

As the winner of Microsoft Canada's Security Impact Award, Difenda stands as the most trusted provider of Microsoft Security services. Difenda accelerates, performs, and validates your Microsoft Security technology, meeting you wherever you are on your cybersecurity journey to maximize your outcomes.

Microsoft Intelligent
Security Association

READY TO RECLAIM CONTROL AND SECURE YOUR DIGITAL LANDSCAPE?

YOUR JOURNEY STARTS HERE!

Our Defender for Endpoint Professional Security Services address the challenge of securing all your endpoints by leveraging your Microsoft investment, ensuring comprehensive protection across your network. We not only provide the solution but also equip your team with implementation instructions and customized configurations, enhancing visibility and simplifying your security infrastructure for streamlined management.

INTRODUCING DIFENDA: YOUR TRUSTED MICROSOFT SECURITY PARTNER

As the winner of Microsoft Canada's Security Impact Award, Difenda stands as the most trusted provider of Microsoft Security services. Only Difenda delivers true end-to-end security operations through professional and managed services focused on cybersecurity for where you are on your journey.

Difenda's professional services are designed to help you accelerate your cybersecurity journey. We assess risks, fortify defenses with your existing Microsoft Security technology, customize your detection and response processes, and ensure seamless compliance with industry and regulatory standards.

This eBook guides you through the stages of Difenda's Defender for Endpoint Professional Security Services, illuminating how you can heighten your security posture and broaden the scope of possibilities within your Microsoft Security investment.

DEFENDER FOR ENDPOINT OVERVIEW

Microsoft Defender for Endpoint is a robust security solution designed to safeguard your organization's digital environment. It fortifies your endpoints against a wide array of cyber threats, ensuring comprehensive defense and peace of mind. By integrating advanced threat protection and real-time detection Defender for Endpoint provides a comprehensive security framework that minimizes the risk of cyber threats, ensuring uninterrupted operations.

ENHANCE VISIBILITY

Defender for Endpoint enhances visibility across all devices and user personas by providing centralized monitoring and reporting. It offers insights into the security posture of endpoints used by different users, allowing organizations to identify vulnerabilities, anomalous activities, and potential threats specific to each device. With the right tuning, this improved visibility enables targeted response strategies, minimizing risks and ensuring a tailored approach across the diverse user landscape.

STRATEGIC PLANNING

In the initial phase of our service, we embark on a journey of strategic planning. Collaborating closely with you, our Difenda team delves into understanding your current endpoint protection strategy while also identifying any future needs for comprehensive coverage.

This assessment serves as the cornerstone of our design phase, uncovering existing and upcoming endpoint protection policies, deployment strategies, and requirements that lay the groundwork for the successful implementation of Defender for Endpoint.

We work to align our approach with your specific objectives, ensuring that your endpoint security strategy is tailored to your unique landscape.

CONSTRUCTING YOUR SECURITY BLUEPRINT: DESIGN

Our approach begins with a thorough exploration of your environment and requirements, ensuring alignment with industry standards and best practices. Our team of experts then crafts, documents, reviews, and secures your approval for the technical design – the very blueprint that will guide your Defender for Endpoint implementation.

This phase serves as the foundation that underpins the integration of critical security capabilities. As we meticulously construct this design, we ensure that every facet aligns seamlessly with your overarching objectives.

BRINGING YOUR VISION TO LIFE: BUILD PHASE

With the design blueprint as our guide, we step into the build phase, ready to breathe life into your vision. Here's where the collaboration truly takes shape, starting with a powerful initial step:

Defender for Endpoint Management Console Setup

Before we delve into the core build activities, we establish the Defender for Endpoint Management Console, ensuring that your implementation aligns perfectly with your unique needs. It's this console that paves the way for seamless coordination as we move forward.

Guided Deployment

Your team then takes the reins as you operationalize the carefully crafted design plans. With our support, you'll configure the product capabilities that are at the heart of your endpoint security strategy. From attack surface reduction (ASR) to automated investigation and response (AIR), you'll shape your security infrastructure to suit your requirements.

Fine-Tuning for Optimal Performance

As the build progresses, we stand by to assist you in fine-tuning your setup. Our approach is twofold: we ensure alignment with Difenda recommendations, Microsoft best practices, and industry standards, and we ensure that your setup matches the design plans.

YOUR SECURITY ASSURANCE: PERFORMANCE TESTING

Our commitment to your success extends beyond implementation. We meticulously validate that the configured endpoint solution aligns seamlessly with your requirements, ensuring a robust and responsive security infrastructure.

Dynamic Testing

Our strategy is flexible, seamlessly aligning with your change management procedures. Picture it as an ongoing process of checks and balances – but we don't stop there. Our methodical approach ensures that endpoints precisely log data even during peak demand times, without being restricted to the initial set-up.

To illustrate, if your change management plan schedules Defender for Endpoint deployment to your company devices over the weekend when work activity is minimal. We conduct system tests on a Tuesday, during standard working hours. This dynamic testing strategy ensures the real-world effectiveness of your security measures.

Aligning with Your Unique User Personas

We take an extra step to ensure that the logs mirror the user personas you've outlined. It's a meticulous alignment that guarantees everything operates seamlessly. From expected alerts and logs to the smooth firing of endpoints, our thorough testing validates that your security ecosystem functions precisely as intended.

MASTERING YOUR SECURITY LANDSCAPE: TRAINING AND KNOWLEDGE TRANSFER

With your newfound capabilities, Difenda's commitment to your success continues. Our approach centers around enabling you to confidently manage your enhanced security infrastructure.

Guided Learning for Self-Reliance

In a dedicated one-time session, we walk you through the journey we undertook together – from inception to deployment. This comprehensive 2-hour virtual knowledge transfer and technical overview workshop serves as a pivotal learning experience. We cover not just what we accomplished, but also the steps you took in the process. This collaborative walkthrough ensures a clear understanding of the technology's implementation.

Navigating Your New Ecosystem

Our cybersecurity experts share insights and best practices that illuminate the path to proactively managing and responding to security challenges. We focus on equipping your team with the practical knowledge needed to navigate your fortified security ecosystem with confidence for now and in the future.

FAQ

We open the discussion to allow your team to pose any questions, clarifications, or concerns that arise. Think of it like a friendly space where questions find their answers and knowledge sparks engaging discussions.

GO LIVE!

Finally, the culmination of our journey arrives. Armed with a comprehensive build book and bolstered by our expertise, you're prepared to embrace the enhanced security and capabilities of Defender for Endpoint.

As we enter the Go Live phase, Difenda intentionally steps back, empowering you to take the reins in managing your new security infrastructure. This transition ensures a seamless handover that grants you operational control.

Your team is now equipped with the foundational knowledge to navigate endpoint security with Defender for Endpoint.

As your organization's needs continue to evolve, we offer other tailored solutions that further elevate your cybersecurity posture.

WHY DIFENDA FOR DEFENDER FOR ENDPOINT DESIGN & IMPLEMENTATION

Difenda stands out with our proactive hands-on approach. Our team stands by you through the entire journey, transforming cybersecurity expertise into concrete business outcomes. Our Defender for Endpoint Professional Security Services goes beyond guidance; we assess risks, bolster defenses, customize detection protocols, and ensure seamless compliance with industry standards. Rely on us for more than advice – we guarantee a seamless transition, all while maximizing your Microsoft Security investment.

FUEL YOUR JOURNEY

Gain enterprise-wide visibility into your endpoint environment.

Mitigate alert fatigue by categorizing alerts based on their severity.

Save time and resources with a centralized platform.

Maximize Microsoft Security ROI With Out-Of-The-Box Defender Benefits.

Ensure compliance with audit requirements.

WHY DIFENDA?

Decades of combined experience putting customer success first:

Since 2008 our security operations team has created custom cybersecurity services for 24/7/365 coverage. Only Difenda delivers true end-to-end security operations through professional and managed services focused on cybersecurity for where you are on your journey.

Cybersecurity-first. Microsoft-Only.

Difenda is a Sec-Ops-As-A-Service company that takes a cybersecurity-first, Microsoft-only approach to solving today's toughest cybersecurity challenges. As the winner of Microsoft Canada's Security Impact Award, Difenda stands as the most trusted provider of Microsoft Security services.

Next-gen technology supported by industry experts:

Technology alone isn't enough. We have a tenured history as one of the first MSSPs to join the Microsoft Intelligent Security Association (MISA). Our dedication to excellence is further exemplified by our status as a Microsoft Solutions Partner for Security and Microsoft MSSP. We have also earned MXDR-verified solution status and hold Microsoft Specializations in Threat Protection and Cloud Security.

Real People. Real Solutions.

CERTIFIED WHERE IT MATTERS MOST

IS THIS SOLUTION RIGHT FOR ME?

- Are you looking to centralize your endpoint management for 1000+ employees?*
- Are you currently leveraging Microsoft E5 technologies and looking to align your endpoint strategy with your existing Microsoft investment?
- Are you seeking better visibility and control over your endpoint environment?
- Are you looking to simplify the complexity of managing endpoints across different devices and platforms?
- Are you interested in customizing policies and settings within Microsoft Defender for Endpoint to align with your organization's security needs?
- Are you looking to save your analysts valuable time by reducing the number of alerts they are investigating and removing duplicate alerts?
- Are you interested in training your team to effectively manage and utilize Microsoft Defender for Endpoint's features?

*If you have less than 1000 employees we can still help you. Contact us for details!

WE WANT TO BE A PART OF YOUR JOURNEY

Difenda is a Sec-Ops-As-A-Service company that takes a cybersecurity-first, Microsoft-only approach to solving today's toughest cybersecurity challenges. Our security operations team creates custom cybersecurity services, powered exclusively by Microsoft's Security product platform for 24/7/365 coverage. Only Difenda delivers true end-to-end security operations through professional and managed services focused on cybersecurity for where you are on your journey.

Difenda believes in delivering outcome-driven services that meet you right where you are on your cybersecurity journey. Our goal is to expand the horizons of what's possible in the cybersecurity space by mapping clients' outcomes as much as possible back to their current Microsoft Security tools, effectively enabling them to do more with their security investment.

As the winner of Microsoft Canada's Security Impact Award, Difenda stands as the most trusted provider of Microsoft Security services. We have a tenured history as one of the first MSSPs to join the Microsoft Intelligent Security Association (MISA). Our dedication to excellence is further exemplified by our status as a Microsoft Solutions Partner for Security and Microsoft MSSP. We have also earned MXDR verified solution status and hold Microsoft Specializations in Threat Protection and Cloud Security.

We want to put that expertise to work for you!
