CASE STUDY:

HOW THIS GLOBAL TECHNOLOGY COMPANY TRANSFORMED SECURITY WITH DIFENDA'S DEFENDER FOR ENDPOINT PROFESSIONAL SERVICES

BACKGROUND

This global technology company specializes in providing innovative solutions for the financial services sector. With a workforce spanning across various regions and diverse user personas, ensuring comprehensive endpoint security became a critical concern for the organization.

As cyber threats continued to evolve, they recognized the need to enhance their cybersecurity strategy to safeguard their sensitive data and maintain business continuity.

BUSINESS CHALLENGE

The organization faced the challenge of securing their extensive network of endpoints, which included a variety of user personas and devices. Despite investing in Microsoft E5 licensing, the business was not fully utilizing the potential of these advanced features. This resulted in a gap between their security investment and their actual endpoint security posture. The company's existing security measures lacked the required level of visibility and response capabilities to effectively counter the evolving cyber threats. Additionally, they struggled with alert fatigue due to the sheer volume of alerts generated by their various security solutions, making it difficult to identify threats in a timely manner.

ABOUT DIFENDA

Named Microsoft's 2023 **Security Impact Award Winner** for delivering excellence and innovative end-to-end security solutions. Difenda is proud to be a long-standing Microsoft Partner, an early achiever of MXDR verified status, a member of the Microsoft Intelligent Security Association (MISA), and a holder of the Microsoft Threat Protection Advanced Specialization and Cloud Security.

"Difenda's hands-on guidance transformed our existing security measures. From the initial analysis to the seamless deployment of Defender for Endpoint, their expertise was evident every step of the way. The training and knowledge transfer workshops were pivotal for our team. Our analysts have been better able to effectively manage potential risks and respond to alerts since working with Difenda"

CISO, IT Company

SOLUTION

Collaborating closely with the customer, Difenda's experts conducted a comprehensive analysis of the organization's technical and business requirements, ensuring a security strategy aligned with their business objectives. Leveraging their existing Microsoft E5 licensing, Difenda's team then designed a customized Microsoft Defender for Endpoint solution, effectively harnessing the advanced security capabilities already at their disposal. Through seamless installation and configuration with the customer's team, the platform was integrated into the organization's environment, followed by rigorous quality assurance and performance testing to ensure optimal functionality. Moreover, Difenda provided a virtual knowledge transfer and technical workshop, facilitating adept management of potential risks.

RESULT

By implementing Difenda's Defender for Endpoint Professional Security Services and fully leveraging its Microsoft E5 capabilities, the technology company achieved a remarkable transformation in their cybersecurity strategy. This comprehensive solution provides the necessary visibility so you can efficiently identify risks and respond across all user personas. This approach bridged the gap between investment and implementation, ensuring a proactive, holistic endpoint security strategy. Integrating Difenda's expertise with untapped E5 potential, the customer established a robust cybersecurity foundation aligned with their goals. This amalgamation empowered the organization to mitigate risks, proactively respond to emerging threats, and maximize their Microsoft Security ROI.
