

# Eagle-eye Smart Cooler

An isometric illustration on a blue background with floating cubes and dots. It depicts a futuristic retail environment. A man in a white lab coat stands on a blue platform, looking at a laptop. To his right, a woman in a white lab coat stands on another platform, interacting with a large digital display showing a line graph. Various smart cooler units are shown in different sizes and configurations, some with glowing blue light effects. A central stack of blue blocks has a glowing blue light emanating from the top. The overall scene suggests a high-tech, data-driven retail experience.

Mightytech enables CPG brands to better navigate the new frontier of technology of retail

# 01 Company Profile

# Smart Retail

Mightytech computing vision makes it possible

Founded in 2017, Mightytech is a computer vision and machine learning company that focuses on end-to-end AIoT solutions to enterprise customers on a global scale.

# AIoT Solutions Scenarios

**Smart Retail**

**Customers**

Universal Studio Beijing, Haier,  
Mengniu, Yili , NCR and Orion

**Pioneering Technology**

- > Image recognition technology, 95+ Accuracy
- > IoT + Camera set design; +
- > Data & BI development; +
- > Microsoft Azure and IoT hub architect

**SaaS**

Argus Smart Shelf

## 02 Solutions

# Traditional Coolers

Vertical cooler

Minibar

Horizontal Coolers

Cabinets

CPG companies invest millions of coolers and cabinets to display their products. The needs of digitize, analyze and optimize performance into the coolers have never been greater. For the past five years we have helped some of the most successful CPG brands in China to win into the cooler. Now we are making it easier than ever to use our best practices through Eagle-eye smart coolers, the suite of Edge computing and Artificial technology powered solutions.

## Pain points

**Your investment = a traditional display cooler**

**OR**

**Your investment = a smart cooler captures and analyzes display share  
and stock level**

# Rebooting retail for the digital age

## Technology

- ✓ Industrial IoT and edge computing device
- ✓ Adapted to various size of coolers
- ✓ Integrated in the workshop, eliminating cost of on filed installation
- ✓ Leading image recognition technology, with 95%+ accuracy
- ✓ Azure and IoT hub architect
- ✓ Real-time PBI to show SKU performance

## Performance

- ✓ Make sure your core SKUs are in the cooler
- ✓ Claim your fair share of cooler facing space
- ✓ monitor the out-of-stock level and give an alert
- ✓ Understand performance gaps and drive action
- ✓ Monitor sales fluctuations and optimize delivery times

## Digital Transformation

- ✓ Understand dynamic performance of new product and stay ahead of competition
- ✓ Drive better promotion ROI
- ✓ Understand your category dynamics
- ✓ Master category resets
- ✓ Empower your client to win more

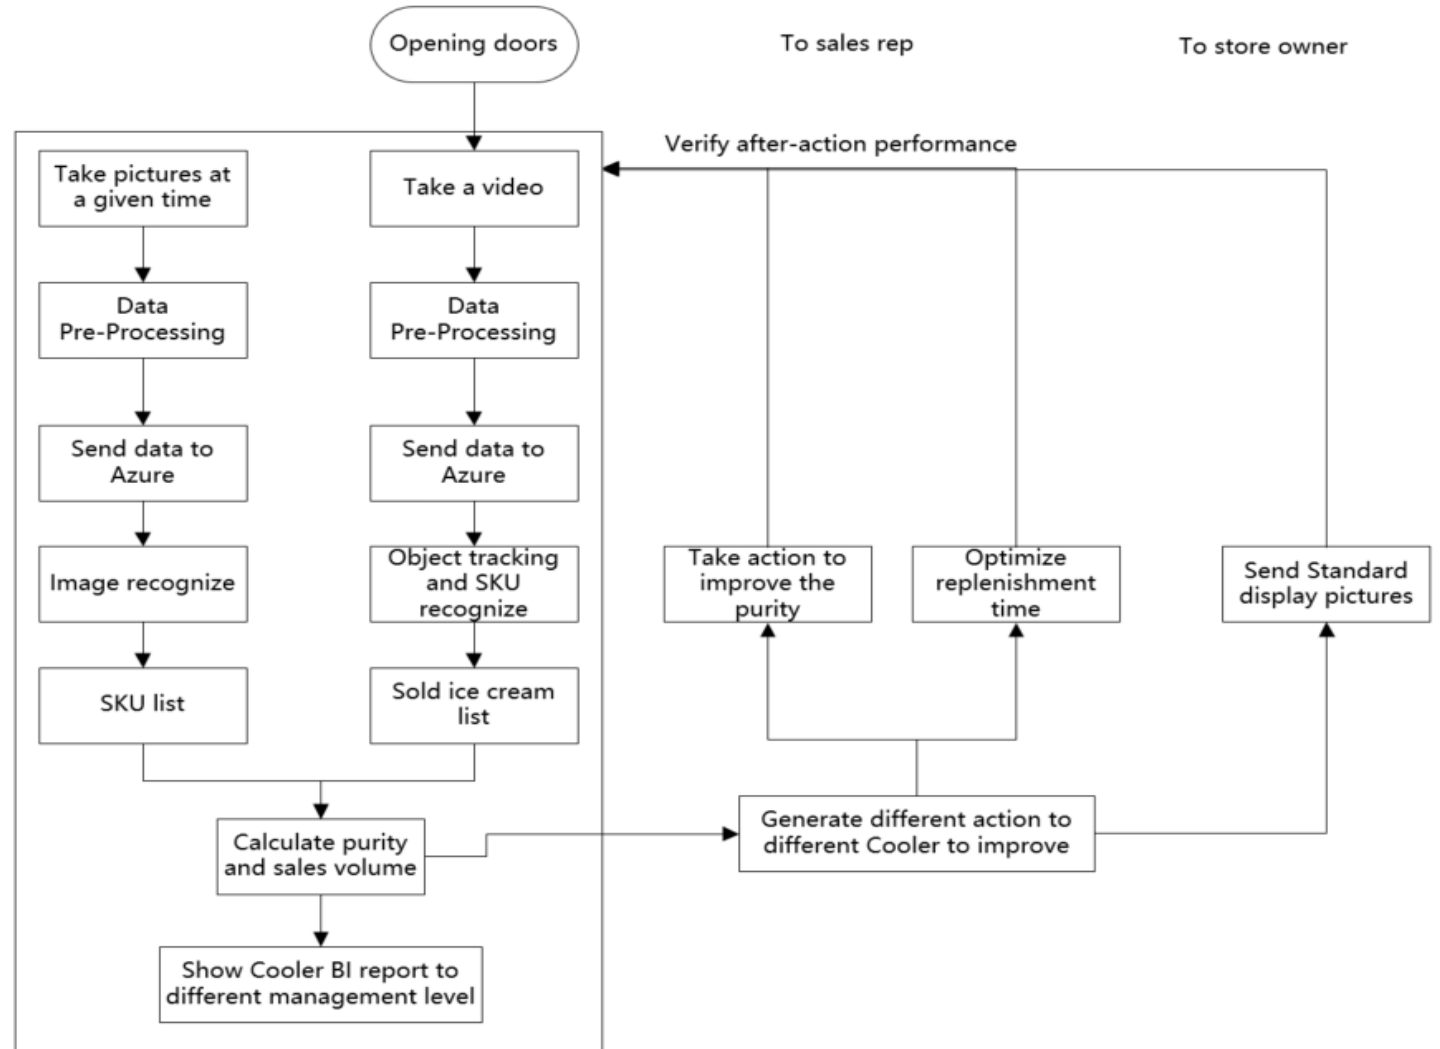

# How it works

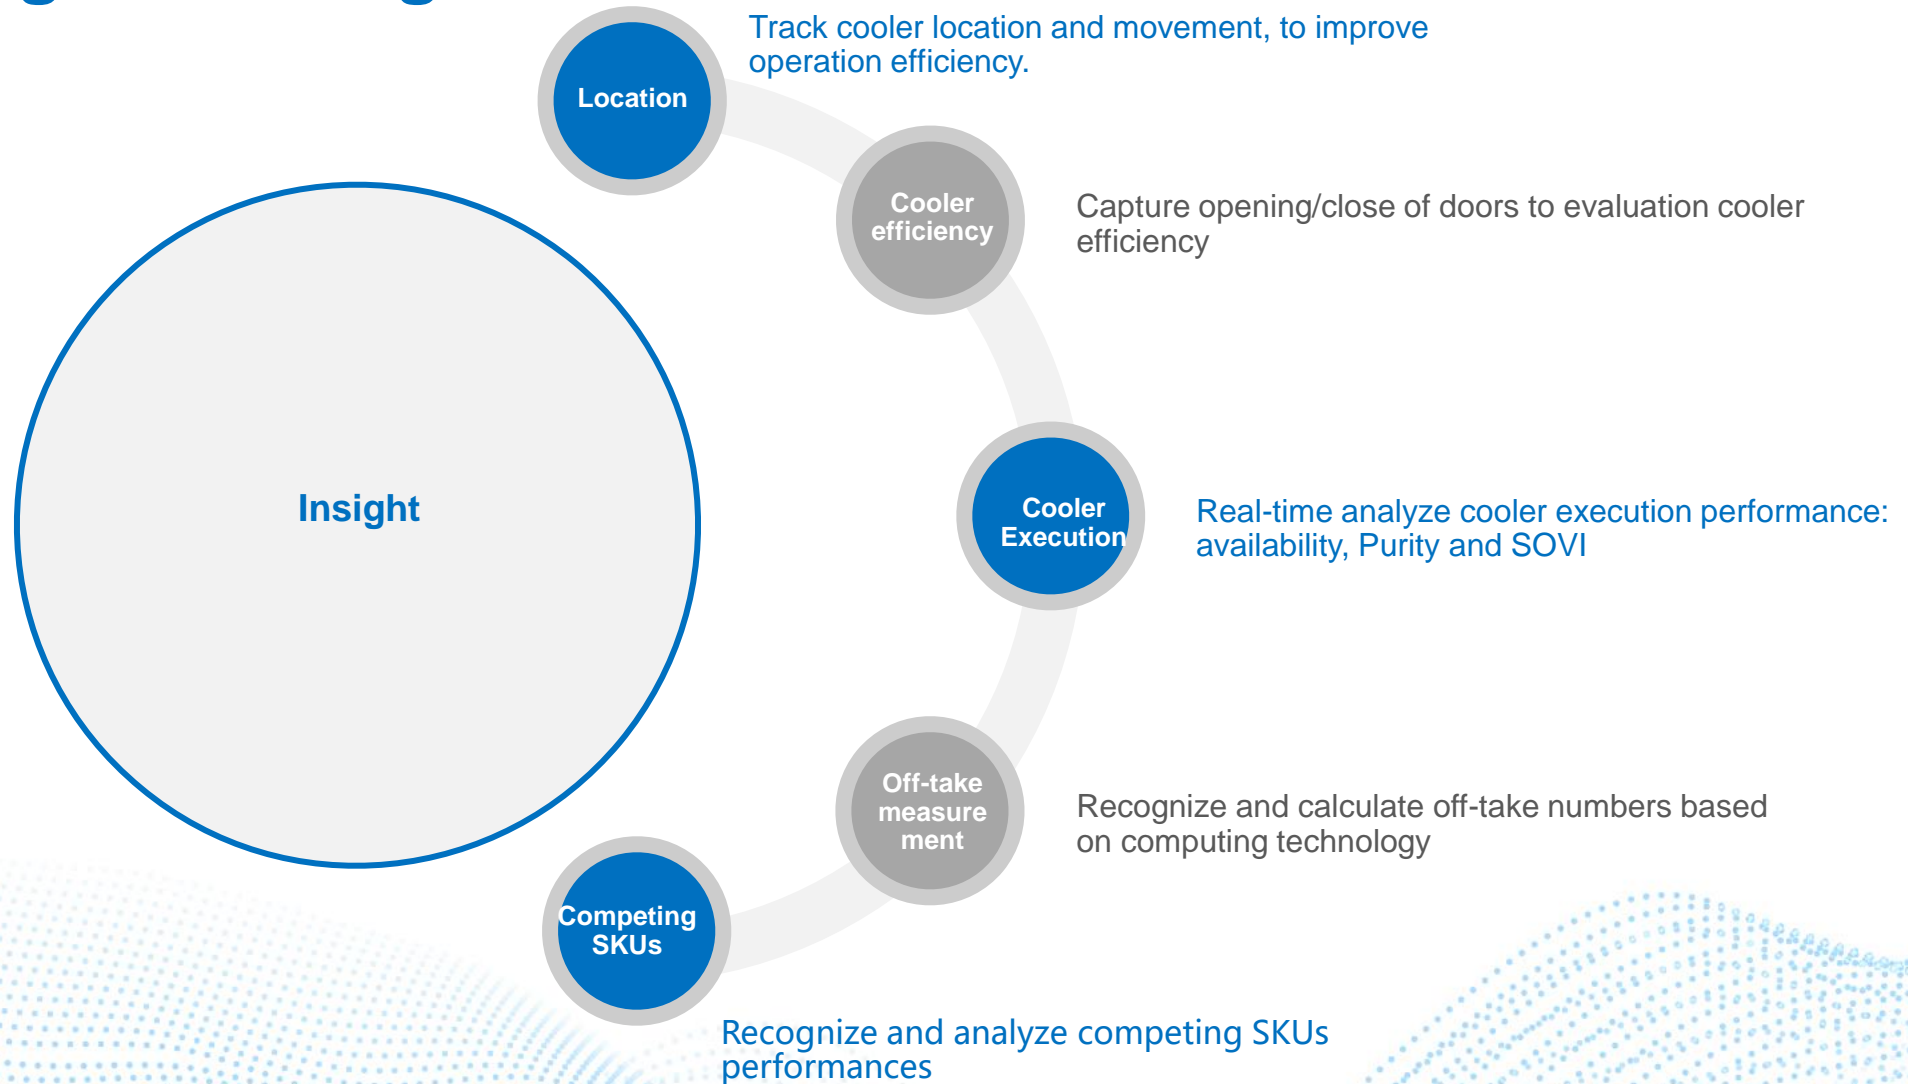

based on image recognition technology, with a 95%+ accuracy

## 03 IoT Devices and Installation

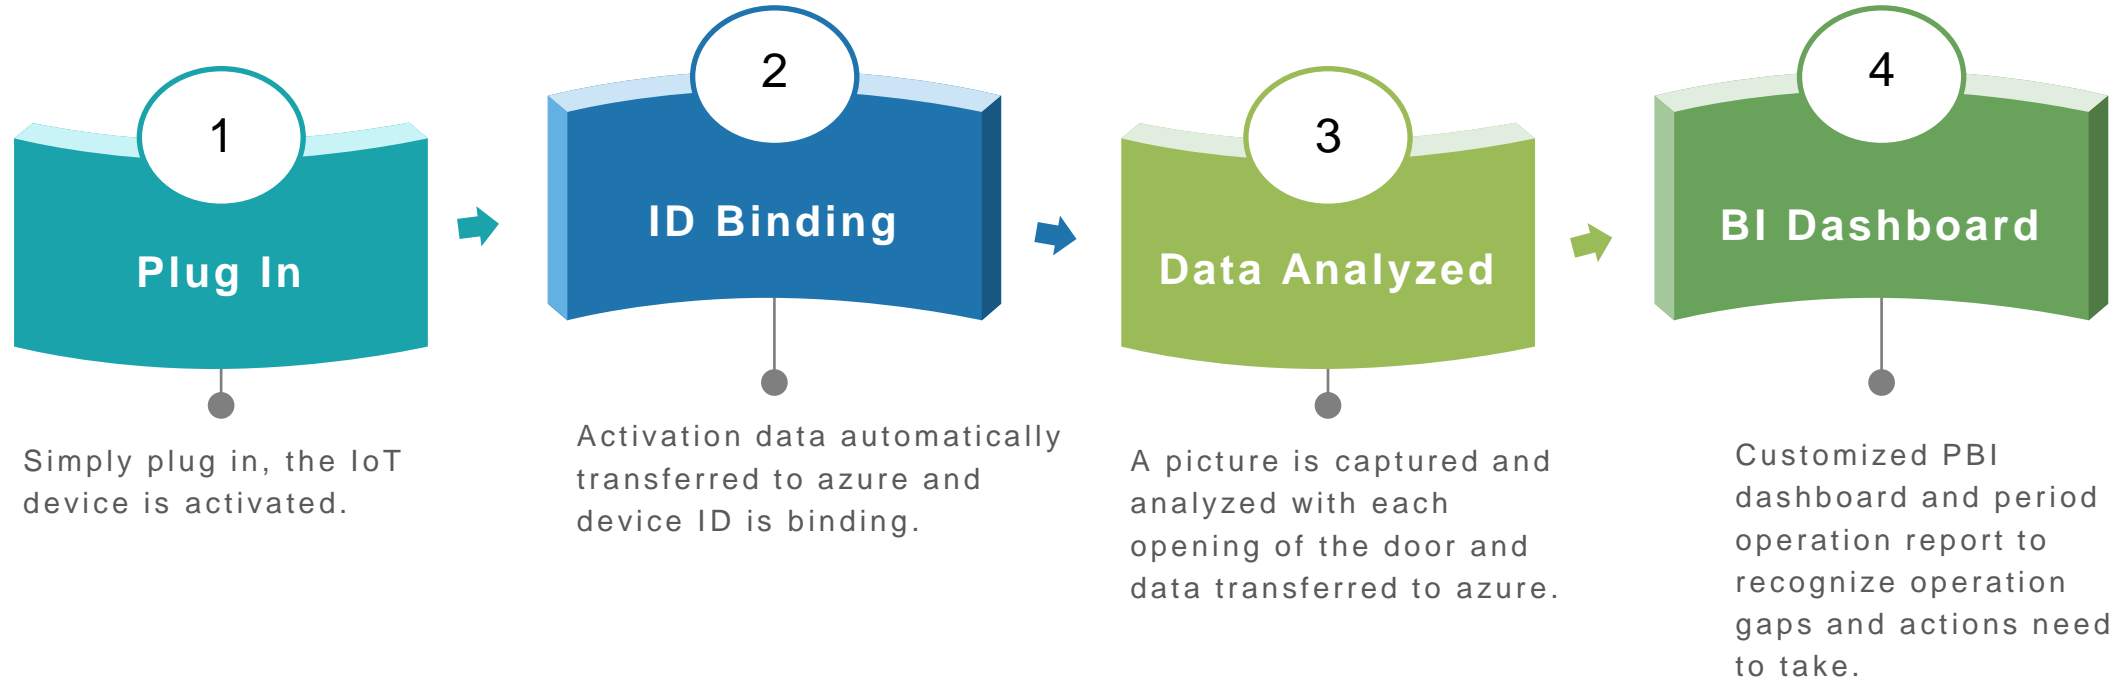

# Customer Study

Mengniu is the second largest dairy company in China. By using Eagle-eye smart coolers, they have dramatically reduced on-field audit time by 40 mins. The following figures are taken in actual stores.

# IoT Devices

Integrated with new cooler within the cooler workshop

The eagle eye IoT device could be easily integrated with brand coolers, including vertical coolers and horizontal coolers. The devices could be integrated in the cooler workshop, and all what the customer need to do is just plug in the power and the device is activated.

# IoT Devices

Integrated with existing coolers on field
