THE **ALL-IN-ONE** CLOUD BASED **STREAMING** AND **VIDEO-ON-DEMAND** PORTAL

LIVE STREAMING AND VIDEO SHARING

ConnectedViews Conference is the **all-in-one cloud based live streaming** and **video sharing content platform.**

THE **SOLUTION** FOR:

ConnectedViews Conference is the ideal solution for parliaments, county councils and city councils, as well as for international organizations and enterprises that want to live stream and publish their meetings with just one simple click.

City Councils

Court Rooms

Parliaments

Enterprises/Board rooms

House of Worship

SOUNDS **FAMILIAR?**

Would you like to create more public involvement? Maybe generate more traffic on social media? Make yourself a trending topic? Create more awareness for your goals?

With ConnectedViews you can easily stream one or more different live channels. Share your content with both public and private users. Completely integrated in your website with your own look and feel.

Do you want your content to be accessible to anyone from anywhere? Do you now have problems with the bandwidth or not being able to watch from your tablet or phone?

With ConnectedViews, you can! The portal is fully responsive and therefore accessible from all operating systems such as PC, Mac, smartphones and tablets. The bandwidth is constantly monitored to provide the end-user with the best viewing and playback experience.

Or maybe you'd like to get all metadata related to the debate or meeting agenda integrated? Would you like to search and navigate using this metadata? You can have easy access to all this content?

ConnectedViews provides you the solution you need. It's especially built for you!

CLOUD BASED, **EASY** CONTROL
SHARED MEDIA IN CONTROL

MORE **PUBLIC** INVOLVEMENT

To create more public involvement we would like to provide the end-user (the public) with the **best possible user experience.** Therefore, **ConnectedViews provides a high quality graphical user interface.**

MORE **INVOLVEMENT**

Video-on-Demand and live streaming are a rapidly changing field. ConnectedViews is a dynamic, portal based environment for organizations that wish to connect to the public by sharing their media, while staying in full control of their publications. Using ConnectedViews makes it possible to stream one or more different live channels. It is also possible to publish only to a specific instance or group!

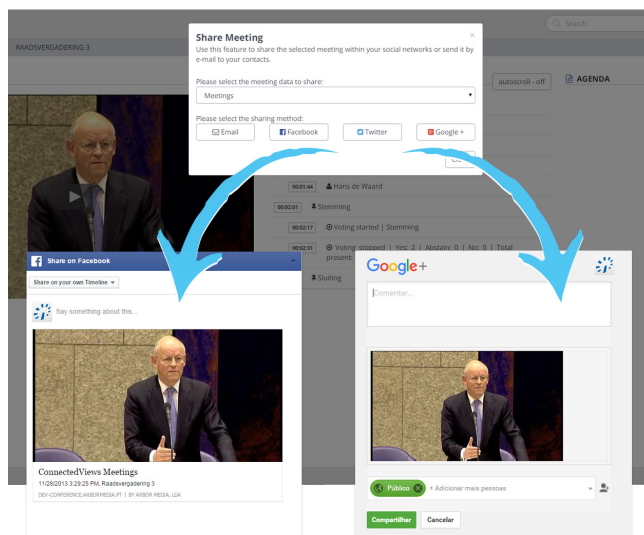

or ongoing live streams, directly from the home screen. They can also search for the most important content, applying a powerful integrated search tool.

Adding to the user experience is the possibility to share content easily via Social Media. Today it's a must to 'like' or 'share' interesting content! For the content's owner this means more traffic online!

USER **EXPERIENCE**

The best possible user experience is creating more involvement. A part of this is a fully responsible interface. The end user must be able to watch every stream on PC, Mac, tablet or smartphone from anywhere! The easy to use interface allows the user to go from meetings to speaker-related content in one touch, interactively. By simply scrolling through the most recent and most viewed content, users can access all published clips

EASY, ACCESSIBLE AND INTUITIVE

ConnectedViews client interfaces are specially developed to provide **easy access to all content.**
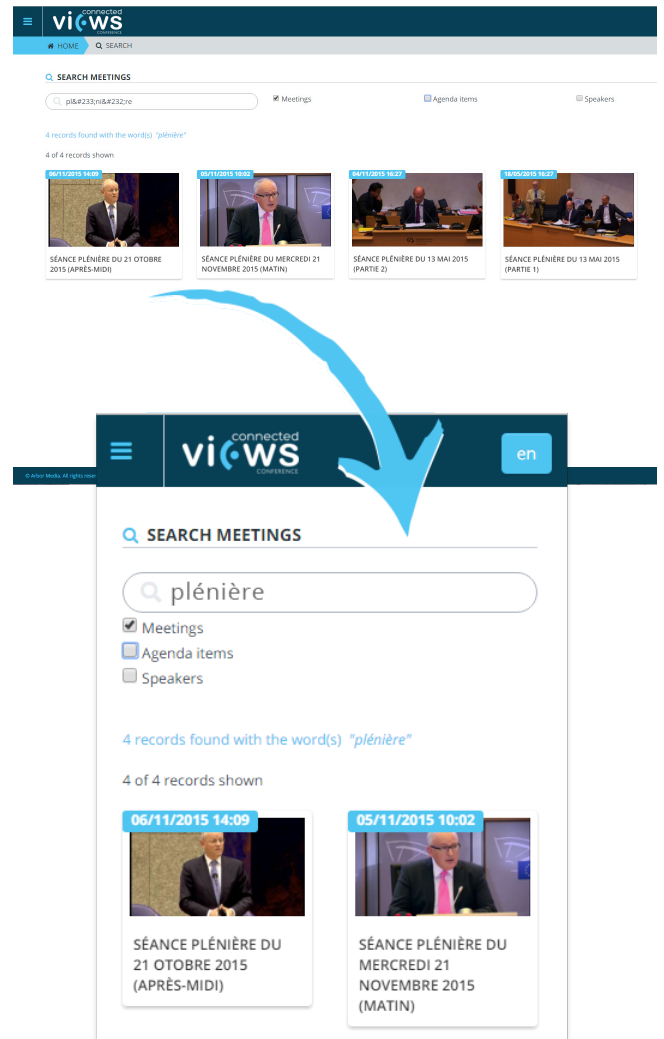

METADATA

ConnectedViews smoothly integrates all available metadata related to the debate or meeting agenda and uses this information to navigate between speakers or the subject list.

View speaker profiles, play all the speaker content or even interact with speakers. Upload a PDF, Word, Excel or PowerPoint document per corresponding agenda item or time-stamped metadata marker.

SEARCH

Thanks to the powerful integrated search tool it is possible to search and select a speaker, an agenda item or any available information from which the video content will start playing.

POWERFUL AND SMOOTHLY INTEGRATED

DESIGNED FOR
THE **SHARER** AND THE **VIEWER**

ConnectedViews is both the sharer and the viewer. Every aspect is **fully optimized** and that makes it **easy, accessible and intuitive.**

MULTI-LINGUAL

Multi-lingual is another benefit of ConnectedViews. ConnectedViews supports multi-lingual streaming, multi-lingual user interfaces and multi-lingual metadata. ConnectedViews allows international organizations to stream their meetings including the translated languages (one video stream and multiple audio streams). The viewer simply picks the language he wants to listen to.

A unique feature is the use and integration of multi-lingual metadata. Often international organizations have metadata translated into multiple languages. Within the user interface the viewer can make his choice of metadata in the right language. Searching in that specific language will of course also work.
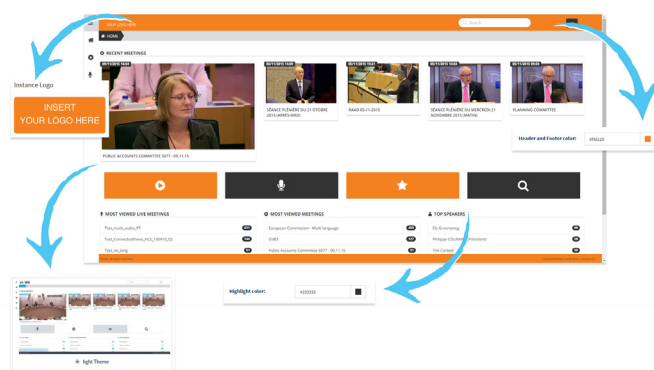

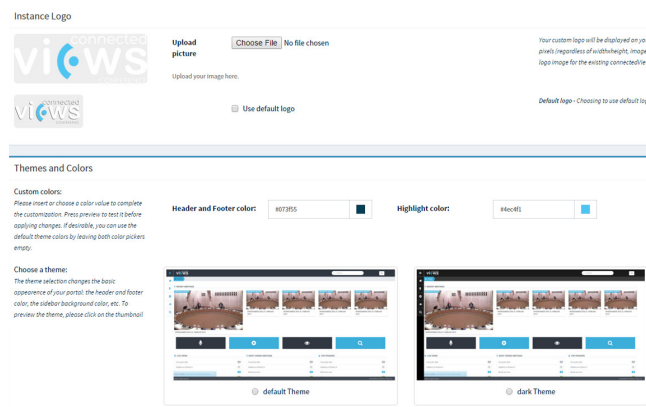

In addition: the user can select his language straight from the user interface.

CUSTOMIZE

Customize ConnectedViews and enjoy seamless integration.

ConnectedViews has multiple levels of customization: from simply changing the colors and adding your logo matching your company entity to completly integrate every single funtionality into your own website using the ConnectedViews API.

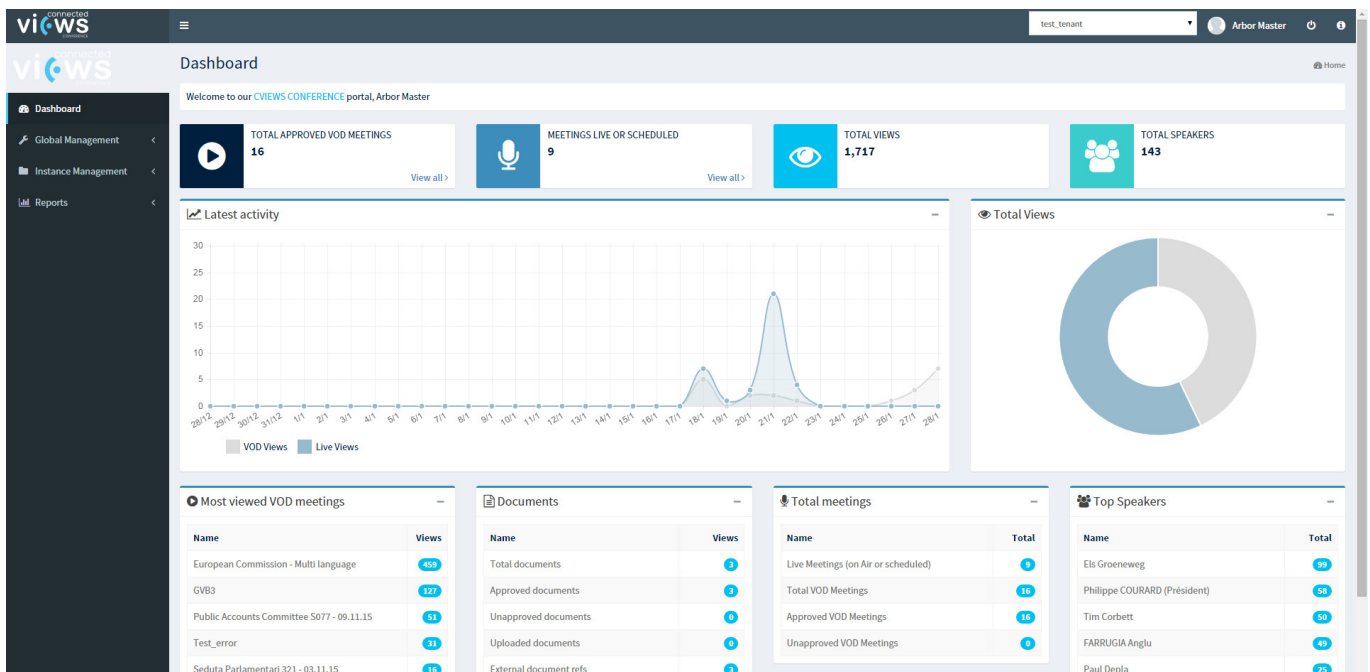

DESIGNED FOR YOU,
FULLY OPTIMIZED

MANAGE AND MONITOR

A **user-friendly centralized web admin console**, easy to use!

ADMIN CONSOLE

This software component is for the administration backoffice to manage, monitor and configure ConnectedViews. Supporting a full web-based GUI, compatible with the major browsers (IE9+, Google Chrome and Mozilla Firefox). Working with the same look and feel for multiple devices, enabling clients to manage their solution from PC's, MAC's, tablets and smartphones. It offers real-time system monitoring, statistics, user management, document management etc.

*ConnectedViews is your solution for managing, streaming and archiving meetings.*

USER-FRIENDLY,
MANAGE & MONITOR

AND **MORE!**

Enjoy the possibilities even more and **add LogDepot to your ConnectedViews solutions**. **It's all seamless integration.**

ADD-ON TO **LOGDEPOT**

ConnectedViews is a cloud-based solution and can be an add-on to the LogDepot recording and streaming system. Just export a clip from LogDepot, no more sending files over FTP, e-mail and other user-unfriendly ways. Just export clips, notify the users and let them watch the streaming content that is generated on-the-fly. Receive e-mail notifications when files are uploaded or added.
ConnectedViews also smoothly integrates with LogDepot and the CMEETS appliances.

ConnectedViews, CMEETS and LogDepot are compatible with each other

COMPLETE THE CHAIN WITH **CMEETS**

ConnectedViews is part of a bigger complete conference suite: Connected Conference. Connected Conference is an extremely flexible and powerful software suite for conference and discussion systems. It is the ideal solution for every organization who is looking for an-always-fit conference solution. This means you will receive the best possible layout without all the possibilities you don't need or want. **You don't need to work around the software, the software will work around you!**
