

# NIVY Watch

## Introduction

NIVY Watch is a leading Industrial Wearable built to improve employee communication and data collection. NIVY watch enables companies to collect data on their employees which can be used to improve productivity and employee reliability. The NIVY Watch Messaging system streamlines employee communication while keeping their hands free and ready to work.

## Target Industries

- \ Manufacturing & Logistics
- \ Retail & Hospitality
- \ Care Facilities

## Case Studies \ Emil Frey

We were very pleased with the proactive approach of the team around NIVY Watch and their willingness to incorporate new ideas and functions to use their watches.

*Peter Lászlo Quality Manager, EF Logistics.*

## Key Points

### Open NIVY OS built on Android

- \ Built on proven Android technology which gives your business full control and flexibility.

### Specialized Data Factory

- \ A complete backend management system built on top of Microsoft technology for worldwide deployment and reliability.

### Industrial Hardware

- \ NIVY Watch is at home in industrial & retail environments. Stylish design backed by quality materials.

### Power Management

- \ NIVY Watch has full day battery life backed by industrial grade charging docks and magnetic power banks for extensive use.
