Azure Governance Model Offer

Public

enfo

Why do I need a Governance Model?

If you are pondering on more than one of the questions below, our proposal could be for you

QUESTIONS

Does my environment meet the requirements of my operation?

Do I have a set of rules or practices about my environment written down?

Do I know what I have in my Azure environment?

Is the continuity and security of my environment sufficient?

Do I spend a lot of time clearing up confusions caused by my own organization or third-party vendors?

Is my Azure usage going to grow in the future?

Governance model

Common rules

Clear responsibilities

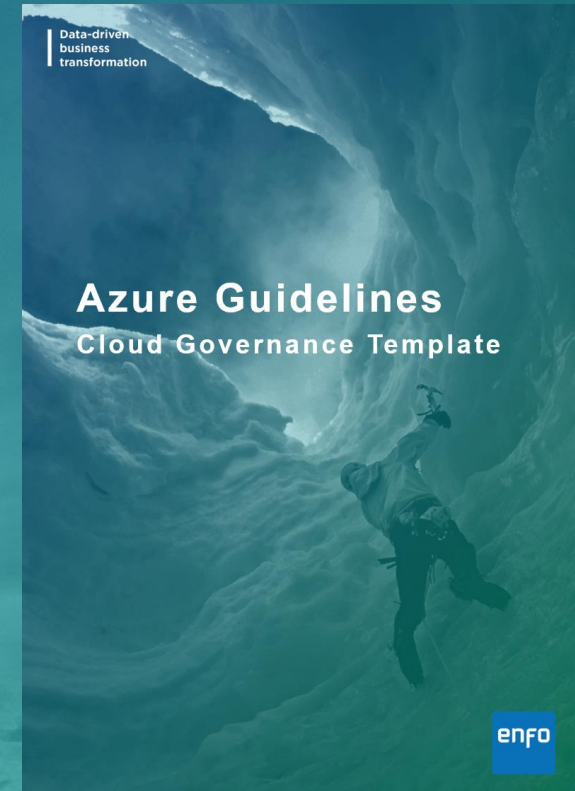

Enabling speed and agility

Keeping control

ENFOS PHILOSOPHY

- **Concise rules** instead of long rulebooks
- **Guidelines** instead of a strategy set in stone
- **Common sense** instead of “*Public Cloud for Dummies*”
- **Enforcement** instead of documentation
- **A small functional entity** instead of “A holy book”

How the work will proceed...

KICKOFF

- **SHORT MEETING TOGETHER**
- Discussing current cloud usage
- Discovery or current situation
- Customers plans for the future
- General discussion

Pre-workshop questions

- Enfo sends a questionnaire to the customer in preparation for the workshop

Workshops

- 2 workshops together
- Enfo and the customer works on the template Enfo will provide
- Goal is to create the initial version for the Governance model

Finalization

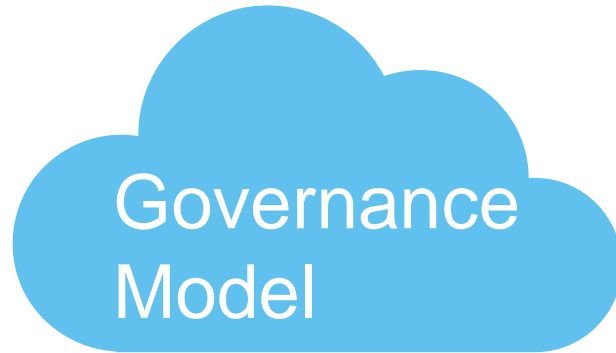

- ENFO finalizes the governance model
- Enfo sends a stylized version of the document to the customer for evaluation

Final review & document handover

- Enfo and the Customer reviews the governance model together
- Customer approves the document and receives their copy

Let's create a

Starting from

6 000,00 €

Contents

- Enfo will use their Governance/Guideline-templates as a foundation for the governance model, which will be handed over to the customer at the end of the project
- Two joint workshops
 - Building the foundation together
 - Make the initial decision for all essential topics and produce a first working version of the document
- Enfo will produce the first clean script on their own
- Enfo will organize a walkthrough of the final version
- The end-result will be a first production version of the Governance model (word document) for the customer
 - The final product will be the property of the customer
 - The customer will also gain a fundamental understanding of Azure that provides a solid foundation for future usage

BASED ON THE FOLLOWING PREMISES:

- The customer brings the correct people to the workshops so the necessary decisions can be made with the assistance and support of Enfo
- The customer is committed to prepare for the workshops using the material provided by Enfo in advance

TIMETABLE:

- The workshops can be hosted as soon as the first available time can be agreed upon, so that the customer has time to prepare for the workshops with the help of Enfo

Thank you
