All we care about is creating impact that lasts, and we have the tech, the data and the insight to do just that. Our customer segments are Industry, Retail, Services, Health, Telecom.

BizTalk to Azure
Migration Assessment

What?

A compact consultation project to produce information needed to start effective BizTalk migration

Why?

Cost and time effective way to produce concrete plan for complex migration topic

How?

Solita gathers pre-defined information of existing BizTalk environment and performs analysis to create a road map suggestion for migration

WHAT WE OFFER

Integrations are key enabler for all digital service development. Expectation for agility and speed to deliver integrations has increased. At the same time on-going cloud adoption has made integration needs more versatile than ever.

BizTalk server has been designed against very different integration requirements than the ones faced today. BizTalk product road map is long and keeping the version up to date requires plenty of resources.

Migrating BizTalk server into a cloud native platform solves many problems faced today with BizTalk.

Benefits of cloud migration:

- Increased ability to meet modern integration needs
- Maintenance and operations costs savings
- Future proof solution
