

Business-Led S/4HANA Transformation on Azure

PwC leverages SAP's S/4HANA to provide industry-leading knowledge that can help your business thrive

Whether you want to run SAP S/4HANA in a new implementation, are migrating from SAP Business Suite to SAP S/4HANA or are running SAP ECC and are not ready for a full enterprise-wide transformation - PwC's got you covered.

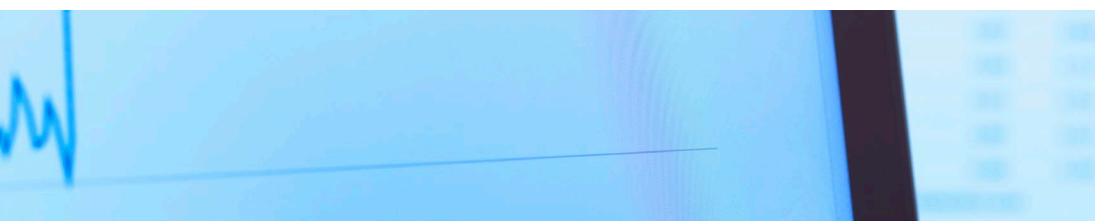

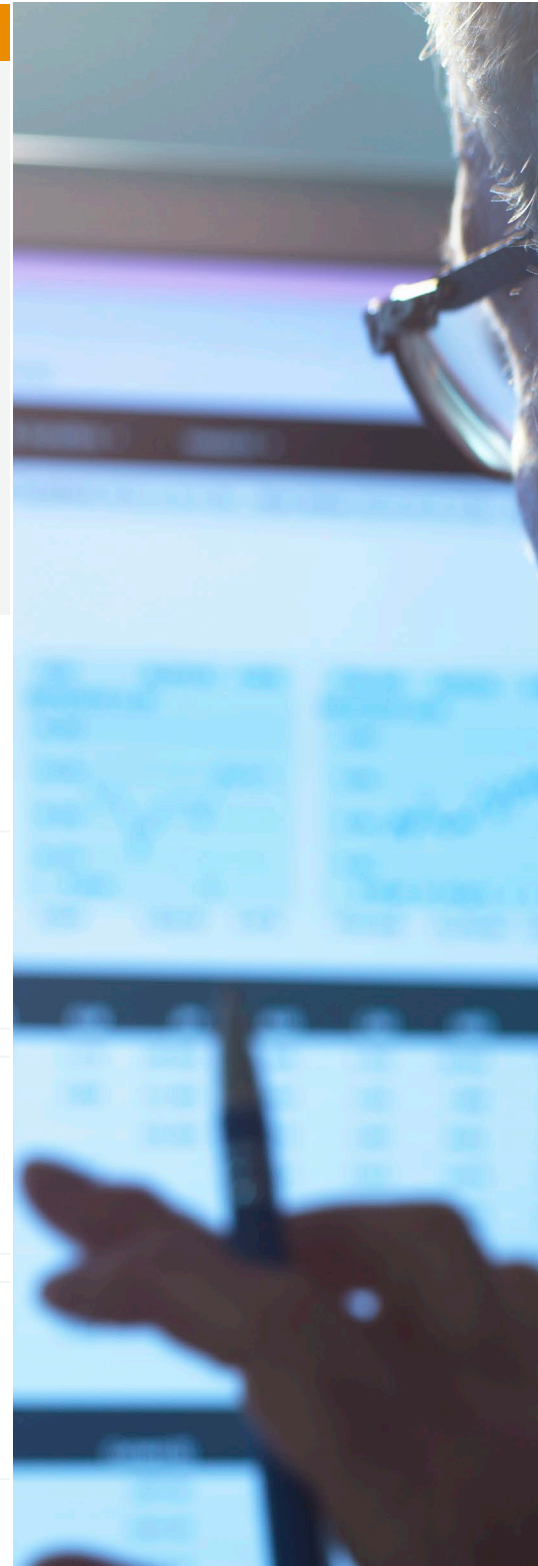

PwC and Microsoft's 20+ year partnership delivers successful SAP projects with an impressive success rate, leveraging 14k dedicated SAP resources globally, empowering organizations to achieve more with SAP S/4HANA on Azure and beyond.

Benefits

1 **Identify** the business case for transformation.

2 **Advance** your security and compliance.

3 **Enhance** productivity and collaboration with democratized data and extended functionality via the Microsoft stack.

Business-Led S/4HANA Transformation on Azure

Features

SAP S/4HANA is the latest SAP Business Suite, with streamlined transactions, improved user experience, simplified data flows, and new features.

- **Immediate intelligent insights**
Combine SAP and non-SAP data using SAP Analytics Cloud & Azure Data Services. Leverage IoT, edge services, AI, and Digital Twins for modernizing business processes.
- **Enhanced productivity**
Enable users to simplify repeatable processes with no-code/low-code app development.
- **Advanced security and compliance**
Use Azure Active Directory (ADD) for authentication and Single Sign-on (SSO) with SAP Identity Integration. Secure sensitive data on-premises and across clouds with Azure Purview. Get, Private Link, and Azure ransomware protection breakout points for networking security.
- **Accelerated automation and innovation**
Boost productivity with richer employee, customer and supplier collaborations with native SAP. Benefit from rapid access (low latency), unmatched security and thought leadership in remote work.

Use case

CHALLENGE

A leading portfolio of water brands needed to create all infrastructure (on-premise and cloud) for a new manufacturing entity that includes bottling plants, factories and a fail-proof IT infrastructure.

SOLUTION

PwC delivered a full Azure and on-premise environment that leveraged the cloud for authentication and Azure Active Directory (ADD) so factories can continue working even during an Azure outage.

RESULTS

With a fresh instance of SAP on Azure, Power Platform, and Microsoft 365 this company launched into success leveraging the best-in-class technologies and an IT infrastructure they did not have before - all fundamentally based in Azure.
