

# Microsoft Viva Assessment with Cloud Intel

## Enhance your Employee Experience with Microsoft Viva!

Many companies are leaning into hybrid work, prompting a need for enhanced efficiency in both organizations and employees. To thrive in today's work environment, innovation is the key, and Viva, the employee experience platform, is the pathway to success.

Microsoft Viva is built for hybrid work, which supports people and teams by helping organizations deliver more connection, insights, purpose, and growth. Viva seamlessly integrates people, security, and privacy into a cohesive modern experience. Organizations can use it for a variety of purposes, including hiring processes like onboarding, training, and facilitating connections among employees.

### Microsoft Viva's Key Modules:

**Connection:** To amplify culture and communication

**Insights:** To balance productivity and well-being

**Learning:** To accelerate skill development and growth

**Topics:** To harness knowledge and expertise

## Enhance your Employee Experience with Microsoft Viva!

As part of our BVA, we understand your business requirements and evaluate your current M365 environment, configuration, licensing, and readiness for Viva deployment. We conduct a comprehensive business value analysis, including security benefits, productivity improvements, business process automation, benefit analysis, and financial analysis (ROI/TCO, Capex to Opex) to ensure cost-effectiveness.

Cloud Intel provides a comprehensive roadmap and AI-based recommendations to prepare you for all 4 Viva modules implementation and guidance on how to make the best use of its features to improve employee experience and engagement.

Cloud Intel makes it easy for you to foster a culture that empowers people and teams to flourish from anywhere, using Viva.
