

# Multicloud Solutions in Microsoft Azure & Oracle Cloud

Use the power of Microsoft Azure and  
Oracle Cloud to create your best analytics  
solution

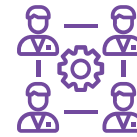

Transform and modernize your Data Warehouse environment thanks to Lingaro's complete business solutions using the fully integrated Azure and Oracle Cloud.

Enterprise class Data Warehouse and Reporting Platform with all the advantages of Microsoft Azure and Oracle Cloud.

Lingaro ensures smooth integration of Azure and Oracle Cloud solutions via the use of:

- Cross Cloud InterConnect (a physical fiber connection between regional data centers);
- Unified identity and access management for both Cloud Platforms;
- Collaborative support model between Oracle and Microsoft.

# Our Offer

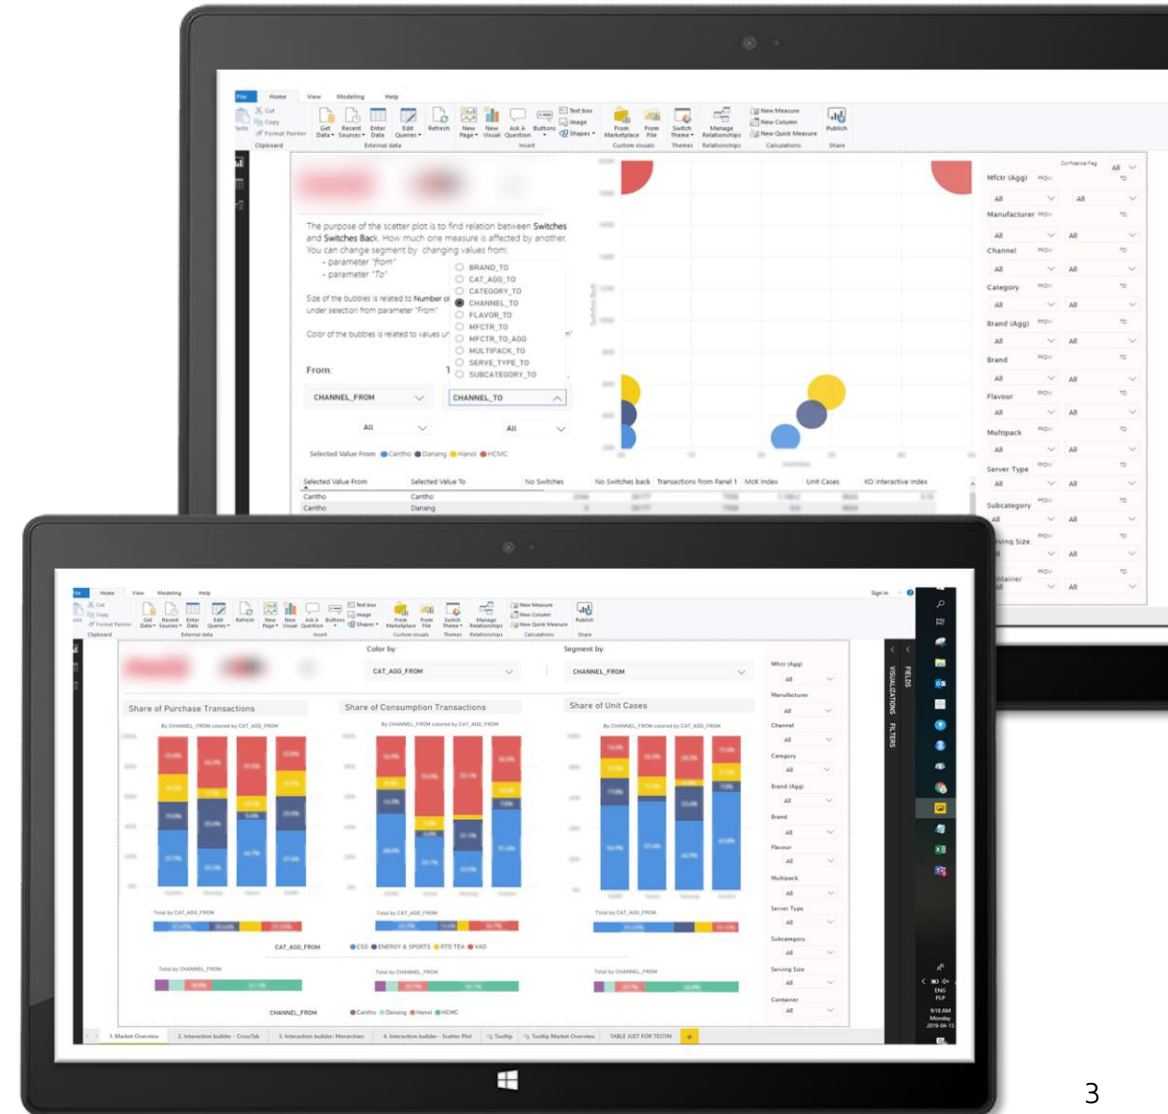

Multicloud Data Warehouse and Business Intelligence solutions with all the best features of Azure and Oracle Cloud

Based on your company's Data Management direction, Lingaro will implement the new Multicloud solution, making sure it is integrated with all your existing architecture. The integration and transition will allow to benefit from the best features of the Azure and Oracle Cloud.

Our capabilities will help you build a complete analytics platform, tailored to your industry and specific business requirements, with the usage of Interconnect. You will:

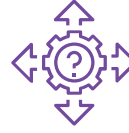

- Leverage both Azure and Oracle Cloud within a fully adopted solution
- Combine the reporting capabilities of Azure with the computing and data storage capacity of Oracle Cloud.
- Ensure seamless transitions from one cloud to the other.
- Transform your reporting for better adoption.

# Benefits

**Fast and cost-efficient** implementation of reporting in the cloud platform, without the need to rewrite the existing backend, **reducing the Time to Market** for new services.

**'Cherry picking'** approach. You decide what components in Azure and Oracle Cloud will be selected for your final solution, enabling easy alignment with the company strategy, security requirements, licensing policy, and within the allocated budget.

**Reduced Total Costs of Ownership** by choosing cost-effective components and avoiding re-writes of existing technology solutions.

Solution implementation is **not dependent on a single vendor**, reducing the risk and not limiting your enterprise to only one platform (at present and in the future).

**Fast implementation of Proof of Concept** so your company can validate the reporting capabilities and user-adoption.

**Get the most out of both solutions**, combine the self-service Power BI tool with the computing capabilities of Oracle's databases.

## Who is this offer for

Enterprises planning or with **Data Transformations to the Cloud** underway, looking for **fast and cost-effective** transformation options, using existing or upgraded **technology stacks**.

For business, where **no single platform** (Oracle or Azure independently) **can address all complex business requirements** and scenarios.

Companies using Oracle Data Warehouse solutions, **considering the usage of the Azure** reporting or an extension of the Analytics platform architecture with the **Azure Data Lake** solution.

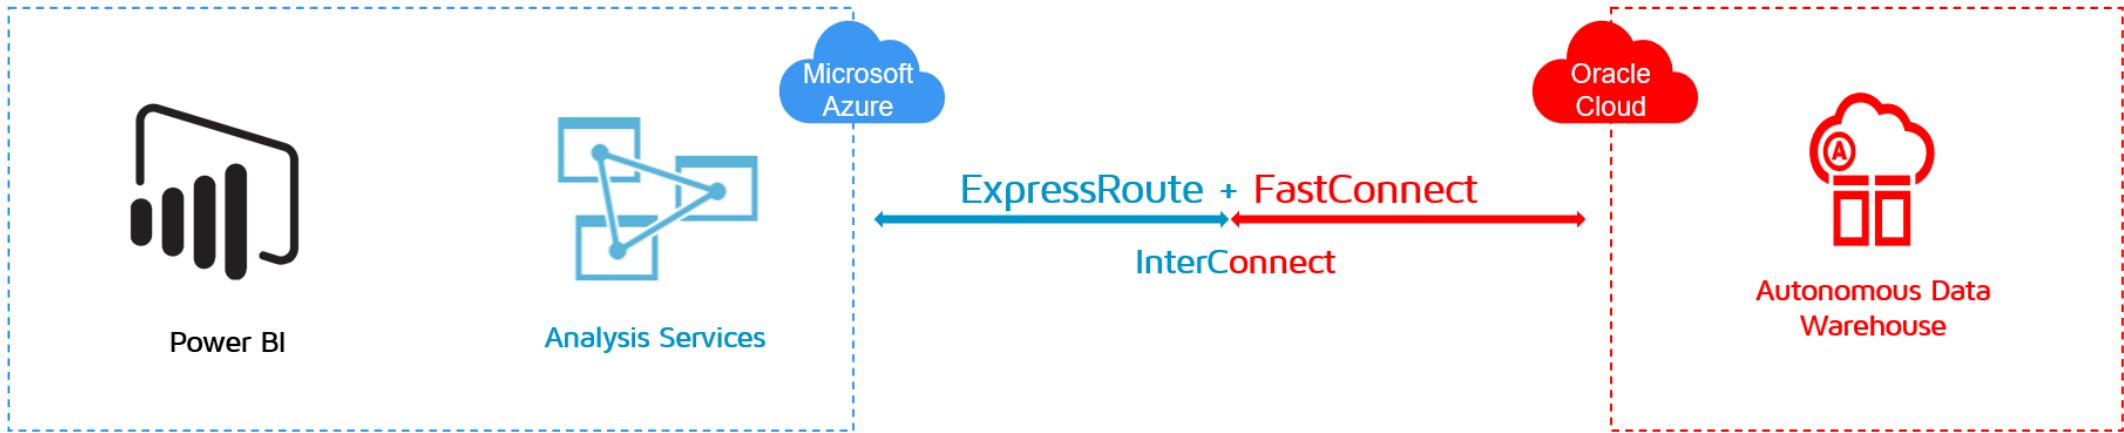

Enterprises that are **looking for an integrated reporting solution** in Azure or Oracle Cloud **sourcing from various data sources and databases**.

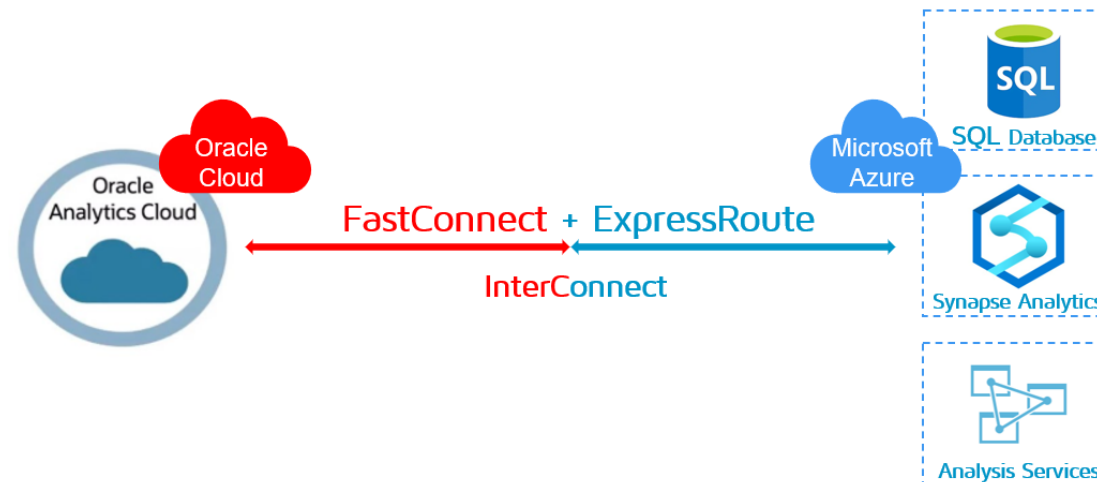

# Example Reference Architectures

Power BI and Analysis Services reporting sourced via **Oracle Cloud Autonomous Data Warehouse**

**Oracle Analytics Services** reporting sourced via various data sources in Microsoft Azure

# Why Lingaro?

## Strong Technology Partner

Lingaro's strengths come from our technology excellence and partnership mindset that is based on trust and focus on mutual benefits. We treat every case individually and deliver solutions in accordance to the highest standards.

### Biggest Data Warehouse Projects

Lingaro has been in the market for over 10+ years, delivering services for the biggest Data Warehouse solutions to enterprises worldwide.

### Partnership with Microsoft

Our **10-year long partnership** with Microsoft has enabled us to build a strong presence in the Azure space. With a **Microsoft MVP** on board and awarded **Microsoft Azure Partner of the year 2018** – we ensure excellent cooperation.

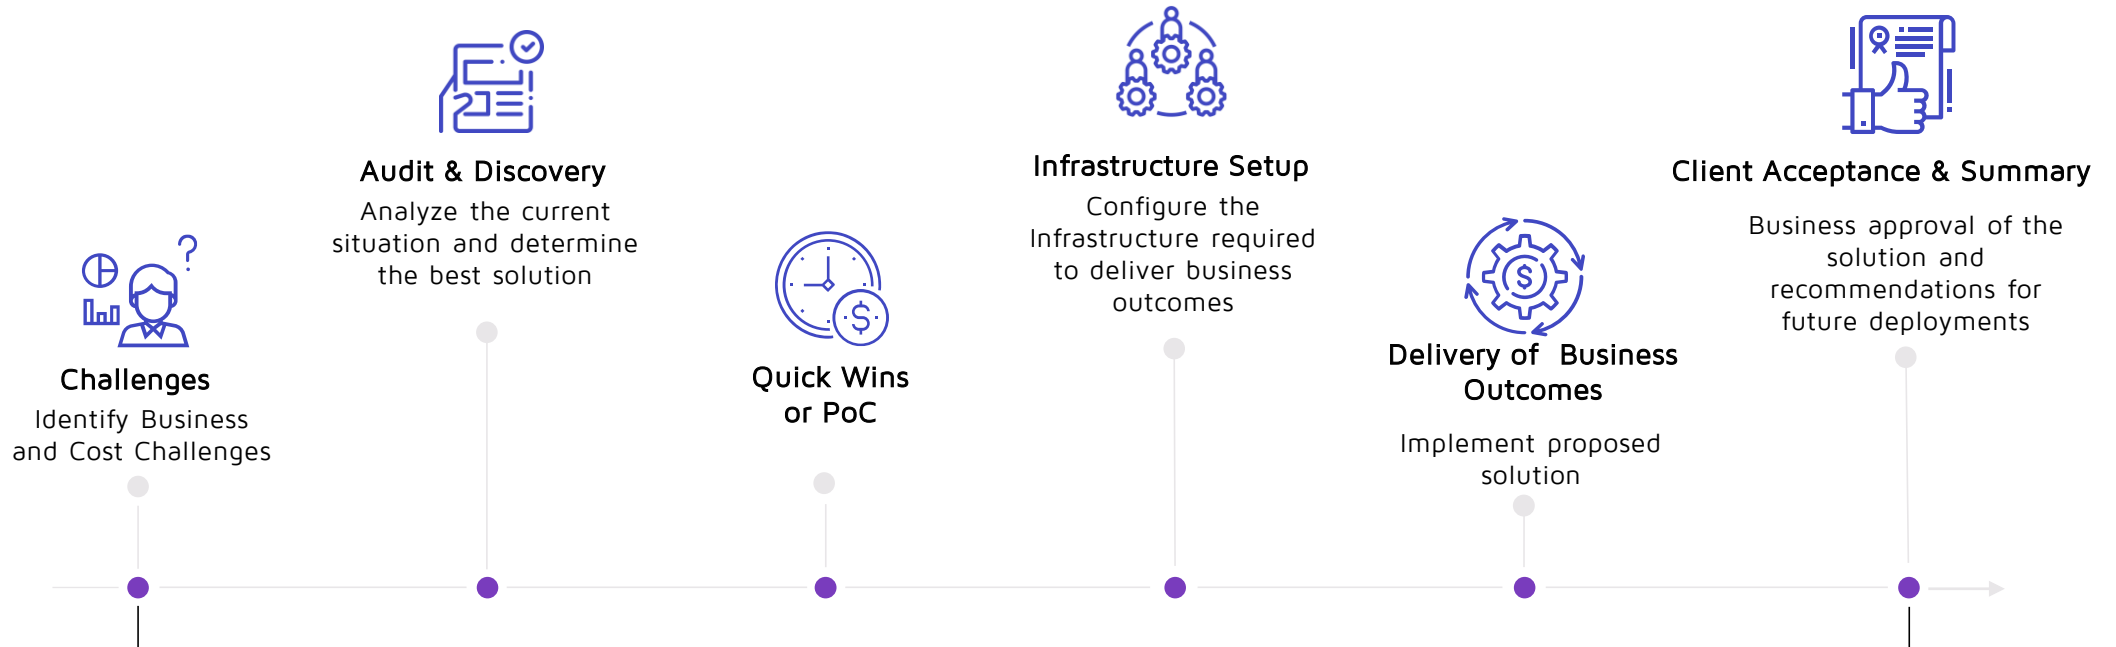

### Partnership with Oracle

Our close **partnership with Oracle** is proven by running Proof of Concept **initiatives together in both Cloud and Multicloud** to deliver the best possible solutions.

# Why Lingaro?

## Methodology & Timeline of the Implementation

We deliver the PoC within the first 2 weeks.

# Why Lingaro?

## Infrastructure Setup

- Architects and Developers setup up the environment according to best practices.

## Delivery of Business Outcomes

- Delivery of the agreed quick wins and presenting results to the end users.

## Client Acceptance & Summary

- Post implementation check against adoption measures.
- Business approval of implemented solution.

## Challenges

- Interviews and workshops with Business and IT teams help to understand all major expectations and challenges.

## Audit & Discovery

- Auditing and discovering the environment setup, services, opportunities, and limitations. Proposing and aligning adoption measures that allow to verify how the overall application performance changes after the migration to the new Cloud environment.

## Quick Wins

- For big systems, we suggest to start with potential quick wins or Proof of Concept to ensure that the target solution is performing as expected and covers business requirements.

Digitize. Disrupt. **Lead.**
