

Cyber Trainings & Defense Solutions For Critical Infrastructure

About us - CybergymIEC leads in cybersecurity with our unique Cyber Arena training platform. It forms the basis of our cyber protection suite, including diverse training, OT defense solutions and value-added services. This approach successfully secures many global infrastructure organizations, like the Israel Electric Corporation.

Company Overview

End-To-End Cyber Defense Solutions

Why CybergymIEC?

Real-Life Experience
With extensive experience in defending the Israel Electric Corporation – one of the most frequently attacked companies in the world – our team has unparalleled expertise in infrastructure cybersecurity.

Comprehensive Solutions
Our team of experts delivers a comprehensive range of battle-proven, end-to-end cyber defense solutions, so you can protect your critical infrastructure against evolving cyber threats.

OT Specific
Our game-changing OT defense solutions and trainings prepare your people, products, and processes for the next attack, ensuring your critical infrastructure systems are protected.

Tailored to Your Organization DNA
We work closely with our customers to understand their unique challenges and deliver customized cyber defense solutions that provide the highest level of protection in today's rapidly changing world.

Some of our Partners and Customers

Training Platforms & Programs

CyberPod

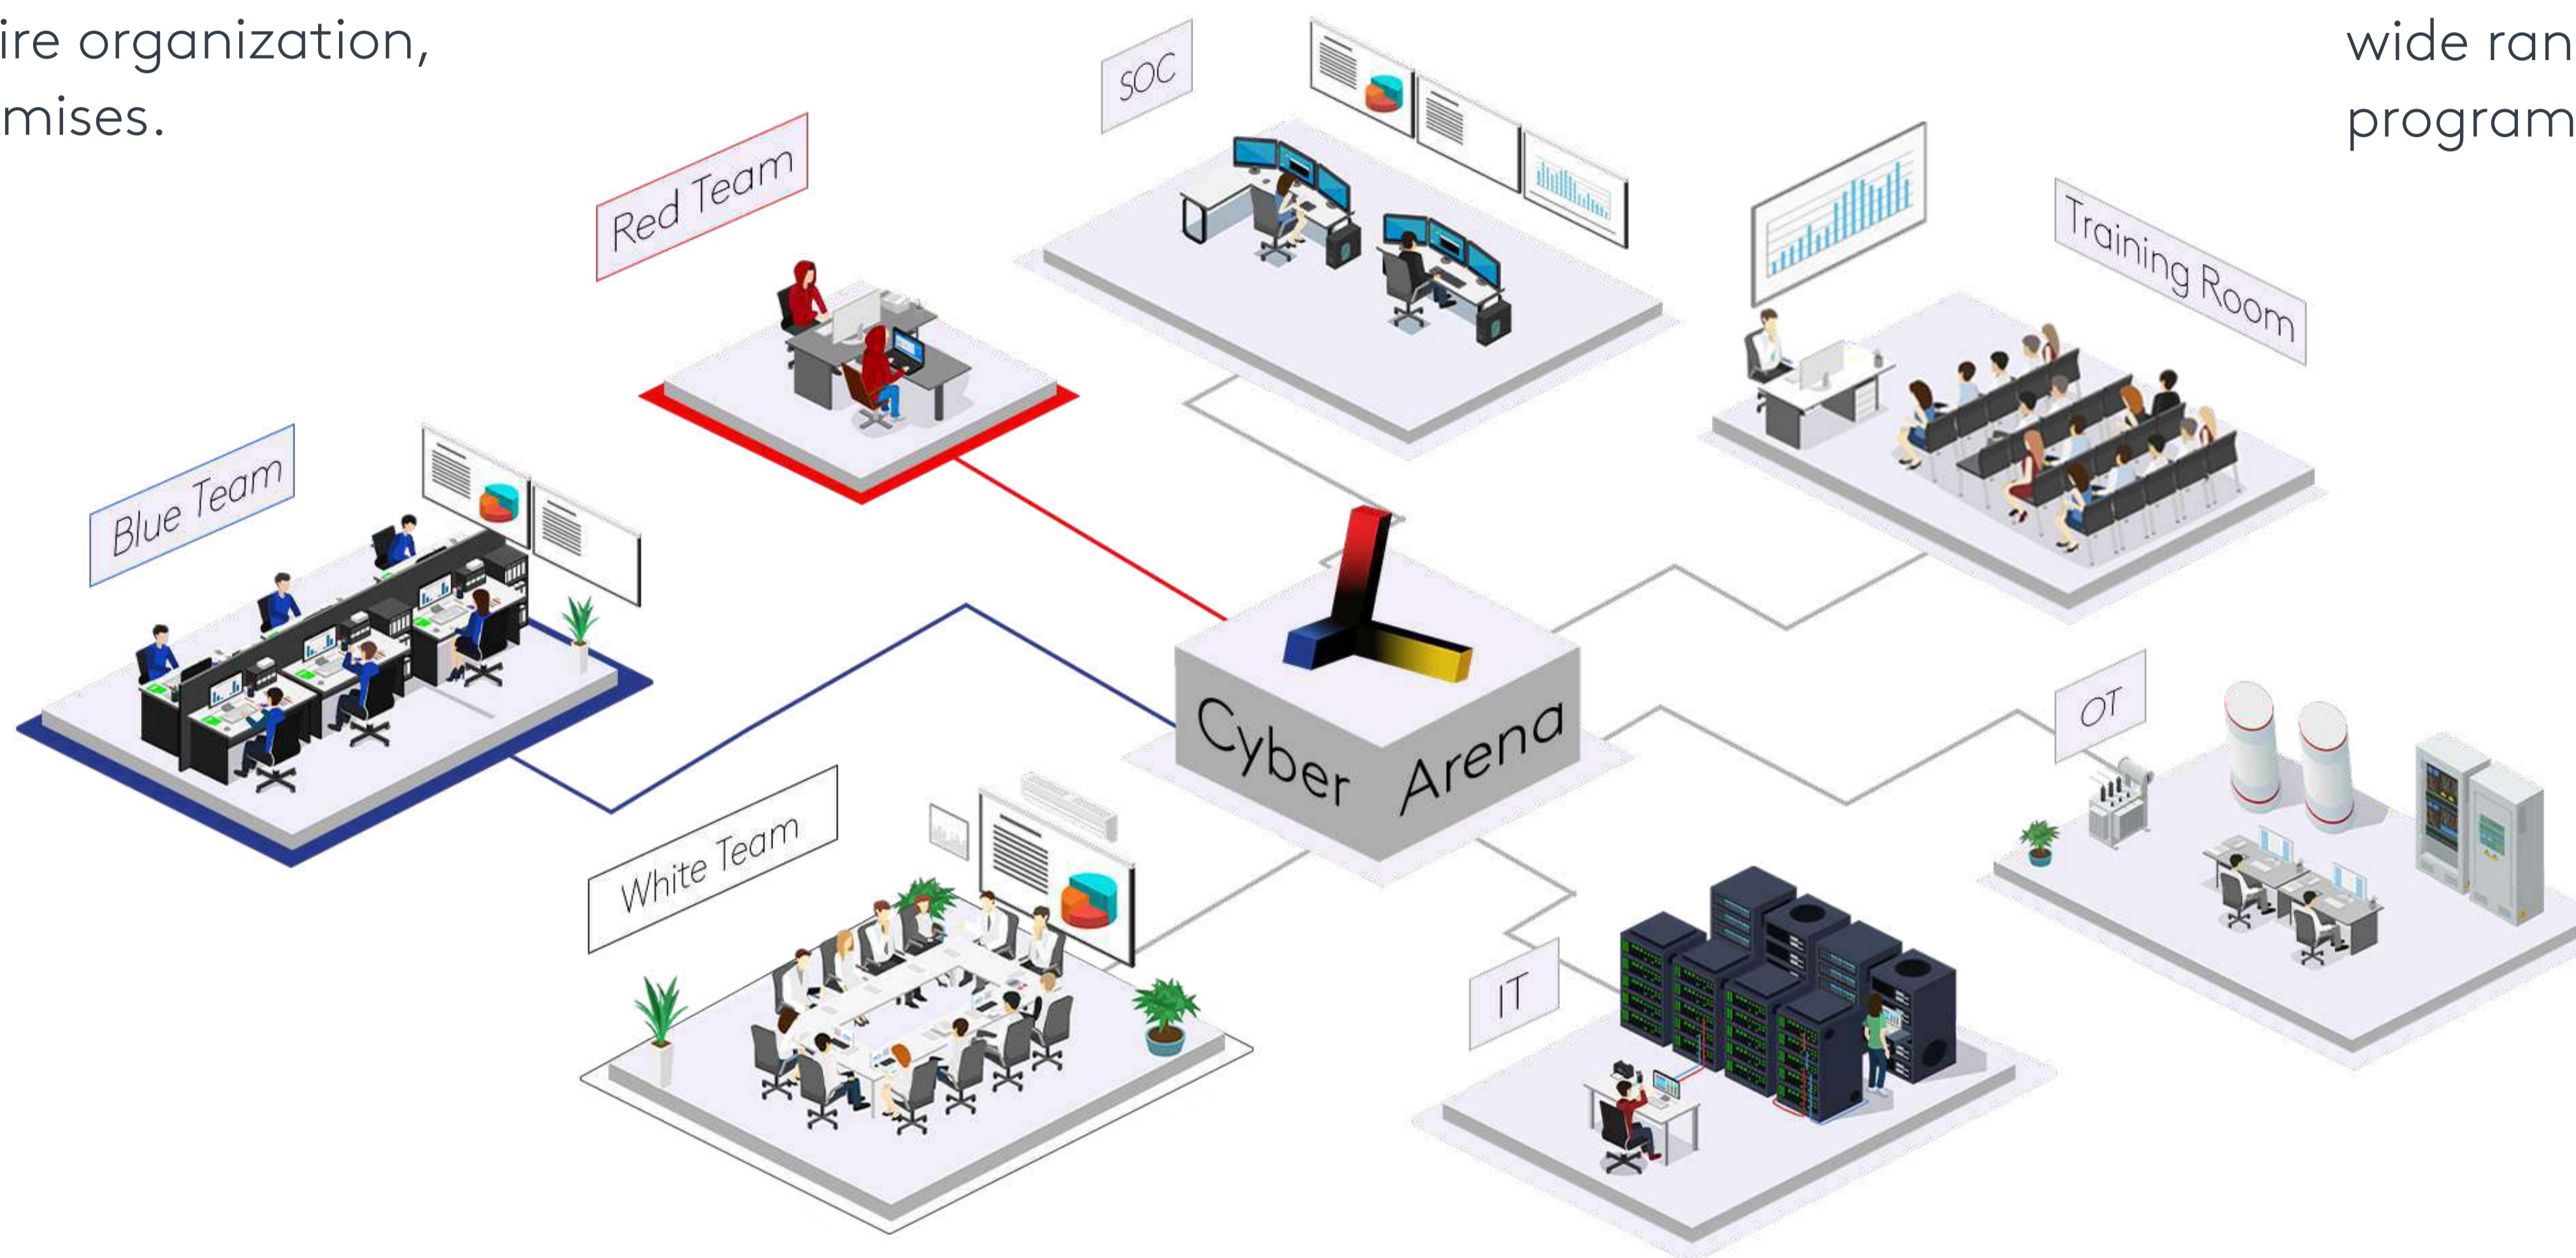

A compact training arena, enabling you to cyber train and qualify your entire organization, using a remote connection to our global network.

CyberGround

A full-scale training arena, enabling you to cyber train and qualify your entire organization, at your own premises.

Virtual Cloud Arena

A virtual arena, enabling online access for your employees to our wide range of cyber training programs.

Single Topic trainings

Cyber security training sessions focused on enhancing skills and knowledge in a specific area. Suitable for all levels of expertise, from professionals to general employees.

Training Programs

A comprehensive range of training programs, designed to give participants a deep understanding of cyber security concepts and practical skills.

OT Defense Solutions

Sophic Zone

Emulate, simulate and validate operational systems, technology and processes, in a near-real-time environment.

Sophic Access

The most advanced solution for providing third-party remote access to your systems and the critical parts of your OT networks.

Sophic Info

Advanced scanning of incoming data to protect your systems from known and unknown threats.

Value-Added Services

Rapid Cyber Maturity Assessment (RCMA)

Workshops

Vulnerability Assessment

SOC-as-a-Service

Incident Response

Penetration Test
