

Complete Data Insights for IoT and Edge Solutions

beanTech - SENTRY

beanTech is a System Integrator specialized in digital manufacturing solutions; we support businesses in the implementation of data analytics solutions for IoT systems focused on process, energy and performance.

See what customers are saying:

"Sentry provided us with a complete asset monitoring tool, thanks to which we have streamlined asset management, optimized routine as well as extraordinary maintenance operations"

– Matteo Volponi - Software Product Manager, System Logistics

WHAT WE OFFER

Sentry is a configurable self-service solution for immediate asset connection, secure cloud-based data transport, and exploration through customizable dashboards.

Sentry enables the rapid deployment of your IoT fleet monitoring through a scalable framework and a complete out-of-the-box solution. The Solution is based on a PAAS-model and is hosted on Azure, thus cutting setup time and cost.

The solution makes use of IoT Edge, IoT Central, Azure ADX and Power BI and provides businesses an easy and robust solution, which is ready for remote data analysis.
