

Overview: Everynet, the world's largest network operator for national LoRaWAN® networks, makes IoT easy and affordable for every industry to enable tracking and monitoring solutions. Everynet's neutral-host business model enables Mobile Network Operators (MNOs), Mobile Virtual Network Operators (MVNOs), Application Service Providers (ASPs), Managed Service Providers (MSPs) and Internet Service Providers (ISPs) to offer carrier grade Low-Power Wide-Area (LPWA) IoT services to their customers.

LoRaWAN is the globally adopted open standard for long-range, low-power, wireless IoT solutions. Enterprises across a variety of verticals can launch new and innovative IoT solutions that reduce operational costs or help increase revenues. LoRaWAN has several benefits, including real-time alerts, long battery life of devices, long range both indoors and outdoors, and reach in harsh environments.

Markets: United States, Puerto Rico, Brazil, Indonesia, Spain, Andorra, United Kingdom, Ireland, Italy and Iceland.

Key Applications: Utilities, Supply Chain Logistics, Smart Infrastructure, Asset Tracking and Monitoring.

Key Features:

- Carrier-grade resilient network infrastructure
- Fully staffed 24/7 NOC
- Neutral host supporting broad distribution channels
- Low-cost, no CAPEX connectivity
- Curated ecosystem of proven solutions
- In-house R&D leading core platform
- Security, end-to-end encryption and authentication
