About TVH Consulting

ADAX COOP : the Microsoft Dynamics solution for Agricultural Cooperatives

30 M€ turnover
190 employees

+130
customers

• **70%**
**International
projects**

- High volume, multi lingual, multi country projects

• **A single
expertise**

- ERP consulting and integration
- D365 ISV Certified solution

• **R&D
Center**

**France /
Morocco**

Advanced Suite of Microsoft Dynamics AX (ADAX)

ADAX COOP: Origins

NICHE ACTORS

- Best of breed or niche solutions with Deep vertical functionality for a particular business process
- Local actors

Combine industry expertise on a robust technology platform

MAJOR ERP PLATFORMS

- General ERP solutions with vast horizontal functionalities
- Rich international eco system of partners / integrators
- Long term, stable editor

ADAX COOP

SOLUTION BUILT ON DYNAMICS TECHNOLOGY
TAILORED FOR AGRI COOPERATIVES

Best of both worlds :

- Streamlined cooperative processes
- Rich, robust, ERP technology – Microsoft Dynamics
- Highest level of Microsoft certification
- Partnership approach to ensure solution evolves with clients

ADAX Customer onboarding

BY
TVH
CONSULTING
—
The ERP expert

Our clients contribute to the pertinence and evolution of ADAX

Tailored functionalities that fit specific industry challenges

ADAX evolves with real business needs that our clients face everyday

Strong, long term partnerships with successful business cases

CfMD solution for Microsoft Dynamics

Client business needs becomes priority functionalities in ADAX

We standardize & streamline these industry processes within ADAX

TVH Consulting ensures the maintenance and evolution of your ADAX ERP alongside Dynamics

LIFE SCIENCES

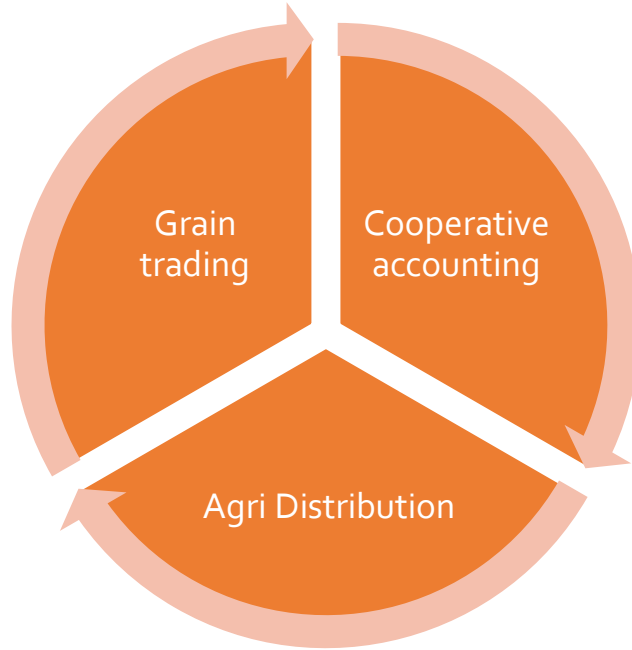

RETAIL & DISTRIBUTION

ADAX COOP: Key Modules

- Purchase contracts
- Receipts in collection sites
- Configurable pricing engine
- Self-billing
- Grain storage & processing
- Traceability
- Sales contract
- Invoicing

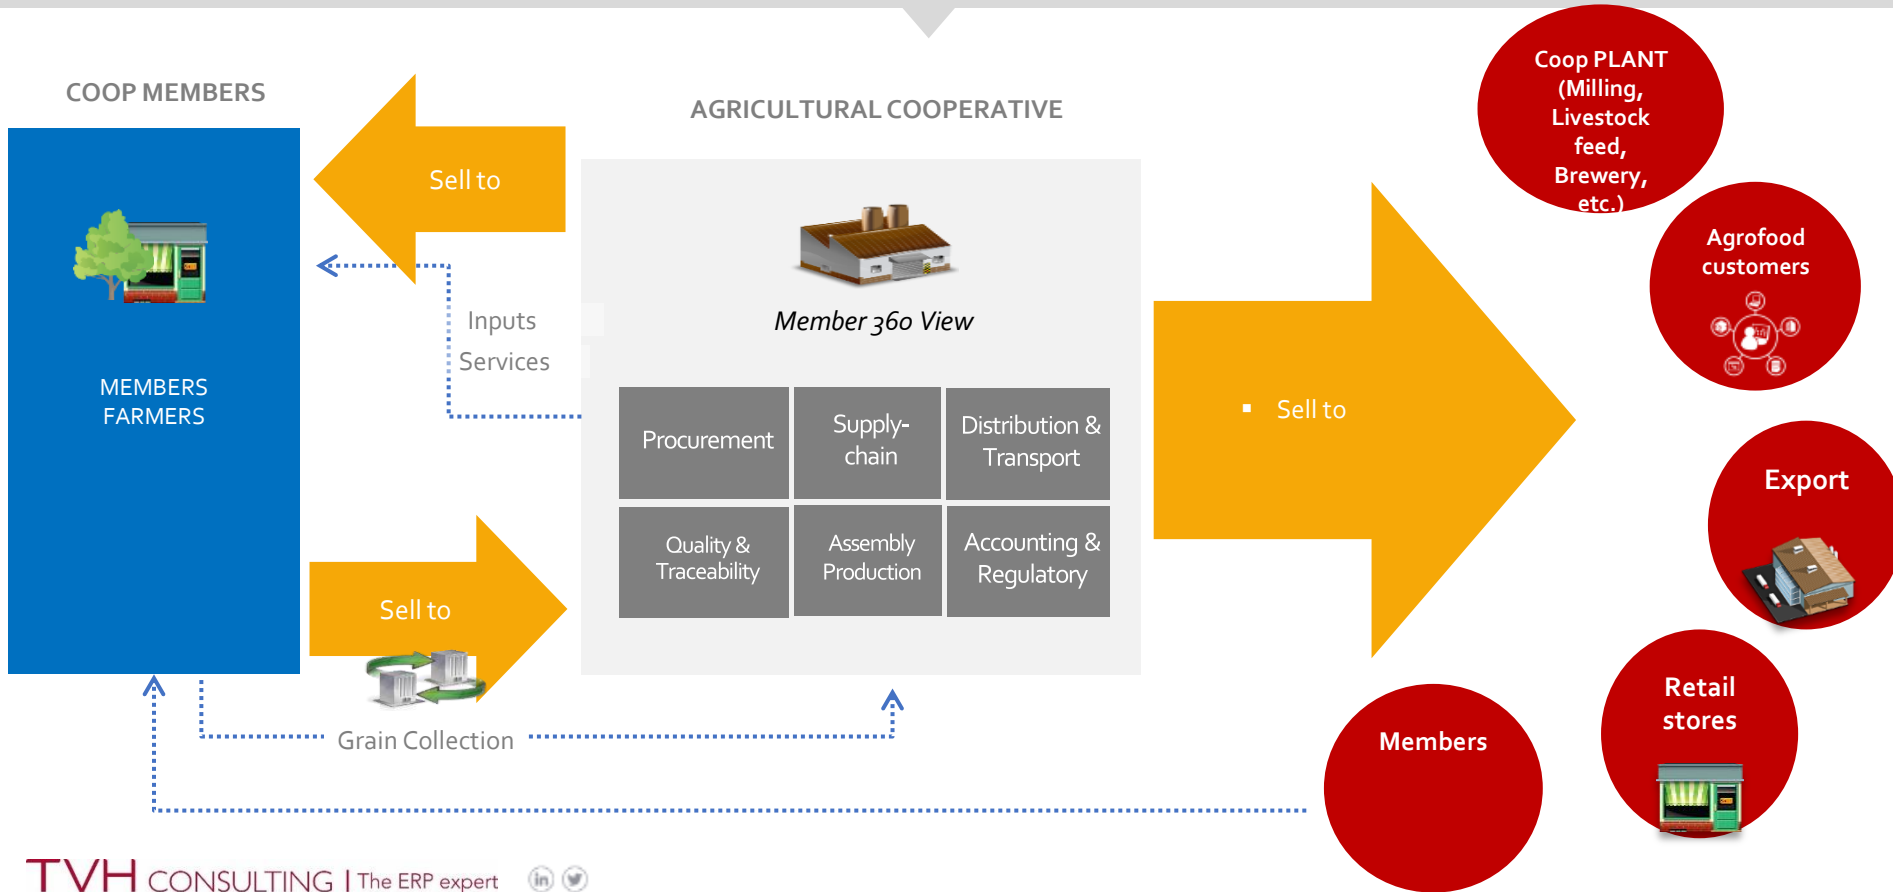

- Member 360 View
- Shares and Capital management
- Deposit Accounts
- Interests calculation
- Netting / offset payments
- Credit management and collection
- Statements

- Configurable pricing engine
- Products / services catalogs
- Procurement and sourcing
- Supply-chain
- Channel management
- Sales and invoicing

ADAXCOOP: Cooperative organizations flows

ADAX COOP: Key Modules

- Purchase contracts
- Receipts in collection sites
- Configurable pricing engine
- Self-billing
- Grain storage & processing
- Traceability
- Sales contract
- Invoicing

- **Member 360 View**
- **Shares and Capital management**
- **Deposit Accounts**
- **Interests calculation**
- **Netting / offset payments**
- **Credit management and collection**
- **Statements**

- Configurable pricing engine
- Products / services catalogs
- Procurement and sourcing
- Supply-chain
- Channel management
- Sales and invoicing

Cooperative Accounting Functionalities

Financial foundation

- General ledger
- Accounts receivable
- Accounts payable
- Analytical dimensions

Cooperative member accounting

- Monitor and update capital shares
 - Trace all member business and financial interactions
 - Young farmer data
 - Customer and supplier identification
 - Activities
- Warrants & guarantees

Capital management and remuneration

- Current and deposit accounts
- Interests calculation
- Interests and premiums invoicing
- Capital management (subscription, radiation, transfers...)
- Capital drivers
 - Shares types
 - Shares interests
- Dividends
- Short-term credit
- Netting / compensation process
- Member statement of accounts
- General assembly
- Tax and social charges
- Statements and reports

ADAX COOP: Key Modules

- Purchase contracts
- Receipts in collection sites
- Configurable pricing engine
- Self-billing
- Grain storage & processing
- Traceability
- Sales contract
- Invoicing

- Member 360 View
- Shares and Capital management
- Deposit Accounts
- Interests calculation
- Netting / offset payments
- Credit management and collection
- Statements

- Configurable pricing engine
- Products / services catalogs
- Procurement and sourcing
- Supply-chain
- Channel management
- Sales and invoicing

Grain commodity trading – key features

Procurement & Collection

- Member supplier data
- Grain contracts / contract types and templates
- Receipt slips in silos with samples and characteristics analysis
- Quality / characteristics
- Standard grading schedule
- Standard grading calculation / standard value
- Self-billing process and Invoice report
- Financial schedules (premium/incentive and discount schedules, charges)
- Miscellaneous tax calculation
- Public and legal statements to regulatory organisms
- Price addition
- Rebates (end of campaign rebates allocation)

Inventory & Logistics

- Site structure (silos, grain bin, locations)
- Inventory type (Collected, Deposit, Work order) and owner identification)
- Physical and graded quantities (tons)
- Quality control and traceability
- Bin operations (disinsectisation, etc.)
- Transfers (internal, external)
- Transfers (internal, external)
- Public and legal statements to regulatory organisms (France)
- Average characteristics values (grain bin)
- Shelf life of a grain bin
- Mutation
- Mixing

Distribution

- Cooperative trading group
- Customers (mills, food-industries, malthouse, export, etc.)
- Destination (human, animal) with VAT calculation
- Sustainability (origin, certification, etc.)
- broker and commission calculation
- Trade agreements
- Sales contracts
- Services and broker
- Execution periods of a contract
- Execution orders
- Transport carrier appointment
- Delivery
- Temporary and definitive invoicing

Integration

- Member portal
- EDI with partners and third-party applications
- Weighbridge / Truck scale
- Quality measurements machines

KEY FEATURES

- Crop and harvest parameters
- Products
- Products categories (multi-levels)
- Product characteristics (Humidity, proteins, etc.) and grading
- Standard grading schedule
- Public and legal statements to regulatory organisms
- Miscellaneous tax calculation
- Crop pricing (advance price, firm, addition)
- Configurable pricing engine (price, incentives, discounts)
- Collection contracts
- Receipt slips in silo
- Connection with weighbridge and quality measurement devices
- Sampling
- Collection statement to farmer
- Self-billing
- Customer contracts broker
- Inventory types (Collected, Deposit, Work order) and owner identification)
- Price addition invoice
- Rebates

Grain pricing and invoicing engine: example of complex multi-level pricing definition

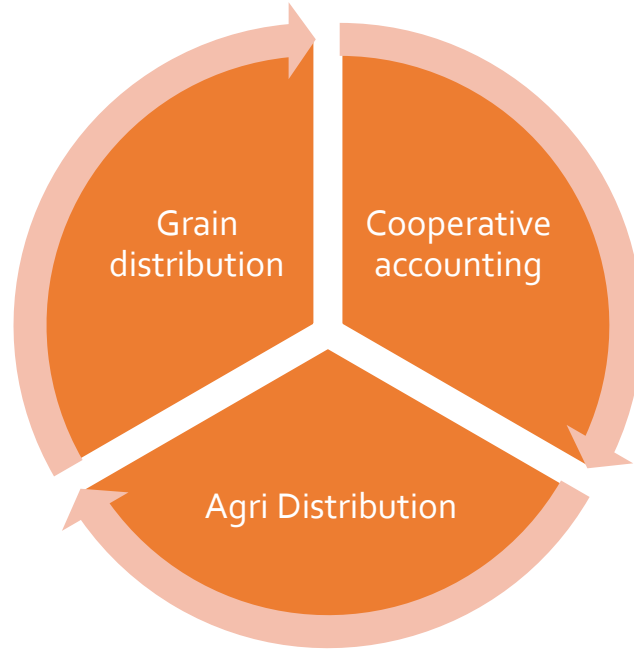

Pricing elements	Description	Price
Base price:	from collection contract, from receipt (no contract), from trade agreement pricing conditions based on configurable criteria (company, crop, product category or product, price type, etc.)	Base price : 180,00 €/Ton
Contractual bonus:	bonus based on a contract (because anticipated contracts help the Coop for the overall planning)	+ 12,00 €/Ton
Traceability form sent:	bonus applied if the farmer filled and sent the traceability form. Enables the Coop to track field/plot operations (pesticides, fertilizers used...)	+ 7,00 €/Ton
Reduction on Moisture characteristics:	based on moisture values, some drying charges apply based on a pricing (drying fees based on moisture)	- 5,50 €/Ton
Reduction on Impurity characteristics	based on impurity values, some cleaning charges (calibration, screening) apply based on a pricing (cleaning fees based on impurity value ranges)	- 3,60 €/Ton
Bonus or reduction on Specific weight	bonus or reduction based on a pricing policy (specific weight bonus or reduction per value ranges)	- 2,55 €/Ton
Bonus or reduction on protein:	bonus or reduction based on a pricing policy (protein bonus or reduction per value ranges)	+ 4,20 €/Ton
Transport charges	transport charges based on configurable pricing criteria (company, crop, product category, product, delivery mode, etc.)	- 7,2 €/Ton
Contribution fees & taxes:	fees paid to external organizations (Unions, public...). A farmer can be a member of multiple organizations.	- 0,75 €/Ton
R&D Tax	Example of a tax paid for R&D investment	- 1,10 €/Ton
	Total Net price	182,50 €/Ton
Reduced VAT 10%:	Mandatory tax: only calculated on pricing elements linked to the product (here calculated on base price, contractual bonus, traceability form, moisture reduction, impurity reduction, specific weight, protein)	
VAT normal 20%:	Mandatory tax: only calculated on pricing elements linked to services (here calculated on transport charges)

- **Procurement and sourcing**
- **Supply-chain**
- **Channel management**
- **Sales and invoicing**

Agri Distribution Functionalities

Master data

- Products and services (fertilizers, seeds, plant protection, pesticides, etc.)
- Catalogs and categories
- Documents and technical sheets (MSDS, etc.)
- Hazardous goods
- Batch management

Procurement and replenishment

- Manual or automatic replenishment orders
- Supplier contracts
- Trade agreement engine
- EDI framework
- Supplier rebates contracts
- Direct delivery to members
- Supplier cases and returns

Distribution

- Trade agreement engine
- Member groups and hierarchies
- Customer contracts
- Customer orders
- Supplier direct delivery
- Customer rebates contracts
- Logistical flow
- Sales authorization (plan protection products authorization)
- Water pollution tax and report statement to regulatory organisations (water agencies)
- Taxes and charges
- Specific payment schedules for young / new farmers

Supply-chain

- Radio frequency terminals for inventory operations
- Assembly
- Mixing
- Receipts and putaway process
- Transfer orders
- Picking and shipment
- Miscellaneous inventory transactions
- Hazardous goods transportation slip
- Transport route
- Control of hazardous items on classified facilities
- Traceability and batch management
- Quality process

Silo management

- Radio frequency terminals for silo operations
- Replenishment orders
- Sales cockpit screen
- Cash payment with cash register
- Sales return process
- Arrival overview and receipt in silo
- Transfer orders
- Picking and shipment
- Cycle counting and simultaneous counting
- Packing and assembly
