

# Artificial Intelligence Solutions

**datasciencedojo**  
— data science for everyone —

## 01 Discovery

Tell us your goals, requirements and reservations.

## 02 Data

Data review and identification of desired outcomes.

## 03 Research

We take your goals, industry and data into consideration and begin to research a solution.

## 04 Solution Building

Once the research is complete we begin to build your solution.

## 05 Testing and Validation

Through a series of tests and iterations, we improve and validate the solution.

## 06 Presentation

We prepare a presentation where we explain the solution, the solution's performance, and give insights.

## 07 Next Steps

Where we go from here is up to you. We can develop a plan for another production scale solution or build an entire ai environment or we can even train your staff. We are open to almost all possibilities.
