Azure Foundations Assessment

Navigating a cloud migration is complex. As a Microsoft Azure Expert MSP, we'll make sure you avoid the common roadblocks that cause cloud adoption initiatives to stall or fail before they even start.
We'll quickly migrate your applications, data, and architecture to Azure while helping your organization create a cloud strategy to address key security and compliance, disaster recovery and backup, and data retention goals.

A closer look at what the AFA provides

Datacenter Modernization
Capture key foundational elements to support datacenter improvement to help customers reduce cost, improve service levels, governance recommendations, and drive business agility.

Microsoft Azure and Cloud Profiling
Provide real-time data on server and application performance to support a more detailed cloud strategy discussion.

Data Platform Modernization
Facilitate future planning with detailed performance reporting, virtualization architecture, and support timelines to orchestrate end-of-life transitions and product innovation.

How to get started
The Azure Foundation Assessment is led by the Microsoft Solution Assessment Team and the customer's account team. Customers work with Microsoft to define the scope of the engagement, review requirements, align stakeholders, and finalize project timelines.

What's included
- Executive summary of data-driven findings
- Alignment to business objectives
- Defined project scope
- Identification and prioritization of candidates to move to Azure
- Multi-year cost estimates
- Proposal to execute an Azure Migration Engagement
- CAF Governance Analysis and Recommendations

Migrate with Confidence
- Crayon has helped thousands of organizations, including global enterprises, migrate their business to the cloud. These companies benefited from substantial IT costs savings, as well as improvements in productivity, business agility, and operational resilience.
- Combining the experience and expertise of Microsoft and Crayon, we provide a complete and proven approach for migrating to the cloud so that you can achieve cloud benefits faster.
