Artificial Intelligence Fast Start
Embrace innovation quickly and strategically.

Business challenge

In the modern marketplace, Artificial Intelligence (AI) is becoming a business catalyst, driving competitive advantage and making everyday processes better and faster. But pinpointing your best use cases for AI, making the shift smoothly and creating cultural buy-in is a complex undertaking.

How we help

Insight's two-to-four week engagement is a deep dive into how AI aligns with your unique business environment. You'll work with award-winning engineers, architects and data scientists who will tap into the data you're already using and reveal AI use cases that will improve outcomes for the long-haul.

At the end of our engagement, you'll see up to three AI demonstrations in action — informed by your vision and built by our rapid prototype specialists.

Preparing for transformation

To ensure you receive the greatest value from this Fast Start, our experts will need:

- Participation from relevant business & technical stakeholders
- Possible scenarios that could benefit from AI exploration & implementation

Duration
2- 3-week engagement

Benefits
- **Pinpoint best AI use cases** for your business goals.
- **Maximize the value** of your data.
- **Build an implementation roadmap** with expert guidance.
- **Progress quickly** by deploying one or more demos.
- **Socialize the value** of AI in readout sessions.

What to expect

Ideation & envisioning	Rapid PoC	Visualization & readout
We'll begin by exploring the power of AI and align its capabilities with your business opportunities. Together, we'll shape one to three cases for Proof of Concept (PoC) implementation.	During the session, we'll roll up our sleeves and iteratively deliver on the cases envisioned on the first day of our workshop—and consistently refine our delivery and direction with your business, IT and leadership stakeholders. At the end, you'll receive code and artifacts, as well as one to three demo-ready AI solutions deployed.	On the final day, we'll drive executive and technical readouts to facilitate PoC understanding and knowledge transfer covering demos, implementation, value assessments and future opportunities. You'll be equipped to demonstrate value to your business, IT and leadership stakeholders and identify next steps for your AI journey.

About Insight

At Insight, we define, architect, implement and manage Insight Intelligent Technology Solutions™ that help your organization run smarter. We'll work with you to maximize your technology investments, empower your workforce to work smarter, optimize your business and create meaningful experiences.
