

Plan Your

OFFICE 365 MIGRATION

What's the best way for you to migrate to Office 365? What should you be doing to ensure a smooth migration? And once you've migrated, how do you begin to leverage the many collaborative tools available in Office 365?

Sirius and Microsoft Partnership

As a Gold Cloud Productivity & Platform Microsoft Partner, Sirius helps clients manage, migrate and secure their SharePoint and Office 365 environments with a proven methodology that leverages industry best practices to achieve the business-desired outcomes. Once migrated, Sirius can continue to provide envisioning and adoption thought leadership to ensure that your organization realizes the full value of its investment in the Office 365 platform.

Sirius Solution Alignment Workshop

Sirius can help smooth the Office 365 migration process with a highly successful two-phased approach. It is simple, prescriptive and guarantees successful outcomes. We first engage with our clients in an interactive workshop to:

- Review business goals and understand your desired business outcome
- Assess the environment
- Assess scope of migration and prioritize workloads
- Perform a gap analysis
- Recommend environment remediation
- Develop a high-level migration plan
- Perform a resource skills evaluation and determine requirements

The outcome is a clear migration path tailored to our client's needs and priorities, which is then followed by the actual migration. Sirius migration services, regardless of size, always include:

- Change Management and Adoption Planning
- Environment Remediation
- Pilot/Testing of Migration
- Migration of Environment
- Knowledge Transfer
- Sunsetting Existing Platform
