Built for
teamwork

Integrated
for simplicity

Intelligent
security

- Create compelling content with intelligent apps
- Work naturally with ink, voice, and touch
- Visualize information in new ways
- Connect the experience across devices

- Email and calendar with Exchange
- Connect to people, content, and apps with SharePoint
- Voice, video, and chat with Skype and Microsoft Teams
- Network across the organization with Yammer
- Co-author with Office 365 ProPlus

- Minimize TCO across deployment, management, & servicing
- Broad support for PC, Mac, iOS, & Android platforms
- Comprehensive management of your entire workforce

- Identity & access management
- Information protection
- Threat protection
- Security management

Sirius helps clients manage, migrate, and secure their SharePoint and Office 365 environments.

Once migrated, Sirius can continue to provide envisioning and adoption thought leadership to ensure that your organization realizes the full value of its investment in the Office 365 platform.

- Connect users across the organization
- Improve Intranets and Content Management
- Establish a hub for team work
- Drive employee engagement
- Business process simplification
- Connected business applications
- Integrate collaboration into LOB apps
- Automate workflows across services

Sirius Solution Alignment Workshop (SAW)

Sirius can help smooth the Office 365 migration process with a highly successful two-phased approach. It is simple, prescriptive and guarantees successful outcomes. We first engage with our clients in an interactive workshop to:

- Review business goals and understand your desired business outcome
- Assess the environment
- Assess scope of migration and prioritize workloads
- Perform a gap analysis
- Recommend environment remediation
- Develop a high-level migration plan
- Perform a resource skills evaluation and determine requirements

The outcome is a clear migration path tailored to our client's needs and priorities, which is then followed by the actual migration. Sirius migration services, regardless of size, always include:

- Change Management and Adoption Planning
- Environment Remediation
- Pilot/Testing of Migration
- Migration of Environment
- Knowledge Transfer
- Sunsetting Existing Platform
