NEUDESIC | Microsoft

Azure Purview:
Data Governance 3-Week Jumpstart

Gain a comprehensive understanding of your data assets and set the foundation for an effective data governance strategy

Take the next step to better discover, understand, and trust your data

In this 3-week jumpstart engagement, Neudesic will design, build, and deploy an enterprise data governance solution using Microsoft Azure Purview. The customized and functional data governance solution helps clients understand the capabilities of Azure Purview, while setting the foundation for mapping, cataloging, and generating insights across your data assets.

OUR DELIVERY PROCESS

Envision *Week 1*
- Identify business challenges, opportunities, and business scenarios.
- Document data classifications and compliance requirements.
- Understand the data ecosystem and identify and enrich data sources.

Design *Week 2*
- Create a unified map by integrating data from three to five data sources.
- Design an architecture for Azure Purview data map, data catalog, and data insights.

Develop *Week 3*
- Deploy a custom Azure Purview implementation in your environment and create data mapping, business glossary, and data catalog.

FINAL DELIVERABLES

- ✔ Customized architecture and deployment of Azure Purview
- ✔ Registration and enrichment of your data assets
- ✔ Configuration of a one-stop shop to provide access to data assets with advanced search and functionality
- ✔ Training and hand-off to your team
