DIGITAL VELOCITY & MICROSOFT PARTNERSHIP HIGHLIGHTS

Highlights

- 800+ Engineers, 120+ Microsoft Dedicated
- 360+ Microsoft Azure and Security Certifications
- Advanced Specializations:
 - Windows & SQL Server Migration
 - Modernization of Web Applications
 - Kubernetes
 - Analytics
- Azure Expert MSP
- Azure Cognitive Services Powered Intelligent CX
- Microsoft AMM and Solutions Assessment Funding Subsidies

Expertise

- Core Azure Infrastructure Deployment and Management
- On-Premise to Cloud Migration
- Hybrid Cloud
- Infrastructure Automation and IaC (Infrastructure-as-Code)
- Cloud Native Application Development
- Modernization of Legacy Applications
- Data Warehousing and Analytics
- Database Modernization & Migration
- Cloud Security & Governance
- Data Protection & Privacy
- AI and ML Solutions

AZURE CLOUD ADOPTION JOURNEY

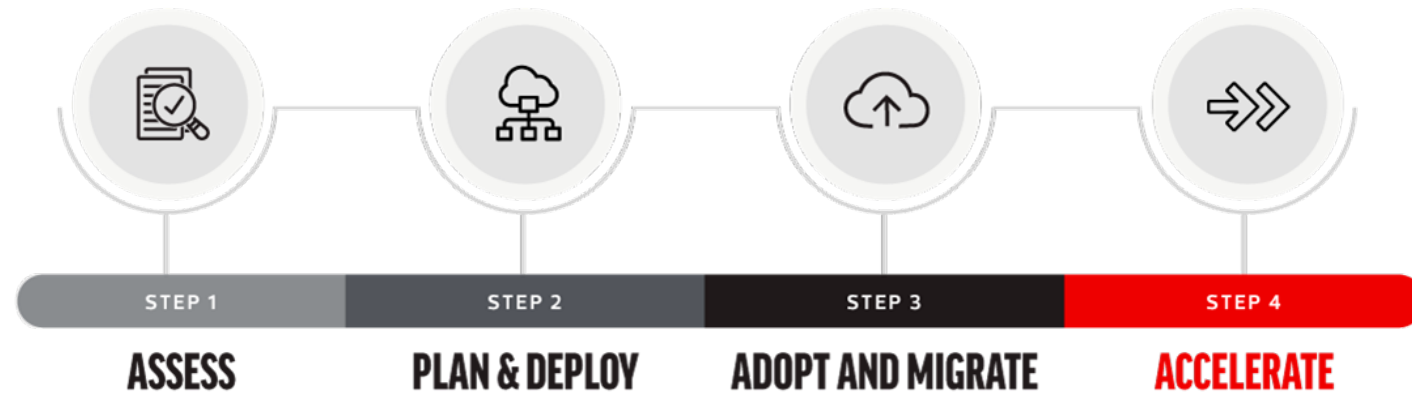

With CDW's Azure Cloud Adoption Journey, we provide an opinionated expert approach to discovery, planning, deployment, adoption, and migration services to deploy Azure cloud landing zones and ensure your organization will maximize the value and benefit of cloud-native patterns and practices.

Our Azure Cloud Foundation Landing Zones provide an ideal scalable foundation for modern application development, hosting, and delivery. This allows your organization to scale faster, drives down operational costs, improve operational efficiencies, and provides the agility to better compete in today's modern marketplace.

MOVING THROUGH THE AZURE CLOUD ADOPTION JOURNEY

CDW provides you with the foundation, roadmap, and the expert guidance to best leverage the benefits of modern cloud-native infrastructure methodologies.

What your Engagement Looks Like

Digital Velocity's prescriptive approach to Azure cloud adoption

PHASE 1 - Technical Readiness Assessment

PHASE 2 - Azure Cloud Foundation Landing Zones

PHASE 3 - Cloud Migration Services

PHASE 4 - Accelerate Cloud Native Adoption

TECHNICAL READINESS ASSESSMENT: AZURE CLOUD

Digital Velocity's **Technical Readiness Assessments** (TRAs) are designed to benchmark current architecture, processes, practices, and the current state of your organizations level of technology adoption and use with the goal of providing a high level identification of the fastest and most impactful path toward a desired future state.

The Technical Readiness Assessment: Azure Cloud engagement provides the prerequisite data through our discovery process to start the planning and framework for the Azure Cloud Adoption Journey for your organization.

AZURE CLOUD FOUNDATION LANDING ZONES

Digital Velocity's **Cloud Foundation** Landing Zone offerings are designed to meet your organization wherever you are with your technology adoption level. All versions of the Cloud Foundation engagements are defined by an opinionated best practices approach to delivering a scalable platform to amplify the success of our customers' cloud adoption journey. The **Basic**, **Essentials**, and **Premium** offerings vary in deployment complexity and governance levels and are chosen based on the outcomes of the **Technical Readiness Assessment**.

For Premium engagements, A **Cloud Foundation Premium Workshop** will be performed. These are designed to provide a deep dive into your current architecture, processes and practices in order to identify and prioritize business specific requirements to ensure you are able to extract the most value out of your new Azure cloud landing zone.

AZURE CLOUD MIGRATION SERVICES

CDW provides comprehensive cloud migration services to ensure the adoption of your new Cloud Landing Zone is fast and seamless.

The Azure Migration: Basic engagement is intended to provide a rapid solution for customers that would like to lift-and-shift bare-metal/virtual machines from an on-premises data center or another cloud provider to Microsoft Azure.

The Azure Migration: Advanced engagement is intended to provide a tailored migration solution for customers that would like to lift-and-shift or lift-and-improve server infrastructure and may include customizations, updates, and/or modifications to resources as prioritized and outlined as part of the **Cloud Foundation Premium Workshop** deliverables.

ACCELERATE CLOUD-NATIVE ADOPTION

Once your **Azure Cloud Foundation** has been deployed and put into use, Digital Velocity can provide a wide variety of follow-on services including Infrastructure Automation, Application Development & Modernization, Cloud Governance, Data and Analytics Modernization, Cloud Security Deployments, AI & ML Engagements, and Modern Managed Services to get the most out of your new Azure Landing Zone.

Our off-the-shelf and custom technology solutions are inherently cloud-native and code-native, maximizing the impact and ROI of your investment in the cloud now and into the future. Leverage our years of expertise and hundreds of engineers to help your company develop something category defining with modern cloud-enabled technology.
