CLOUD SOLUTIONS

Migrating to the Cloud

> **Companies are prioritizing a balance of public and private clouds.*”**

Cloud infrastructure is the preferred method among many businesses for storing data. Even the newest technology will someday be obsolete, and investing in upgraded equipment can be costly and difficult to prioritize. Let FNTS help shift your IT focus to Cloud-first technology strategies to optimize services, reduce operating expenses and risks, improve performance and enhance customer service. FNTS supports a wide range of operating systems including: Windows, Linux, AIX and iSeries; further demonstrating our breadth of IT expertise and reliability to migrate workloads to the cloud. One vendor, multiple solutions, we truly become an extension of your IT team.

Savings

Purchasing IT infrastructure can be daunting and expensive. However, companies that migrate to the Cloud save on overall capital expenditures compared to purchasing and maintaining on-premises infrastructure. Our experts at FNTS can help you migrate to a Cloud infrastructure cost-efficiently while helping you stay up-to-date on the latest technology to enhance speed, security and scalability. By partnering with FNTS, you save tremendously by not investing in hardware and excess capacity. Leverage our data center and subject-matter expertise to achieve long-term cost savings, maximize your bottom line, and increase your IT footprint and digital capabilities.

Security

Data security is the number-one challenge companies face when it comes to their IT infrastructure. At FNTS, keeping your data and computing environments safe and secure is our top priority. FNTS employs certified industry professionals who provide a holistic approach to security by leveraging an automation platform that results in rapid response to alerts and enhanced overall protection of data. With the latest in security offerings and an ability to meet the strictest regulatory requirements, FNTS is here to keep your Cloud environment compliant and secure from intrusion.

Flexibility

As the COVID-19 pandemic has highlighted, flexibility is imperative for a business to run smoothly during uncertain times. Unlike on-premises systems, data in the Cloud can be stored and accessed from anywhere, providing businesses the ability to transition seamlessly from in-office to work-from-home scenarios whenever necessary – a key necessity in today's evolving hybrid work environment. The types of Cloud offerings provided by FNTS are flexible – a Private, Public or Hybrid Cloud solution can be utilized to fit any business' needs and budget.
