

Boost business resiliency with Kyndryl Hybrid Platform Recovery Services

Customer challenges

Organizations recognize the digital transformation and superior customer experiences offered by cloud. But a hybrid cloud environment can lead to unintended risks and increased complexity when managing resiliency. Traditional disaster recovery (DR) practices have several drawbacks:

- Manually copying data to physical media such as disks or tape is resource-intensive
- In addition, such manual backup processes are error-prone
- Retrieving backup media from an off-site location is time-consuming
- It is difficult to deliver consistent and predictable disaster recovery outcomes

Solution highlights

Kyndryl™ Hybrid Platform Recovery Services provide DR monitoring, reporting, testing, and workflow automation for complex hybrid Microsoft Azure cloud environments. Specific features include:

- Automated recovery of physical, virtual, and cloud workloads
- Built-in continuous replication for all Azure-supported OS platforms

- DR orchestration between on-premises VMware workloads and the Azure cloud using Azure Site Recovery
- Recovery point objective (RPO), recovery time objective (RTO), data lag, and Azure cloud resource monitoring and alerts
- Real-time DR-readiness validation, automated testing, and DR health monitoring

Customer benefits

Kyndryl Hybrid Platform Recovery Services give you push-button DR capabilities that help reliably recover critical IT, business services, and data. Top benefits are as follows:

- 1 Speed:** DR automation and testing can reduce recovery time from hours or days to mere minutes
- 2 Scalability:** A single dashboard for real-time DR monitoring and management scales across on-premises, public, private, and hybrid clouds as well as heterogenous environments
- 3 Adaptability:** Achieve reliable recovery of enterprise applications spanning multiple technologies
- 4 Predictability:** Helps meet uptime, audit, and compliance requirements

Protect your data with Kyndryl Managed Backup Services

Customer challenges

With the rise of cyber threats, the world is riskier than it used to be. Also, as the amount of data increases, the risk of data loss increases too. Data breaches continue to be costlier year after year. As businesses manage and safeguard their enterprise data, they face numerous challenges.

- Increased risk of data loss due to disruption, outage, or disaster
- Rising costs of protecting data as well as application protection, backup, and continuity
- The need to comply with changing government and industry regulatory requirements

Solution highlights

Kyndryl™ Managed Backup Services helps protect and retrieve critical business data, monitor the health of your data protection environment, and comply with government and industry regulations. This solution is a fully-managed, robust data protection service for Microsoft Azure workloads and provides the following capabilities:

- Protects mission-critical Azure workloads
- Supports on-premises, multicloud, and hybrid deployments
- Pre-empts and manages information risk
- Leverages industry-leading backup software
- Provides business outcome-based service levels
- Offers pay-as-you-go pricing options

Customer benefits

Using Kyndryl Managed Backup Services, you can flexibly scale your backup data volume according to your business needs. Top benefits of the solution include:

- 1 Enhanced security and compliance through the protection of critical business data and applications in a security-rich environment
- 2 Backup support for multiple workloads, including Azure Virtual Machines, on-premises servers, SQL Server, and SAP HANA on Azure Virtual Machines, Azure Files, and Azure Database
- 3 24x7 centralized management and monitoring of backup and restores and Azure infrastructure

Why Kyndryl and Microsoft?

About Kyndryl

Kyndryl is a \$19 billion company with skilled professionals operating in over 60 countries. We design, build, manage and modernize mission-critical technology systems that the world depends on everyday.

We have decades of experience working with customers to deliver enterprise-grade workload analysis, migration, implementation, and managed services for the most complex workloads.

Providing undisputed leadership

6.1M mainframe installed MIPs

300K network devices managed

5,200+ WAN devices managed

3.5M LAN ports managed

67K+ VMware systems managed

14K+ SAP instances managed

3.5+ exabytes of client data backed up annually

Azure Advanced Specialization Microsoft

- Kubernetes on Microsoft Azure
- SAP on Microsoft Azure
- Analytics on Microsoft Azure
- Microsoft Azure VMware Solution
- Microsoft Windows Virtual Desktop

Solution Partner Designations Microsoft

- Solutions Partner for Infrastructure (Azure)
- Solutions Partner for Data & AI (Azure)
- Solutions Partner for Digital & App Innovation (Azure)
- Solutions Partner for Modern Work
- Solutions Partner for Security
