

# 30-Day Azure Synapse Pilot Implementation

With the accelerating volume and importance of data in today's digital economy, enterprises are investing in modern technologies to deliver new intelligent insights. However, not all technologies are built the same. Azure Synapse delivers cutting edge unified analytics, on the cloud, offering real-time, integrated intelligent insights across your organization.

## Start Your Azure Synapse Journey With a No Cost Microsoft + Adastra Offer

Step 1	<p><b>Discovery Workshop</b> ½ Day</p> <p>Adastra will identify how Azure Synapse can advance your enterprise data and analytics to reach your enterprise goals.</p>
Step 2	<p><b>Adastra Pilot Solution</b> 30 Days Value: 30 K</p> <p>Adastra will work with you to identify a quick win use case, and will pilot this solution in Azure Synapse.</p>

## Innovate with Microsoft Canada's Leading Synapse Integrator

Adastra is collaborating with Microsoft to guide development of the Azure Synapse platform, through product team engagement and early adopter enablement. Adastra Azure Synapse solutions have already proven differentiating value across multiple industries. Through 50+ Azure Modern Data Warehouse implementations and 10+ Azure Synapse implementations, we have developed a set of best practices and accelerators to deliver trusted results faster. As the Synapse platform continues to prove it's industry leading position in speed, scale, integration, and efficiency, Adastra continues to prove why we are Microsoft Canada's top Synapse integrator.

## Step 1 - Discovery Workshop

Adastra will lead an analytics discovery workshop with your organization, to determine how Azure Synapse can bring new insights at scale. The discovery workshop will vision the capabilities of the Synapse platform, will vision how similar organizations are taking advantage of Synapse, will determine your organization's analytics maturity, and will determine the right benefits and use cases that will realize value from Synapse.

## Step 2 - Adastra Pilot Azure Synapse Solution

With your collaboration Adastra will define the right use case for the pilot solution. Adastra will implement foundational Synapse services aligned to your technical governance standards, to host your pilot solution.

Through a collaborative implementation, Adastra will deliver an enterprise Synapse environment on Azure, ready to scale across your organization

## About Adastra

Since 2000, Adastra has been helping global organizations accelerate innovation, improve operational excellence, and create unforgettable customer experiences, all with the power of their data. By providing cutting-edge services and solutions, Adastra helps enterprises leverage data that they can control and trust, connecting them to their customers - and their customers to the world.

**Developing ETL Pipelines:** Adastra will ingest, land, model and curate data, integrating relevant data aligned to the pilot solution use case.

**Analytics Development:** Leveraging the ingested data in Azure, we will engineer data to deliver the analytical goal for the pilot solution use case.

**Training:** Adastra will support full knowledge transfer throughout the process, to ensure client's ability to become self-reliant after the pilot solution is deployed.

**Post-Go-Live Management:** Through Adastra's Cloud Solution Provider and Managed Service offerings, Adastra provides various service structures to ensure the ongoing success of your end-to-end analytic environment.
