

## TRACK DETAILED METRICS

- Understand and report the impact of your governance program
- Track progress and enable continuous improvement
- Provide auditable proof of compliance to regulatory standards

## IMPROVE PRIVACY, SECURITY AND COMPLIANCE

- Discover locations containing personal data
- Identify and prioritize key risks in data

## WORKFLOW

Automated - reduces time to implement

- Enhanced collaboration

## DATA MAPPING

Our innovative technology can quickly map your overall data footprint. Companies need to have an end to end understanding of how and what data is created, shared, transformed, consumed and eventually destroyed within the organization. We build data maps automatically and keep them current by connecting seamlessly to your cloud-based data sources

## PRIVACY IMPACT ASSESSMENTS

Understand the privacy impacts of your processes and systems. Understand key risks and evaluate effectiveness of your controls. Develop controls and processes to comply with regulations like GDPR or CCPA.

## DEFENSIBLE DISPOSITION OF DATA

Make your disposition policies actionable. Delete and quarantine automatically redundant, obsolete or trivial data. Drive compliance, reduce risk and increase security through active management of data.

## DATA SUBJECT ACCESS REQUESTS

Automate your DSAR responses with Meru. Utilize our API integrations and workflows to seamlessly track and respond to search, delete and opt-out requests.

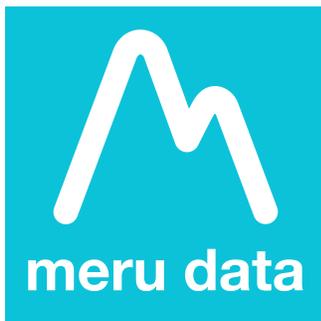

## SIMPLE, EFFECTIVE, SCALABLE

Strengthen your Information Governance with our solutions.

Benefit from best practices and templates from decades of experience across various industries.

Bring all data stakeholders (business users, IT, compliance, security etc.) together.

Gain better control over compliance efforts. Our solutions use machine learning to track compliance and automate actions.

## OPPORTUNITY AND VALUE CREATION

Design your Information Governance programs to increase consumer trust. Unlock value with better governance, more effective data management and sharper focus on business goals.

## ABOUT MERU

We have extensive experience in implementing governance programs across a wide variety of industries and customers. We bring an unmatched breadth of capabilities around Information Governance, Privacy, Cyber Security, Privacy and Data Analytics.
