
Assess | Design & Migrate | Solutions | Manage & Optimize

Go to Azure

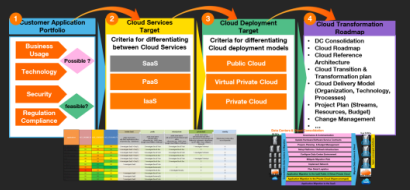
Objective

To help you switch to Azure by going through all the key steps: Infrastructure Audit, Maturity Assessment, Readiness Assessment and Migration Strategy in order to make a successful transition.

- Collect, aggregate, analyze and consolidate all information on your existing IT (infrastructure, data, applications, functional view, business view and organizational view) and conduct workshops
- Conduct interviews with key people in your organization to establish a state of your cloud maturity on business, technology and processes via the Cloud Maturity Model
- Provide a comprehensive review and assessment of your infrastructure and application assets' eligibility for the Azure Cloud and the associated level of effort
- Document the most appropriate strategy for migrating and transforming every application, server and database in your IT legacy to Azure

Benefits

Enable you to understand your assets and make an informed decision to launch your infrastructure and application transformation project to Azure

Features


The scope includes different workshops, audits, inventories and your roadmap to make each milestone a success
