

Don't compromise, modernize: Unlock your mainframe data with cloud-based solutions

Mainframes house a wealth of data that holds the key to business innovation. However, many organizations recognize just a fraction of the value of that data. **Kyndryl and Microsoft** have partnered to transform how organizations like yours connect mainframe data and applications to the rest of your operations with our Mainframe Modernization solution.

This solution combines the power of the Microsoft cloud with the technical experience of Kyndryl to deliver enterprise-level, mission-critical capabilities, **so you can:**

Modernize your workplace

Unlock the power of your mainframe data and discover new data insights and capabilities with modern data solutions that only the cloud can provide.

Drive operational excellence

Drive greater innovation with an open, agile operating model.

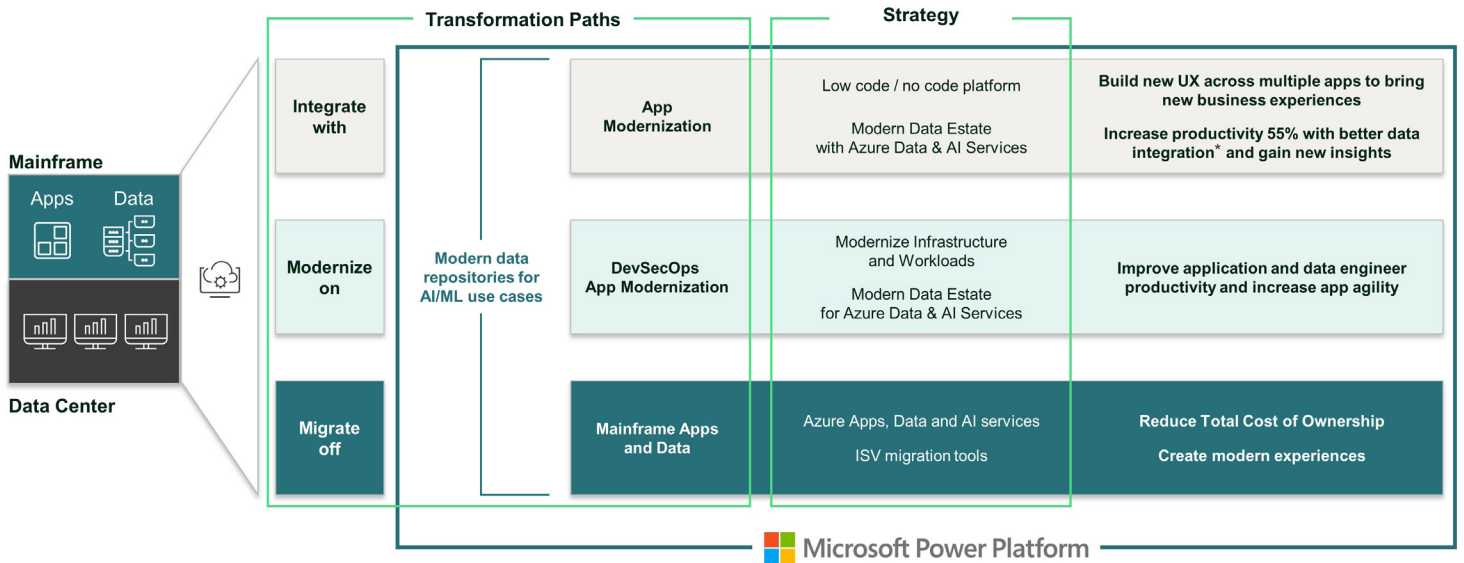

Enhance security, resilience, and performance

Modernize, automate, and orchestrate your applications and data to enhance long-term security, resilience, and performance.

The Mainframe Modernization solution

This solution was built by Kyndryl and Microsoft leveraging Kyndryl's mainframe expertise. When teamed with Microsoft Cloud modern applications, you benefit from higher business impact from wherever you are in your transformation journey.

kyndryl + Microsoft = Business Impact

*Results are over three years for a composite organization based on interviewed customers. Forrester Total Economic Impact Highlights of Power Platform Premium Capabilities 11/2022.

The “migrate off” path can be a long journey—months to years. Taking an incremental approach allows you to experience greater business impact over time. We offer two alternatives:

- The “integrate with” path allows you to modernize your apps and integrate your data as well as evolve your data warehouse into a modern cloud data estate.
- The “modernize on” path provides you access to modern low code/no code development.

Both the “integrate with” and “modernize on” paths can be completed in days or weeks.

The Kyndryl team has extensive experience integrating mainframe data with Microsoft Power Platform, Azure®, data & AI services, and digital workplace automation:

- **Highly rated mainframe service capabilities:** We serve more customer MIPS under management than all reported competitors combined.¹
- **More than 8,300 experienced IBM™ Z and IBM i delivery professionals:** We’re hiring several hundred more each year, ensuring we’re there when you need us.
- **Proven Microsoft expertise:** Our practitioners have earned more than 22,000 Microsoft certifications.

Kyndryl has the knowledge, patterns, IP, technology ecosystem, and Microsoft expertise your organization needs to accelerate business.

Kyndryl is the highest rated mainframe service vendor for critical capabilities with:
